

Sight-Seen wholesale prices for accurately graded U.S. Coins - Certified or Raw

...a Friday morning report on the Coin Market

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer* newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full steps" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

I would not hesitate to refer anyone to you: in fact, I would most certainly encourage them! I hope you and your family have a wonderful weekend. With gratitude and respect."

Single copy price \$4.00 Vol. XXXXII No. 2 January 9, 2004 . . . a Friday morning report on the Coin Market

BRISK ACTIVITY EXPECTED AT FUN KEY DATES COMMAND STRONG BIDS

The Market in Depth

Optimism and high expectations prevail as dealers begin 2004. This is a year that holds a lot of promise as most dealers believe that the best, for the rare coin market, is yet to come. If the surge in precious metals is any indication, then their sentiments will be true. It doesn't hurt that Gold is beginning the new year in dramatic fashion with healthy gains. Gold has soared to levels not seen since 1988, currently trading near \$423 per ounce. Silver has also amazed analysts by vaulting past the \$6 per ounce mark to the delight of dealers. Silver has climbed precipitously to \$6.30 per ounce, its highest level since late 1998. The weakness in the U.S. dollar is being credited with Gold's latest strength. This flight to precious metals is just adding to the general bullishness seen in rare coins. Greater interest in the metals means greater demand for bullion as well as numismatic coins. With all this positive anticipation about the rare coin marketplace, the new year is off and running with many dealers already in Florida for the first major rare coin show of the year. The January 8-11 Florida United Numismatists Convention is expected to have quite an impact on the market as well as providing a window for what is to come in 2004. Auctions taking place in Orlando this week will also play a significant role for those trying to buy select rarities and/or material just to beef up depleted inventories. Dealers are already trying to buy coins in Florida and they expect the stiff competition to force Bids even higher. Dealers know that it takes nice material to satisfy their discriminating customer's needs. They are also trying to buy a few nice pieces just to keep on hand.

Already, early January Bids have pushed key dates to higher ground. These increases are on top of the strong increases that have already been experienced in 2003. Still, the higher prices paid today should prove to be money well spent if the burgeoning demand from an increasing collector base continues to dominate the numismatic landscape. Key dates are experiencing the strongest demand because customers are actively seeking to complete sets of coins that they readily identify with from their youth. That's why the late 19th and early 20th century designs continue to be very popular. Morgan and Peace Dollars only comprise part of the equation as Indian Head Cents, Lincoln Cents, Buffalo Nickels, Mercury Dimes, Standing Liberty Quarters and Walking Liberty Half Dollars are also receiving very strong interest.

This Week's Market

MERCURY DIMES: The strong support we've been reporting for Mercury Dimes remains firmly in place. Solid Bids cover virtually all early issues and grades and the same kind of support is present for the middle and later dates grading MS64 and better.

WALKING LIBERTY HALVES: Some healthy Bid increases are recorded on the Walker chart this week. These advances target select key and high grade semi-key dates, most notably the 1921-S in MS65 which jumped \$5,000 to \$60,000 Bid. The balance of the series remains very solid with buyers available for most issues.

DOLLARS: Morgan Dollars, both keys and commons from the early 1890's forward, are selectively Bid higher as dealers say they desperately need more material. Peace Dollars are selectively higher too. Circulated material is also needed with dealers offering \$475 for quantities of Circulated Peace Dollar sets.

PROOF SETS AND MINT SETS: Proof Sets and Mint Sets have stabilized nicely after the recently reported declines. Both categories are now well supported at current Bid levels with a few better issues moving conservatively higher.

COMMEMORATIVES: Classic Silver and Gold Commemoratives have a couple plus Bids recorded as the category overall remains stable. Dealers are mostly looking for issues grading MS64 and above. Modern Commems are as hot as ever with dealers strongly supporting current Bid for these very popular collector issues.

TYPE: Uncirculated Type has some sizeable Bid advances for select early Silver issues, most notably Draped Bust Dimes but especially Draped Bust, Small Eagle Quarter Dollars. Circulated Type is also active, principally the early material. Bids for 1796 Chain Cent are up in a big way for specimens grading Good through AU. Proof Type is solid with a few plus Bids recorded. Demand for Silver Type remains evident from Half Dimes right through Trade Dollars.

GOLD: Gold Type has been doing quite well along with the rest of the rare coin market even before the Spot price began its strong ascent. But now, demand for U.S. Gold is such that dealers are advancing Bid on a weekly basis in all grade levels. As such we have added two new grade columns - AU58 and MS62 to all of our regular Gold charts.

. . . a Friday morning report on the Coin Market

COIN MARKET REMAINS STRONG

JANUARY 7-10 FUN AUCTIONS TOTAL \$30 MILLION

The Market in Depth

Prior to the first day that the public was to step on the bourse at the Florida United Numismatists show, there was already robust activity with business feverishly taking place. Nothing changed during the next few days as the public wandered the numerous isles at FUN keeping dealers extremely busy for nearly the entire time. It seemed as though just about every dealer in attendance had a successful show with many having their best show ever. However, not all were satisfied by the time the show concluded on January 11. Some went home disappointed that they weren't able to buy more coins. Many agreed that it is definitely a seller's market today and that the competition to buy coins is growing. Successful dealers were forced to pay exceptionally strong money for the coins that they wanted. Unfortunately, dealers had to first find the coins before their competition did as the price would only increase. Dealers are acutely aware that their inventory levels are still dropping as the new year begins, some to the crisis point. It's easy to see why dealers need coins in order to replenish an inventory that is readily selling. They also know that these coins are selling at very strong levels, increasing profits but also increasing the cost of replacement.

We talked with many dealers at FUN and most of them seem to be facing the same problem, as we heard "it's very tough to buy coins" time and again. Most believe that prices are extremely competitive and it takes a dealer with very deep pockets to be able to survive in this numismatic climate. According to dealers, everyone at the show that was selling coins was pricing them most aggressively anticipating even higher prices in the immediate future. One dealer said, "There's an exuberance, as far as dealers are concerned, about the market's future that is giving us confidence that prices will be steadily rising." Pinpointing the strongest segment of this market is not easy because we are seeing generally, across-the-board increases with very few areas of weakness.

FUN Signature and Bullet auctions of coins and currency conducted by Heritage brought a record total exceeding \$30 million. A few of the many highlights from the January 7-10 sales include: 1856 Flying Eagle Cent, S-3, PCGS MS66, \$172,500; 1864-S Liberty Seated Quarter, NGC MS68, \$82,800; 1848 \$2½ Liberty, CAL, NGC MS67, \$161,000; 1875 \$3 Indian, Cameo NGC PR65 \$126,500; 1870-CC, \$20 Liberty, PCGS AU53, \$368,000; and 1884 \$20 Liberty, Cameo, NGC PR66, \$149,500.

This Week's Market

CENTS THRU HALVES: The roll market remains extremely active. Plus signs outnumber the minus by a wide margin. The climb in Silver Spot to \$6.61 per ounce has triggered increases in common date Silver Roosevelt, Washington and Kennedy rolls. Buffalo and Jefferson Nickels are receiving a lot of dealer attention as are select Mercury Dimes. State Quarters are healthy with 1999 Silver Proofs taking super strong Bid increases.

MERCURY DIMES: Mercury Dimes continue as they have in recent months with solid support for most issues maintaining current Bid levels. Particular strength is seen for virtually all issues and grades dated 1928-S and earlier.

WALKING LIBERTY HALVES: Walking Liberty Halves remain strong with dealers still advancing Bid for select issues. Early dates seem to be the focus with the 1917-D, with obverse Mintmark, jumping \$500 to \$5,500 Bid. Dealers tell us that the supply of early dates has dried up.

DOLLARS: Morgan and Peace Dollar Bid advances are targeting two segments of the category. With the recent increases in Silver Bullion, Bids for common date Dollars are higher. The grades most affected are circulated, starting at the VG level. Common Date examples grading MS64 are also higher. Peace Dollars dated 1928 continue increasing with dealers looking to buy examples grading Good through MS63 in quantity.

PROOF SETS AND MINT SETS: Proof and Mint Sets have both recorded some Bid advances, the most notable being the new Bid of \$185 for 1995-S Prestige Proof Sets. Both categories are well supported at current Bid levels.

COMMEMORATIVES: Classic Silver and Gold Commemoratives continue unchanged overall with just a few issues taking some minor plus Bids. The majority of support still favors issues grading MS64 and above.

TYPE: Uncirculated Type is unchanged this week with firm support present from Liberty Cap Large Cents right through Trade Dollars. In Circulated Type, Flowing Hair and Draped Bust Dollars continue to reveal the demand for early Silver as Bid increases cover all three Types in grades Good thru AU. Proof Type remains solid at current levels with no Bid changes to report.

GOLD: Gold Type is very active with common Type issues moving slightly higher and the more numismatic oriented issues taking some moderate to strong Bid jumps. The engine that is propelling these advances, especially in Double Eagles, is of course the Spot market.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coinsight–seen. The coins may be certified or "raw" (uncertified), but the gradingMUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight–unseen market, which already include consideration of certification costs. Bids for a sight–seen "raw" coin may be higher or lower than for a sight–unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder – but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions – you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For all Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer* newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and for the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices - particularly the pre-1941 issues. Washington rolls - dull or "put together" bring lower prices. "Gem full strike" Washington rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker rolls are in the CDN.

Sight-Seen wholesale prices for accurately graded U.S. Coins - Certified or Raw

January 23, 2004

...a Friday morning report on the Coin Market

This Week's Market

Early coins from the late 18th and early 19th century are not easily found in any grade today. Many of the nice pieces have already been removed from the marketplace. A lot of these coins are winding up in strong hands and may be unavailable for years to come. Still, buyers are optimistic that strong Bids and an increasing market may force some of them to the surface. Consequently when they become available, especially those that are well stuck and problem-free with attractive surfaces, they are instantly bought for just about whatever the seller wants. These one-year and two-year Type coins comprise a booming sector of today's market. For example, 1796 Draped Bust Quarters and 1796-97 Draped Bust, Small Eagle Half Dollars are commanding strong support from dealers at today's higher levels. Early Type continues to receive some of the strongest Bids with dealers avidly looking to buy nice examples for their best customers. Premium quality examples of this early material have performed spectacularly. Bust, Liberty Seated and Barber coins are also readily attracting strong Bids. All denominations and grades are generating demand if the coins are pleasing for the grade.

GOLD: Despite the nearly \$20 per ounce decline in Spot Gold this report versus last, Gold Type, with the exception of common Mint State \$20s, is holding relatively steady. There are even some minor plus Bids recorded for circulated \$5 and \$10 Libs.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally - they do not necessarily reflect the level at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** raw coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions - you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer* newsletter.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.									
1986	13.00	13.50	44.00 -	47.00	105.00 -	111.00	215.00 -	235.00	415.00 -	428.00	~ ~ ~ ~	~ ~ ~ ~	MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.	MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

STRONG MARKET AS LONG BEACH BEGINS NEW YORK AUCTION CLAIMS \$4.2 MILLION

The Market in Depth

Dealers are confident that the first major west coast show of the year will be a carbon copy of the first major east coast show of the new year. Dealers that are already in California are very optimistic that the Expo will do really well. There is some mild caution though as Gold and Silver have retreated somewhat off their recent higher levels. However, the fundamentals that pushed these metals to new higher ground are still in place and therefore the bull market in Gold and Silver should continue. Dealers acknowledge that demand for Gold and Silver related coins is still quite strong, even in the face of the somewhat lower Spot prices. Expectations for the show and public auctions held in California are running high because of continued strength in many segments of the rare coin market.

Dealers are in major agreement that demand for most scarce dates is still exceptionally strong. Buyers are eagerly looking to build on the quality coins that they were able to add to their inventories at the FUN show. Yet, the demand is certainly not satisfied and they need more coins to fill want lists and existing orders. Key and semi-key dates are also facing strong demand with a constant flow of new collectors entering the market and removing much of the available supply. Dealers remain challenged because they know that they have established customers still anxiously waiting for this material. Consequently, they have to put these newer buyers behind their established clientele when key date coins become available. Dealers are trying to fill these orders but the price levels for better material starts jumping as soon as it appears on the market. Interest is also increasing for Type coins. There seems to be enough big spenders on the sidelines

waiting to buy better numismatic items and this underlying demand bodes well for the Long Beach Expo and the future 2004 market. Stack's Americana auction that included the WM. Thomas Michael's Collection realized more than \$4.2 million January 20-21 in New York.

This Week's Market

CENTS THRU HALVES: Bids in the roll market are up in select areas. Early and middle date Wheaties are up as are later date Proofs. Jefferson Nickels are selectively advancing all the way through recent Proof issues. Franklin and Kennedy rolls have select plus Bids, especially late date Proofs. Silver 1999 Proof State Quarter rolls are up again, this time **doubling** to \$1,100 Bid.

MERCURY DIMES: All is quiet on the Mercury Dime front, which means no Bid changes. No Bid changes does not constitute weakness as several dealer Bids remain in place willing to buy at current levels.

WALKING LIBERTY HALVES: Walking Liberty Halves continue strong although unchanged this week. Dealer Bids remain focused where they have been, with early issues grading MS63 and above garnering the most attention and the middle to late dates being sought in the Gem grades of MS65 and higher.

DOLLARS: Morgan Dollars continue to move higher with Bid increases still chasing select semi-key and key dates in just about any grade. The 1895 Proof Morgan is still sought triggering another round of plus Bids. Common dates have advanced again in MS63 as have DMPL's of the same grade. Better date Peace Dollars continue to be Bid selectively higher.

PROOF SETS AND MINT SETS: Proof Sets are firm to higher for select issues. Plus Bids are again chasing those elusive 1990 "No S" Proof Sets with Prestige Sets now Bid at \$4,000. Mint Sets are mixed as surprising declines are recorded for earlier material where a couple weeks ago there was strong support.

COMMEMORATIVES: Overall Bid levels for Classic Silver and Gold Commemoratives remain firm. There are a few changes recorded with a couple examples up and a couple down, but nothing particularly noteworthy.

TYPE: Uncirculated and Circulated Type remains as solid as ever, and as we've said, early Type Silver is what's really hot. Along this line, check out the remarkable Bid advances for 1796 Draped Bust Quarters. Advances are posted for examples grading VG thru MS64. Proof Type remains healthy with Proof Silver continuing to be the focus of most dealers.

GOLD: Gold Type is steady overall with a few select Mint State issues moving moderately higher. Saints and Type III \$20 Libs have taken minor declines in a few Circulated grades.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** raw coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions: you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services such as PCGS, NCI, ANACS, NGC and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For latest Bid prices of coins certified by ANACS, NCI, PCGS and NGC, please refer to the *Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" or otherwise superior rolls are worth more than listed prices. In the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "pat" or "pat together" rolls (when available) bring lower prices. "Gem run strike" Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

Don't Let Your Coins Get Lost In A Big Crowd!

WHY SUPERIOR GALLERIES' SALES INCREASED 95% IN THE LAST YEAR!

■ NO RARITY REDUNDANCY

At Superior, your rare coins **will never get lost in a big crowd**. Our boutique coin auctions are limited to often less than 3,000 lots. And, unlike the biggest auction firm which likes to offer multiple tens-of-thousands of rarities all at once, we understand the importance of your individual collection. We want you to get the most for your coins, and **rarity redundancy does absolutely nothing to increase values or competition among bidders**.

■ GUARANTEED AUCTION RESULTS

... Or we pay you! **Superior consistently guarantees the value of your coins at auction**. That's how confident we are in our ability to achieve the maximum for your coins. **We doubt few others can offer a guarantee like this because no one else knows the true value of your coins like Superior**.

■ WEALTHIEST CLIENTELE / BEST VENUES

Superior conducts auctions where the money is. We conduct three major auctions each year in Beverly Hills, two major auctions in Santa Clara, California, with other **auctions held just prior to the most heavily attended coin shows in the U.S.** In fact, Santa Clara is one of the highest per capita areas of those cities located near major coin shows — second only to Beverly Hills!

■ SUPERIOR PRICING

We attend more shows and are consistently the top buyers at all major auctions. We have our finger on the pulse of the market and other dealers know it — that's why we're often asked to evaluate their holdings, too!

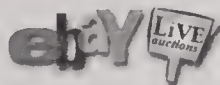

■ SUPERIOR SERVICE

Whether you're a novice or a seasoned veteran, we'll give you the red carpet treatment. We're not in business to rip people off; we want you as a client for life. At Superior, your coins will be given the superior treatment they deserve. Call today and let us show you what we can do for you.

■ GREATEST FINANCIAL BACKING

With the financial support of the Stanford Financial Group — and its more than \$18 billion in managed assets — Superior is clearly at the top of the list when it comes to securing cash advances for your coins. Our interest rates are the lowest in the business, and we consistently offer the lowest auction commission rates in the industry. Call us for more details.

GOLD DIPS BELOW \$400

LONG BEACH AUCTION REALIZES \$9 MILLION

The Market in Depth

Expectations were soaring as the Long Beach Expo began January 29, but as many dealers have come to expect, the precious metals weren't very cooperative. Movement in the metals, either up or down is not vital to the success or failure of a major coin show but it helps. The precipitous one-day drop in the metals markets that pushed Gold below \$400 per ounce was disturbing and sobering while taking the air out of sales. Dealers were somewhat in flux as the new price levels for generic Gold coins were established. Obviously a \$16 per ounce decrease in Spot Gold can have a substantial effect on the trading of common date Gold coins. One Gold bullion specialist said, "the Gold coin market is just taking a breather." This is a market that has been in a continuous upward climb for a few months and it was due for a correction. It was simply an excuse that several players in the market needed to take profits. Gold coins in all denominations participated in the weakness with Bids falling as much as 9 percent. However, the decline was met with very little trading and there was no indication of any distress or panic selling. A few strong buyers came in quickly at the new lower levels not wanting to miss a perceived opportunity.

The overall rare coin market remains powerfully strong. It was tough to buy at Long Beach and those coins that were selling were doing so at strong levels. Some dealers agree that some of the less expensive material was a bit sluggish but this was not the case for five-figure rarities including Proof Gold, which is very much in demand today. Rare dates were noticeably absent at Long Beach and remain in serious demand. For example, one dealer said that he could not find a single 1916-D Mercury Dime in any grade on the bourse floor. Obviously the key and semi-key dates remain extremely hot. Another dealer agreed that the market is off a tad but by no means are there any bargains out there. One said that the hectic pace of the market, coming off the heels of FUN, has made things a bit tough on dealers. The Heritage Signature Sale held in conjunction with the Long Beach Expo realized more than \$9 million. Just one of the many highlights included an 1854-O \$20 Liberty graded PCGS AU50 that brought \$161,000.

This Week's Market

MERCURY DIMES: Uncirculated Winged Liberty Dimes remain strong and stable at current Bid levels. There is lots of underlying support for the series with many dealers looking to buy most pre 1929 issues in grades starting at MS60 with the later issues being sought in grades MS64 and above.

WALKING LIBERTY HALVES: The market for Walking Liberty Half Dollars is on firm ground at current Bid levels. Dealer focus continues on the early dates above MS60 with the middle and later dates sought in grades MS65 and higher.

DOLLARS: Morgan Dollars remain active and robust with the Bid changes to report being those moving higher. Dealers still need better dates and keys, but what's really telling about the strength of the present market, is the ongoing Bid advances for common dates. This week, Bid increases for commons are targeting grades MS64 and MS65.

PROOF SETS AND MINT SETS: Proof Sets and Mint Sets are showing a bit of instability again as Bid decreases outnumber increases almost two-to-one. However the vast majority of issues, particularly Proof Sets, are stable at current Bid levels. An interesting note is the \$100 Bid jump for 1970-S "No S" Dime Proof Sets now Bid at \$1,150.

COMMEMORATIVES: Despite numerous recent auctions offering quantities of Silver and Gold Commemoratives, both segments remain firm at current levels. Modern Commemoratives continue to be active, particularly Gold, with many issues moving to new higher Bid levels.

TYPE: Uncirculated and Circulated Type continue to see healthy demand at current Bid levels. There are eager buyers stacked up and ready to buy select material, especially early Silver. In Proof Type the news is the Bid increases for Proof Bust Dollars which ripped to significantly higher levels in all grades. An example is the \$90,000 increase for specimens grading PR65 which are now Bid at \$300,000.

GOLD: Common \$20 Type III Libs and Saints are showing declines virtually across-the-board as a result of the price slide in Spot Gold. The remainder of Gold Type is mostly unchanged.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen raw coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.									
1986	13.00	13.50	44.00	47.00	103.00	109.00	210.00	230.00	407.00	420.00	~ ~ ~ ~	~ ~ ~ ~	MS60 - Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.	MS63 - Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.	MS64 - Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.	MS65 - Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.	MS66 - Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.	MS67 - Superb: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

BIDS INCREASE FOR KEY DATE RARITIES

GEM WALKERS ACTIVE

The Market in Depth

The rare coin market is still enjoying prosperity as we near mid February. The market has been able to absorb the tens of thousands of auction lots that have appeared over the last month. The strength of demand at current levels is a testament to the lasting power of the current bull market. That is why most dealers agree that we can expect good things going forward in 2004. Interest in the early coinage of all series and denominations continues to make its presence known thru the plus signs found throughout our sheets. We see dealers continually posting higher Bids for coins that are becoming more and more difficult to find. Dealers know that it is tough to maintain an inventory today that is filled with the coins that most collectors are clamoring to own. Better dates and key dates in nearly all series are of particular interest to these serious collectors. Dealers are not shy about increasing their Bid for some of numismatics toughest rarities. The 1796-1797 Draped Bust Half Dollars are a case in point. These dates are on many collector's wish lists. Unfortunately, many collectors are priced out of this market because of the minimum five-figure price tag. However, there are enough serious collector/investors out there today that have both the knowledge and funds necessary to add this super rarity to his or her collection. Dealers today are entertaining a greater number of affluent clients that are more than willing to spend the kind of money that it takes to buy these rarities. The combination of greater numismatic knowledge and sufficient funds is driving Bids to higher levels. In Capped Bust Half Dollars you can see how the slightly better dates are beginning to **separate** themselves from the common. Dealers are increasing Bid for these dates because they have the customers waiting to buy them. Yet while increases are numerous for these slightly better issues, the key, 1838-O Reeded Edge is also increasing in all grades. Similarly the key, 1806 Knob 6, Stemless Claw Draped Bust Half is sporting increases. In Seated Liberty Halves, it's the 1866-S No Motto, 1870-CC and the 1873 Open 3 semi-keys that are receiving higher Bids. Other hot rarities increasing include: the 1794 Flowing Hair Dollar, 1851 and 1852 Original Liberty Seated Dollars, 1878-CC Trade Dollar and the 1796 \$2.50 Capped Bust No Star and Star examples.

This Week's Market

CENTS THRU HALVES: Activity continues for BU and Proof rolls with Wheaties dated 1953-S and earlier selectively moving higher. A few Franklin rolls dated 1954 to 1961 are up as are SMS Kennedy rolls which also have buyers paying higher levels. Washington Quarters, mainly later Proof issues, have a few Bid declines.

MERCURY DIMES: Stable is the word that best characterizes the Mercury Dime series. Buyers are present for the vast majority of dates and Mintmarks in grades above MS63 with many of the earlier pre 1929 issues equally strong in MS60.

WALKING LIBERTY HALVES: Late date Walkers are on the move again as issues grading MS65 and better advance to new higher Bid levels. Early date material remains very solid at current Bid, as are most middle dates in higher grades with a few select issues taking some nice advances.

DOLLARS: There are a number of Bid increases and much support for Morgan Dollars this week. The majority of advances are targeting "CC" Dollars but other scarce dates, some in high grade, are sought too. Commons continue to tick higher, this time in MS64DMPL and MS65. Peace Dollars are solid overall with 1921 issues advancing again in MS64.

PROOF SETS AND MINT SETS: Volatility continues for Proof and Mint Sets with advances and declines about evenly mixed. Better date Prestige Proof Sets have plus Bids and dealers are still pursuing those elusive "No S" Proof Sets, this time the two 1990 varieties.

COMMEMORATIVES: Silver Commemoratives continue steady and a few examples are moving higher as 1923-S Monroe Half Dollars lead the way with examples grading MS66 jumping \$250 to a new Bid of \$5,250. Buyers of Gold Commemoratives are pulling back a bit resulting in less Bid support for this segment of the market.

TYPE: Uncirculated Type is lively with a number of Bid adjustments present. A couple issues are down, but check out the advances for early Bust material. Draped Bust Dollars with Small Eagle reverse are in hot demand with moderate to strong Bid advances covering grades MS60 thru MS65. Capped Bust Quarters are also hot in grades MS63 and MS64. Proof Type is active with buyers present for most Silver Types, and Copper Type has some plus Bids, reinvigorating this segment of the category.

GOLD: The price fluctuations in the Spot market, is causing considerable instability in US Type Gold. There are some sizeable Bid declines recorded this week as dealers try to get a feel for the direction of the Spot market and determine their strategies for the Gold Type market.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-unseen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market – which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" or "choice" rolls are worth more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker angles are in the CD's.

Top prices— Go where those "in the know" go to sell their coins! We buy millions and millions (and millions!) of dollars worth of coins each year from other dealers. Obviously, they're going where they can get the best deal for their coins, and that's why they choose **Spectrum Numismatics**. So should you!

We buy it all— Yes, we're definitely the company to see if you have a complete set of Capped Bust quarters in Gem condition and two Pan-Pac sets in the original frame. But we're also highly interested in the real world, and that includes the 67 assorted silver dollars you've had for years, along with the Mercury dime set missing five dates, the 20 1964 Proof sets and the Trade dollar an ancestor brought back from the Orient. We're interested in hoards, accumulations, portfolios, specialty collections, and every other conceivable coin holding that you can think of.

We buy it NOW— Most transactions with **Spectrum Numismatics** are completed in less than 72 hours (start to finish) and many take place on the same day. If we need to come see you there's a major airport only minutes from our office. If we do the deal by mail, as we do in 80% of the cases, your coins will receive same-day attention upon their arrival. If you make an appointment and come by our offices you'll find our service prompt and our people as agreeable as our prices.

Check us out— Need references? You've got it! Just give us a call and we'll provide you with any information that you might need or want to assure you that **Spectrum Numismatics** is the right choice every time!

Selling your coins to **Spectrum Numismatics** is as easy as one, two, three. In fact, it's even easier than that. Just give us a call, drop us a line or send us an e-mail at JBrushSpectrum@aol.com. We'll take care of the rest.

MARKET REMAINS ON SOLID GROUND

EARLY PROOF SETS JUMP

The Market in Depth

The rare coin market is still sound as we tread through February. However, some slight discounting is taking place as dealers shuffle their inventory and blow out a few coins that have been around too long. The coins that are usually more vulnerable to discounting are often those higher grade Mint State & Proof Type, Silver & Gold Commemoratives and Morgan Dollars. These coins are more liquid than others because of their popularity. They can be quickly and easily sold at lower levels providing a boost to the dealers available funds. Still, strong Bids are being posted for a majority of the series and segments of the market that we report on. Dealers continue to receive orders for a wide range of material from their clients. These buyers are ready to pay serious money for high quality coins. They don't mind **stretching** to pay for a coin that has better than average eye appeal or a better than average strike. Also, attractively toned coins are able to command huge premiums above what is normally paid for a coin in the same grade without nice toning. It is also obvious that dealers have not satisfied their quench for key dates. These coins have continued to move higher despite already making significant gains last year and in the early part of this year. Dealers know that obtaining the keys is an exciting aspect of collecting for the collector. Dealers have told us that they have a number of buyers waiting for a lot of the tough dates. That is why dealers are extremely busy during the first few hours of any show. They need to be fast and lucky if they are to come away from the show with the better material for their clients. They also need to understand the market direction and be able to stay on top of prices so that they can Bid competitively.

Gold and Silver appear to have broken out of their profit taking mode. Bullish momentum for the metals is definitely a plus for the coin market. Interest in bullion usually adds some interest for numismatic coins as well. Buyers of bullion often add a rare coin or two to their portfolios. In this optimistic climate, dealers expect the remainder of February to be better than OK and look forward to more of the same for March.

This Week's Market

MERCURY DIMES: Bidding for Mercury Dimes may be at a point of equilibrium. This doesn't necessarily mean that plus signs won't be seen but it does mean that dealers are content with their Bids at the current levels.

WALKING LIBERTY HALVES: Walking Liberty Halves continue to enjoy strong Bidding from dealers. The early and middle dates remain very difficult to locate but dealers have not given up in their search to find a few. Several dealers continue to post strong Bids for late dates in MS65-MS67.

DOLLARS: We see some discounting occurring for select Morgans but that doesn't change the overall picture of this series. Demand continues unabated for the better dates and most generics. Take note that common dates in MS63 are down \$1 to a Bid of \$31. Still, increased Bids are occurring for select rarities of this popular series. Peace Dollars are also susceptible to some discounting this week.

PROOF SETS AND MINT SETS: Early Proof Sets are powering higher this week. These are some of the most sought-after sets and also among the most difficult to find. Dealers are hoping that the strong Bidding will shake some loose. Mint Sets are rather steady this week following last week's volatility.

COMMEMORATIVES: Several minus signs are seen within the classic Silver and Gold Commemorative columns. Most minor downward adjustments are from dealers lowering their prices in an attempt to raise funds. Modern Commems are receiving strong Bidding competition at current levels with dealers willing to pay even more for needed material. More attention is being paid to original sets with several buyers paying Bid or more for most 2-coin thru 32-coin sets. Silver, Platinum and Gold American Eagles have increased, benefiting from the higher Spot levels.

TYPE: Some minor Bid declines are seen in Mint State Type but the overall market for Type is still super. Early Type is especially in demand for both Circulated and Uncirculated specimens. Proof Type is higher in several areas from Lincoln Cents to Liberty Seated and Walking Liberty Half Dollars.

GOLD: A higher Spot usually means greater interest and plus signs for Mint State Gold. However, a market lag occurs when the activity and volatility are especially great. So, we see some minus signs for several denominations of Gold in MS62 thru MS64 as the market plays catch-up. Still, MS64 High Reliefs and \$20 Liberty Type III Bids are higher than last weeks.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.														
1986	13.00	13.50	45.00	48.00	106.00	112.00	211.00	230.00	419.00	432.00	~ ~ ~	~ ~ ~	MS60--Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck. MS63--Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins. MS64--Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible MS65--Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal. MS67--Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date. *Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

VOLATILITY IN PRECIOUS METALS

MILLION DOLLAR+ TRADE DOLLAR CHANGES HANDS

The Market in Depth

This Week's Market

The precious metal's market continues to be extremely volatile. In recent days, Gold has fallen below the \$400 per ounce benchmark and Silver also suffered a rather precipitous decline of its own. Each has since sustained a rebound but dealers remain nervous. Still, those dealers that deal in bullion related and common date numismatic Gold are not that much concerned. They believe that this market is just going thru some profit taking and these dealers, along with several Silver and Gold analysts believe that the bull market is still intact. They don't see too many of their customers looking to unload with panic selling, however they do find that some prudent buyers are using declines as a buying opportunity. Some dealers have told us that they are a bit cautious and willing to sell some coins to maintain their liquidity during these times. Still, we know that they are willing to pay for select coins and dates as they become available. For example, Legend Numismatics seized an opportunity to buy and sell a classic rarity in February. They bought the second finest known 1885 Trade Dollar and resold it for "significantly more than \$1 million."

The market's resilience is remarkable with dealers still willing to post bold sight-seen Bids for rarities that are definitely in short supply. The DMPL Morgan Dollar market is a primary example of this strength. Many of these Morgan Dollar DMPL dates are spending long periods of time on want lists without being filled. Dealers know that transactions are waiting to occur and so they are trying to facilitate the completion via higher Bids. However, bold Bids in and of themselves don't necessarily guarantee success but it may just shake something loose. That's what dealers are hoping to obtain with these new higher Bids. Dealers would at least like to try to find some of these tough want list coins for their patient customers. Similarly, there are many other areas of the market facing the same strong demand for scarce dates. Buyers are just waiting for an opportunity to latch on to some of these desirable rare coins. Many of these buyers are convinced that this market, even at these levels, offers them an attractive form of diversification for their portfolios. They also know that these rarities can provide them with years of enjoyment instead of just appearing as a dollar balance in stock or financial savings accounts.

CENTS THRU HALVES: Lots of action in BU Rolls this week with 1953-S and earlier Wheat Cents again being pushed to higher Bid levels. Roosevelt Dimes are also being Bid selectively higher. 1954-S and earlier Franklins are up as are SMS Kennedy Halves.

MERCURY DIMES: Bids for Mercury Dimes are very firm at current levels. Dealers are buyers at current Bid for a wide range of dates and grades.

WALKING LIBERTY HALVES: Walkers are on solid ground after the hectic activity of the last couple weeks. Bids for the early dates are strong in most grades, and the middle and late dates are still sought for issues grading MS65 and finer with a few issues Bid a bit higher.

DOLLARS: Morgan Dollar popularity continues to amaze. Last week we mentioned some discounting, this week Bids are increasing and chasing, in some cases aggressively, "CC" Dollars and semi-key and key date issues in a host of different grades. Bids for commons in MS63 have reversed from last week and are also up in MS65 and MS66. Also sought are key, semi-key and common date DMPL dollars. Peace Dollars are in the mix too with Bids selectively advancing with dealer focus on the keys.

PROOF SETS AND MINT SETS: Proof Sets are steady to higher this week with Bid increases mainly focused on better date material. Mint Sets are also stable with a few later issues taking some minor Bid advances.

COMMEMORATIVES: The Silver Commemoratives category has rebounded nicely after last week's downward adjustments. Many dates and grades are up outnumbering last week's declines, proving that there is still considerable demand for these classic issues. Gold Commemoratives are unchanged versus last week.

TYPE: Bid levels for Uncirculated and Circulated Type are rock solid. Much support is present, especially in the Uncirculated segment, with a few issues moving nicely higher. Check out the new Bid of \$66,000 for 1796 Draped Bust Quarters grading MS64 as early Silver continues in strong demand. Proof Type is firm at current Bid levels after last week's select advances.

GOLD: Bids for Type Gold are lightly mixed this week as the Spot market remains volatile dropping more than \$11 since last week's report. Issues most effected are naturally the bullion influenced Types. You will see however, slight Bid increases for select denominations grading AU58 and MS60 and also High Relief Saints grading MS65.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen "raw"** coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. proudly presents the

RICHMOND COLLECTION

A Sale in Three Parts

DLRC Auctions has been selected to sell one of the greatest collections of certified United States coins ever assembled. With over 3,600 coins, the comprehensive Richmond Collection includes dozens of coins rarely offered for public sale, such as the finest-known 1894-S Dime, the extraordinary 1927-D St. Gaudens \$20, and the 1885 Trade Dollar.

The spectacular Richmond Collection is one of the most exciting offerings to come to market since Eliasberg, and may never be duplicated in its scope and completion.

The first sale of U.S. Gold coins takes place this summer in mid-town Manhattan in conjunction with the inaugural New York Invitational Show. Limited-edition hardcover catalogs of the first sale are available this spring for \$50.

"The Absolute Fairest Prices Possible!"

"I wanted to thank you once again for all of your hard work in getting me the absolute fairest prices possible for my coins. Your integrity renewed my hopes for the numismatist field. I would not hesitate to refer anyone to you: in fact, I would most certainly encourage them! I hope you and your family have a wonderful weekend. With gratitude and respect."

FAMED GEORGIA GOLD COLLECTION CHANGES HANDS

The Market in Depth

This Week's Market

Dealers are still singing the praises of a good, healthy rare coin market. March is certainly coming in like a lion when you're talking about rare coins. An added boost came March 1st when Spot Silver traded at a six year high of \$7.03 and platinum settled at a 24-year high of \$906. We are also convinced that February was a banner month, especially in light of the 1885 Trade Dollar deal that we mentioned in the last report. However, we just learned of an even more spectacular transaction that took place in February. From early to mid February, Bob Harwell of Hancock & Harwell Rare Coins and Jeff Garrett of Mid American Rare Coin Galleries bought and re-sold the famed Duke's Creek Collection of Georgia Gold. Garrett said, "47 out of 63 coins in this collection are either the finest known or tied for the finest known". All the coins have been graded and encapsulated by NGC. They paid in excess of \$3 million for the entire collection. Subsequently, in the Territorial Gold portion, eight coins have been re-sold for more than \$1 Million to Territorial Gold specialist Donald Kagin. It is highlighted by the AU53 \$10 Templeton Reid, the dated variety, by far the finest in private hands. The Dahlonge Mint portion of the collection was sold to rare Gold coin expert Casey Noxon of Texas Numismatic Investments for more than \$2 million. We understand that all these coins are earmarked for collectors specializing in those areas. It is becoming more apparent that higher Bids, to a degree, are responsible for rarities hitting the market. This market has increased a great deal in the past few years and as a result, we are beginning to see exceptional rarities surfacing. When collectors complete their goals, they are more willing to sell knowing that a handsome profit is also waiting. If this trend continues for the balance of the year, it may end up being one of the most memorable years for rare coins.

The second week of March is expected to be busy as dealers will be traveling to shows and viewing important auction lots. American Numismatic Rarities will conduct an auction featuring the Haig A. Koshkarian collection on March 9-10 in Baltimore. Next, Bowers and Merena will host the sale of Dr. Robert W. Swan & Rod Sweet collections on March 11-13 in Baltimore. The Bowers and Merena auction will be held in conjunction with the Baltimore Coin & Currency Convention March 12-14 in Maryland. Strong expectations are already being heard for this show because of its track record, excellent location and given the fabulous state of the current rare coin market.

MERCURY DIMES: Bid levels for Mercury Dimes remain as they have been – rock solid. There continues to be demand bubbling just below the surface for this series, just not quite enough yet to move Bid levels higher.

WALKING LIBERTY HALVES: Bids for early Walkers are being pushed higher for select dates and grades. Virtually all these increases are for the scarcer branch Mint issues with dealers hoping that stronger Bids will bring some of these elusive issues to market.

DOLLARS: It appears the collecting public can't get enough of the wildly popular Morgan Dollar series and that is forcing dealers to, yet again, advance Bid for select material. Better date DMPL Dollars are hotly sought, triggering many plus signs. Also, dealers continue pursuing select "CC", semi-key and key date issues. Common date Dollars grading MS63 have advanced again this week and MS65 generics are slightly higher with a new Bid of \$96. Peace Dollars remain stable at current levels.

PROOF SETS AND MINT SETS: Proof and Mint Sets continue steady overall with just a few upward Bid changes, the most notable being the 20% higher Bid of \$60 for 1992-S Prestige Sets. The single declining issue is the 1970-S "No S" Dime Proof Set, now Bid at \$1,100.

COMMEMORATIVES: Classic Silver Commemoratives continue to move selectively higher which in turn is buoying the entire category. Numerous plus Bids dot the chart and whether there is a plus sign or not, many dealers are ready to buy at or near current levels. Gold Commemoratives remain unchanged. Modern Commemoratives are red hot. Dealers are strongly supporting or pushing Bid levels higher for virtually all segments of the Modern Commem Market. This is especially true for Modern Gold Commemoratives.

TYPE: Uncirculated and Circulated Type continues strong and steady. Dealers are buyers for the vast majority of issues at current Bid levels and are apparently pleased, for the moment, with the results that current Bid prices are producing. Proof Type has some activity this week in the Copper segment with Lincoln Cents grading PR64 taking a healthy jump. Also, Two Cent pieces in colors Brown through Red grading PR63 are Bid higher while the remainder of the Proof Type category is firm and unchanged.

GOLD: Gold Type continues to be adversely affected by Spot Gold's price dip below the \$400 per ounce level. The market for U.S. Gold has softened, this is particularly true for \$20 Liberties and Saints. However, a look at the chart will reveal that bullion sensitive \$5 and \$10 Gold grading MS62 is also in retreat.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coinsight-seen The coins may be certified or "raw" (uncertified), but the gradingMUST ADHEREto the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

May be the worst possible example shows no wear or damage. Will be bagmarked and/or weakly struck.	MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

SPECTRUM NUMISMATIC AUCTIONS

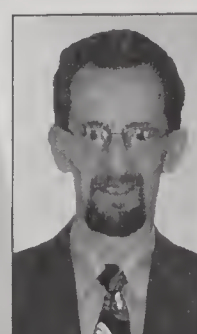

Bowers & Merena, the premier coin auction company, has joined Teletrade® and Kingswood® to form Spectrum Numismatic Auctions, a dynamic new group of auction houses which provide a broad choice for discerning coin collectors who wish to realize the best possible prices, as well as enjoy the highest service, expertise and dependability.

Bowers and Merena Auctions has been in the forefront of the public auction arena for decades. Whether your collection is worth \$5,000, \$50,000 or more than \$500,000, the same expertise that showcased the world's most valuable collections will showcase your coins to their fullest advantage.

Auction veteran Stephen Deeds has been appointed President of Bowers and Merena Auctions and will lead the California and Louisiana offices. Mr. Deeds, whose numismatic career spans four decades, previously directed numismatic auctions for Superior Galleries in Beverly Hills, California.

Mark Borkardt joined the firm in June 1989 as Senior Numismatist. He is well known for his technical expertise and general knowledge of all aspects of United States coinage. Mark has been a contributor to the cataloguing of all important Bowers and Merena auctions since joining the firm.

And now our affiliation with Spectrum Numismatic Auctions provides us with the most important and largest list of collectors who will be made aware of the sale of your coins through our public auctions and on the internet.

Bowers and Merena has sold four out of the five largest coin collections ever sold at public auction, including the top two. Bowers and Merena was the first coin firm to sell a coin for over \$1,000,000! Of the 17 highest prices realized by a rare coin at public auction, Bowers and Merena is responsible for nine of them. Bowers and Merena has handled every date and mint mark issue produced by the United States Mint and all its branches.

Bowers and Merena was the official auctioneer for the 2003 American Numismatic Association Convention in Baltimore and their auction realized over \$11,000,000. The Bowers and Merena auction, in conjunction with the Baltimore Coin & Currency Convention on December 5 & 6, realized over \$4,000,000.

So call us today at 800.458.4646 and take advantage of this new force in the coin auction arena. It may well be the most financially rewarding decision you could make.

HEAVY BUYING EXPECTED IN BALTIMORE

KEYS CONTINUE TO LEAD MARKET

The Market in Depth

With only two weeks in, dealers are expecting March to be a terrific month. They know that shows, auctions and travel are very much apart of this month's agenda. Still, they are most interested in buying coins for their customers and for their much depleted inventories. Dealers continue to be optimistic that the higher prices appearing at public auction and also by way of Bids on the electronic dealer trading networks, will bring more coins to the marketplace. In many respects this has already been proven to be true but dealers are in need of **much** more material. Interest for select coins continues unabated. In response, dealers that have raised their Bids in an effort to buy coins and are continuing to do so nearly week after week. We know that they have orders waiting to be completed and it is their hope that the higher Bids will prove to be successful. However despite their best efforts, it remains to be seen whether success will happen this month or in future months.

This strong demand for rare coins will accompany many a dealer that will be attending the Baltimore Coin & Currency Convention March 12-14 in Maryland. These dealers, with client want lists in hand are hoping to find a nice selection of material and will make a valiant effort to buy coins in Baltimore. They expect the price levels to be strong and so they are prepared to pay (almost) whatever it takes to be able to come home with some prizes. The show appears to be receiving an added and unexpected boost from the recent rebound of the precious metals. The metal's market has been extremely volatile and so some dealers may take a wait and see attitude. Still if Gold holds above \$400 per ounce and Silver over \$7 it will definitely help get the public out and in good spirits. Indeed, the general price levels are getting stronger as we see dealers willing to push Bids ever higher for material they need. Demand for the semi-key and key dates of all series is very apparent today. They are receiving strong Bids in all Circulated and Uncirculated grades, as you can see in the March *Quarterly* and *Monthly Supplement*. Many of today's buyers are those that didn't own the keys when they collected several years ago but they certainly can afford them today. Dealers recognize this demand and continue to work hard in hopes of finding the coins that their customers mostly want – the keys.

This Week's Market

CENTS THRU HALVES: The Roll market is a hive of activity as dealers go after better date material. Demand seeks better Wheat Cents to Jefferson Nickels and Roosevelt Dimes of the 1940's and 1950's. Better date Washington Quarters and Franklin Halves are also sought and the same is true for Kennedy Halves, particularly the Proof issues. State Quarter Rolls are selectively higher with 2000 P and D South Carolina issues realizing healthy increases.

MERCURY DIMES: Mercury Dime Bid prices remain firm and unchanged. The underlying demand mentioned in previous commentary is still present and is the major factor contributing to the health of the series.

WALKING LIBERTY HALVES: Walkers are steady this week after last week's select advances. The early dates remain firm in most grades, the middle dates are solid for examples grading MS65 and finer. The later dates are not quite as strong as they have been recently, however transactions are occurring between the spreads.

DOLLARS: Dealer demand continues to chase the keys and "CCs" in a wide range of grades. Bids for some common date Circs have advanced as a result of Spot Silver increasing. But the focus this week is on DMPL Dollars. Moderate to strong increases blanket the DMPL chart as dealers attempt to supply an increasing and more sophisticated collector base.

PROOF SETS AND MINT SETS: Volatility has crept back into the Proof Set market as a wide range of issues take Bid declines. However, 1995-S and 1996-S Prestige Proof Sets have both taken strong Bid jumps. Mint Sets are steady to higher.

COMMEMORATIVES: Significant demand for Classic Silver Commemoratives continues to maintain current Bid levels. Gold Commemoratives, although unchanged, currently has fewer Bidders vying for these issues.

TYPE: Uncirculated Type remains very popular with collectors, as such; dealers continue to maintain current Bid prices in an attempt to score some pieces at current levels. However, as has been the case for some time, demand for early Silver continues to push Bids higher for select issues as is the case this week with Capped Bust Quarters. Proof Type, as we've come to expect, is quite strong. Dealers are ready buyers for the vast majority of issues at or near current Bid levels.

GOLD: Bid levels for Gold Type have steadied after recent volatility. There are a few Bid changes, in both directions, but this is mainly contained to numismatic oriented material. Common \$20 Libs and Saints are relatively firm and unchanged this week.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** raw coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BOWERS AND MERENA

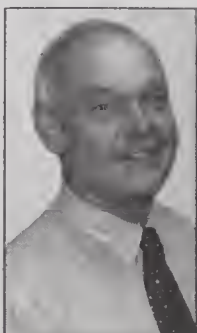

Joins

SPECTRUM NUMISMATIC AUCTIONS

Bowers & Merena, the premier coin auction company, has joined Teletrade® and Kingswood® to form **Spectrum Numismatic Auctions**, a dynamic new group of auction houses which provide a broad choice for discerning coin collectors who wish to realize the best possible prices, as well as enjoy the highest service, expertise and dependability.

Bowers and Merena Auctions has been in the forefront of the public auction arena for decades. Whether your collection is worth \$5,000, \$50,000 or more than \$500,000, the same expertise that showcased the world's most valuable collections will showcase your coins to their fullest advantage.

Auction veteran Stephen Deeds has been appointed President of Bowers and Merena Auctions and will lead the California and Louisiana offices. Mr. Deeds, whose numismatic career spans four decades, previously directed numismatic auctions for Superior Galleries in Beverly Hills, California.

Mark Borckardt joined the firm in June 1989 as Senior Numismatist. He is well known for his technical expertise and general knowledge of all aspects of United States coinage. Mark has been a contributor to the cataloging of all important Bowers and Merena auctions since joining the firm.

And now our affiliation with Spectrum Numismatic Auctions provides us with the most important and largest list of collectors who will be made aware of the sale of your coins through our public auctions and on the internet.

Bowers and Merena has sold four out of the five largest coin collections ever sold at public auction, including the top two. Bowers and Merena was the first coin firm to sell a coin for over \$1,000,000! Of the 17 highest prices realized by a rare coin at public auction, Bowers and Merena is responsible for nine of them. Bowers and Merena has handled every date and mint mark issue produced by the United States Mint and all its branches.

Bowers and Merena was the official auctioneer for the 2003 American Numismatic Association Convention in Baltimore and their auction realized over \$11,000,000. The Bowers and Merena auction, in conjunction with the Baltimore Coin & Currency Convention on December 5 & 6, realized over \$4,000,000.

So call us today at **800.458.4646** and take advantage of this new force in the coin auction arena. It may well be the most financially rewarding decision you could make.

STRONG MARKET FOR EARLY COINAGE

1880 COILED HAIR STELLA REALIZES \$379,500

The Market in Depth

Buying coins was to be expected in Baltimore and buying coins is exactly what dealers did. They told us that price levels were very strong, a continued sign of a healthy market. Transactions taking place at Baltimore were the key to dealers having a successful show, and many of them that we spoke with agreed that the Baltimore Coin & Currency Convention was a success. They alluded to the show's strong activity level as also being an important factor. The public was out in force on Friday and Saturday and that helped dealers generate strong retail sales. One east coast dealer said that this market is so strong because "the coins are really being taken off the market." This is in reference to the strength of collector/investor demand and their financial ability to put away rare coins for an extended period of time. You can see by the number of plus signs reported this week that dealers still need additional material to meet their customer demand. Notice also that demand is diversified into **several** areas of the market. Inventory depletion is another issue facing dealers today. Yet another dealer at Baltimore said that the **early** coinage market is still hot. He said that a collection of early Type coinage was easily dispersed on the bourse, at strong prices. Coins from the late 18th and early 19th century are especially sought-after today. All denominations are needed among this group of rare coins. Any "Small Eagle" Type was realizing strong demand and strong prices from dealers. However, it was also said that buying was extremely competitive for key date Walking Liberty Half Dollars and Barber Quarters as well. It was further reported that retail sales were strong for Morgan Dollars, Silver Commemoratives (especially those with attractive, original color), better date Lincoln Cents and Buffalo Nickels, Proof Sets, Mint Sets and Proof Type. It all adds up to a diverse market that remains pretty healthy with no significant signs of weakness, although it was noted that generic Gold was somewhat soft at Baltimore. Dealers said that \$20 Saints were trading at lower levels than they had at the Long Beach Expo, just over a month ago. Bowers and Merena offered the Dr. Robert W. Swan & Rod Sweet Collections March 11-13 in conjunction with the Baltimore show. That auction realized more than \$6.2 million. One highlight, an extremely rare Proof 61 1880 \$4 Coiled Hair Stella sold for \$379,500.

This Week's Market

MERCURY DIMES: Bid has jumped higher for the ever popular 1916-D issue in grades MS60 thru MS64. This is the first move higher in some time. Bid levels for Mercury Dimes overall continue strong and steady.

WALKING LIBERTY HALVES: There's almost always something going on in Walkers. This week strong plus Bids are in place for most early dates, primarily in grades AU and MS60. There are also some advances for select mid and late date issues in the middle grade ranges.

DOLLARS: Further demand continues to push Bids selectively higher for both Morgan and Peace Dollars. Plus Bids scatter the chart but one thing is evident, dealers are after the good stuff. "CC's", keys, semi-keys, condition rarities and even a few commons, it's all needed. DMPL Dollars, which some believe are undervalued, are in their 4th week of broad advances.

PROOF SETS AND MINT SETS: As quickly as volatility crept into the Proof Set market last week it's gone. There are select advances throughout the chart with the 1996-S Prestige Set taking another nice jump. A notable \$300 increase is recorded for 1990 "No S" Prestige Sets now Bid at \$5,000. Mint Sets look solid with a few issues advancing nicely.

COMMEMORATIVES: Classic Silver Commemoratives continue showing remarkable resiliency and demand at current Bid levels with a number of issues moving slightly higher. The inverse is true for Gold Commemoratives as they remain unchanged. Conversely, Modern Commems remain a hotbed of competition as collectors, mostly new, pull strongly on the supply channel forcing dealers to Bid aggressively for fresh material.

TYPE: Both Uncirculated and Circulated Type remain very solid. Early Silver continues to be the focus of many dealers as Bids are pushed higher for Flowing Hair and Draped Bust, Small Eagle, Half Dollars in Circulated condition. Proof Type remains rock solid overall. Dealers are seeking Proof Morgan Dollars, rounding out the demand for this series as they push Bid higher in grades PR63 thru PR65.

GOLD: For the last couple of weeks Spot Gold has been hovering around the \$400 per ounce level. As such, Mint State U.S. Gold Type has been relatively steady at current Bid levels. In Circulated grades however the market is mixed. \$20 Gold in VF and XF have adjusted downward narrowing the numismatic premium relative to bullion. On the other hand, select Types of \$2½, \$5 and \$10 Gold are moving fractionally higher.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coinsight-seen The coins may be certified or "raw" (uncertified), but the gradingMUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

. . . a Friday morning report on the Coin Market

MARKET SOLID AS PORTLAND ANA OPENS

SUPPLIES CONTINUE TO DRY UP

The Market in Depth

Financial market activity taking place around the world today may be characterized as being extremely nervous. Some markets have even sustained precipitous decreases in reaction to the increased tension worldwide. The war against terrorism is taking its toll, both here and abroad, but the American rare coin market continues to prosper. It is also an atmosphere conducive to increases in Gold and Silver bullion that provides an added push for the coin market. Plus signs continue to appear throughout our Bid columns as dealers increase their buy offers for select coins. These dealers are still receiving orders for coins and in many cases they are receiving multiple orders. Unfortunately for most dealers, filling these orders has become a difficult problem. That's because many of these coins have already been taken off the market by collectors. Collectible coins are in stronger hands today and the supply is drying up. Therefore, dealers are trying to entice them to sell with stronger Bids. Still many of the collectors are unwilling to sell their coins, even though they can make a profit by doing so. This demand/supply imbalance just puts added pressure on price. Dealers are expecting prices to go higher unless some holders of these coins change their minds and offer their material at current levels. This is the state of the market as dealers head to Portland, Oregon to attend the ANA's National Money Show March 26-28.

Dealers are getting more aggressive as they try to buy select rarities. Morgan & Peace Dollars, Mint State Type, Proof Type and Silver Commems all are experiencing increasing demand. Early coinage is also needed as dealers continue to post strong Bids for these coins. No problem, attractive early Circulated Type is realizing super demand and dealers have many clients waiting to add a few to their collections. However, key dates continue to appear at the

top of the list when it comes to collector needs. Inventory levels of keys have been severely depleted and replacing them has been next to impossible.

Stack's held an auction featuring the Adelphi Collection March 16-17 in New York. The sale realized more than \$2.8 million.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

This Week's Market

CENTS THRU HALVES: Bids for Jefferson Nickels have selectively increased, certainly influenced by the new Nickel bearing the peace medal design on the reverse. A few dealers are offering them \$2.75 a roll with buyers seen at \$2.50. Roosevelt Dimes, Washington Quarters, Franklin and Kennedy Halves are also selectively advancing, certainly resultant of the increase in Spot Silver. Pure demand is driving many State Quarters issues slightly higher.

MERCURY DIMES: Bid advances are again recorded for Merces as dealers seek better material. Last week it was 1916-D Dimes, this week it's a few better date issues with Full Bands. This series remains very solid at current Bid levels.

WALKING LIBERTY HALVES: The early and mid dates in the Walker series is where demand is concentrated lately. Last week revealed much demand by way of numerous Bid advances. This demand remains in place as Bids increase for 1921-S issues grading AU thru MS64.

DOLLARS: Consistent Bid advances are becoming the norm for Morgan Dollars, and to a lesser degree Peace Dollars as collectors and dealers continue their persistent drive for more material. What is being sought covers all demographics of the category which ranges from common high grade material to better dates and select rarities. Dealer focus on Dollars has not changed much, the only thing changing regularly are the market driven Bid prices.

PROOF SETS AND MINT SETS: Volatility is back with a vengeance in the Proof Set market. Some early issues have advanced, but issues dated 1968 forward are mostly down. One area remaining stable are issues dated 1993 thru 1998. Mint Sets are comparatively solid at current levels.

COMMEMORATIVES: Considering the amount of material released on the market so far this year, Classic Silver Commemoratives remain very steady with some dealers continuing to selectively raise Bid. This demonstrates that significant demand continues to exist for these issues. Demand for Gold Commemoratives remains rather lackluster but Bid continues to hold at current levels.

TYPE: Uncirculated and Circulated Type remain strong at current Bid levels. Further evidence of the demand for early Silver we've been reporting is in the Bid increases for Draped Bust Dimes grading AU thru MS65. Proof Type continues strong as usual with ready buyers at current Bid for most issues and Types.

GOLD: Demand for U.S. Gold Type is again gaining traction; a natural result of the \$18 per ounce increase in Spot Gold versus last week's report. Most obvious are the Bid increases for common \$20 Gold in grades MS62 thru MS64. Other areas are up too; \$3 Gold has selectively increased as have High Relief Saints.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise interior rolls are worth less than listed prices. In the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices. "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "bands" rolls are worth more than listed prices - particularly the pre-1941 issues. Washington rolls - dull or "put together" bring lower prices. Gem full strike Washington rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

...a Friday morning report on the Coin Market

COLLECTOR DEMAND REMAINS POWERFUL ACTIVITY BRISK AT PORTLAND ANA

The Market in Depth

Dealers attending the Portland American Numismatic Association's National Money show, for the most part were not disappointed. The dealers that we spoke with agreed that public attendance was more than adequate and "business was brisk." The ANA's strong publicity campaign for the show in the Portland area helped to get the word out and the public in. Also, an increasing Spot seen for the precious metals, primarily Silver, had many local area people coming to the coin show to find out the value of their material. Still, there were some noticeable absentees at the show. One dealer said that Portland is a tough haul for east coast dealers and the ANA's Sunday stay requirement makes it even more difficult. Overall, dealers were "very happy" with the results of their show. They were able to both buy and sell rare coins in this very healthy market that shows no sign of letting up. Dealers remain encouraged that the collector base is still expanding and that these new collector/investors are busy focusing on their numismatic goals. The Portland ANA 2004 Signature Auction by Heritage on March 25-27 realized \$7,561,983. The next stop on the show circuit for many dealers will be the Santa Clara Expo held April 2-4 in California.

April begins with demand for coins in evidence throughout the market. Some areas are doing better than others but most are realizing steady and strong demand. Dealers continue to work their customer want lists by attending shows, participating in public auctions and posting Bids on the electronic dealer trading networks. We find early coinage to be among several areas that are receiving strong interest from collectors. Flowing Hair and Bust coinage are hot items with dealers finding it very difficult to locate nice examples. Interest is especially keen at public auction where the competition for these coins can be rather fierce. Dealers that specialize in this area agree that the biggest problem facing them is replenishing their stock. Prices have been jumping as dealers sometimes watch in amazement at the many battles that take place at auction for this material. This is especially true when it comes to the very scarce issues. First year of issue coins of all denominations continue to generate excitement both at auction and on the bourse. We see steady supporting Bids for these coins. However, it is not uncommon to also see jump Bids for this material.

This Week's Market

MERCURY DIMES: Winged Liberty Dimes are firm and unchanged as we begin April. This series continues to show significant underlying demand, which has been growing over the past several months.

WALKING LIBERTY HALVES: Demand for Walking Liberty Half Dollars is shifting. Earlier this year and most of last, Bid increases mainly targeted the short-set dates of 1941 thru 1947, but this demand is now waning. Increases occurred in the earlier dates, but less frequently. Now dealers are focused on dates 1916 thru 1929 in most Uncirculated grades, and 1933 thru 1939 in Gem condition.

DOLLARS: The constant march to higher ground continues for Morgan Dollars. Dealers are relentless in advancing Bid which is driven by collector demand as material of all caliber continues to be needed. A new focus is emerging within Dollars and it's on DMPL Dollars. Dealers have been bumping Bid regularly for this material testing the levels that will bring some to market. Proof Silver American Eagles are extremely active with several dealers pushing Bids higher, as much as 20% for some dates.

PROOF SETS AND MINT SETS: Proof Set Bids are firm overall with a number of issues moving marginally higher. It's been a wild ride for Proof Sets lately and it's hard to tell what will happen next. By contrast, Mint Sets have and continue to be relatively steady.

COMMEMORATIVES: Classic Silver and Gold Commemoratives are unchanged for the most part with ready buyers at or near current Bid levels. This is particularly true for Silver Commemoratives which have demonstrated remarkable resiliency and demand since the first of the year. Modern Commemoratives remain very much in demand and the firm to increasing Bid prices reflect this strength. Collectors want this material and dealers are competing to buy it.

TYPE: Uncirculated and Circulated Type remains strong and unchanged this week. A review of the category reveals a continued bias toward Silver Type. Copper and Nickel Type issues have their ardent supporters which accounts for solid Bids but Silver presently, has broader appeal. Bid levels for Proof Type remain unchanged this week with solid demand present for the vast majority of issues.

GOLD: Spot Gold is virtually unchanged versus last week's report as US Gold Type continues to creep higher. Dealers are being cautious, they want to be ready for increased demand but they don't want to get hung. They are carefully advancing Bid for what they know they can turn and the Bid columns below reflect this strategy.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified) but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally. They do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market which already include consideration of certification costs. Bids for a sight-seen raw coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions. you should expect to pay a premium above Ask when purchasing coins in a retail transaction. you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

(may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

Offers Over 250 Years of Numismatic Experience

Q. DAVID BOWERS

50 years in numismatics

By consigning to American Numismatic Rarities, you can take advantage of one of the finest and best known numismatists of our time, Q. David Bowers. Dave has catalogued and auctioneered many of the most valuable collections ever assembled, including the Eliasberg, Norweb, Childs, Bass and Garrett family collections.

Additionally, Dave has served as president of both the American Numismatic Association and the Professional Numismatists Guild. He has written hundreds of numismatic auction catalogues and over 40 books, mostly on rare coins, and he has received many awards for his writing, as well as honors for his dedication to the hobby.

AS COIN AUCTIONEERS IN A COMPETITIVE BUSINESS, one of our most powerful assets is the satisfaction of our consignors and our bidders. In our dynamic careers we have worked with hundreds of consignors and are proud of the relationships we have built and the excellent results we have been able to attain.

. . .a Friday morning report on the Coin Market

GOLD IN DEMAND AT SANTA CLARA EXPO

GENERIC MS65 MORGANS BID \$100

The Market in Depth

The rare coin market seems to take turns when it comes to the current leaders, but the one thing that remains constant is its overall trend. Increases via Bidding on the electronic dealer networks, and at auction, are commonplace this year same as they were last year. The bull market rages on into spring with new dealers competing with existing dealers for fresh material. Dealers are always looking to buy when they attend coin shows and the recently completed Santa Clara Expo facilitated this activity. Unfortunately, some dealers told us that they didn't buy a lot because of the strong asking prices and there wasn't much new stuff available. Generic Gold of all denominations was hot, to say the least in Santa Clara. Buyers were out in force accumulating as much of this material as quickly as they could. It was a time when Gold spot was soaring and buyers didn't want to be left behind. The volatility in the spot Gold and Silver markets aren't for the faint of heart and we expect that volatility will continue. Spot Silver, for example, has shot from \$7 an ounce right thru \$8 in the last 30 days. Demand for rare coins becomes supercharged with sharply increasing spot prices.

The overall market is still "very good" according to dealers. Circulated and Mint State Type issues are extremely strong with Bids increasing as collector/investors line up waiting to buy. Dealers have been increasing their Bids hoping to acquire this material for their customers. Problem-free circulated Type is what they are looking to buy and they are willing to pay strong money to obtain it. Proof Type is equally strong with gem Proof 65 and better Barber coins especially sought-after. Attractive Proof Barber coins with eye appeal are realizing exceptional prices at public auction and on the bourse. Morgan Dollar must be considered to be, arguably, the number one series with Bids

climbing each week. Generic MS65 examples are now Bid \$100. The Santa Clara Elite Coin Auction conducted by Superior realized nearly \$2.2 million. See a few highlights to the left.

This Week's Market

CENTS THRU HALVES: The BU and Proof Roll market continues to be very active. Much of this action is driven by increases in Spot Silver as common Silver Dime, Quarter and Half Dollar Rolls are Bid higher. Collector demand is driving select Lincoln Cents, Jefferson Nickels, Clad Roosevelt Dimes and Washington Quarters to higher Bid levels too.

MERCURY DIMES: Strength persists for Mercury Dimes as Bids remain firm and unchanged. The underlying demand we've been commenting on is still present, and dealers appear quite comfortable with Bid levels as they are.

WALKING LIBERTY HALVES: Demand for Walkers continues as it has with interest primarily focused on earlier material in most grades, and middle date material in high grade. Not surprisingly though, is a re-focus of dealer attention on short set dates 1941 thru 1947, as select issues in Gem grades have been bumped slightly higher.

DOLLARS: The continued advance in Spot Silver is reflected in Bids for common Morgan and Peace Dollars in low grades. In both series, strong demand remains for key, semi key, high grade commons and of course Carson City Morgans. Dealers are in hot pursuit of DMPL Morgans as a plethora of dates move higher.

PROOF SETS AND MINT SETS: Proof Sets are again stable this week with a handful of better issues moving up a bit. Mint Sets remain relatively active with transactions occurring within the Bid/Ask range. The U.S. Mint is now selling 2004 State Quarter Silver Proof Sets for \$23.95 while 2003 10-piece Silver Proof Sets remain available for \$8 more.

COMMEMORATIVES: Classic Silver and Gold Commemoratives are mostly holding firm with no advances to report.

TYPE: Both Uncirculated and Circulated Type are on a run this week. Contrary to previous activity, Bid increases for Uncirculated Type are focused not only on Silver but Copper Type as well. Bid increases cover the gamut from early Copper and Silver right through Liberty Seated material in Circulated condition. Plus signs are dispersed throughout the Proof Type columns as dealers conservatively and selectively edge Bid higher in this remarkably strong area.

GOLD: Bids for U.S. Gold Type have moved higher for several issues. Dealers continue to be cautious, but also seem to feel that current Spot prices justify a bit more confidence thus triggering Bid increases for select U.S. Gold.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services such as PCGS, NC1, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For the Bid prices of coins certified by ANACS, NC1, PCGS and NGC please refer to the *Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls are worth more. In the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices - particularly the pre-1941 issues. Washington rolls - dull or "pat together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

RICHMOND COLLECTION

Part I | US Gold

DLRC Auctions is proud to present the spectacular Richmond Collection—the most complete collection of United States coins to come to market since the sale of the Eliasberg coins.

The first sale, comprised of U.S. Gold coins, takes place on the evenings of July 22 and 23 at Manhattan's Grand Hyatt, in conjunction with the New York Invitational Coin Show.

The Richmond Collection Part I contains a nearly complete set of U.S. Gold coins from \$1 to \$20, including a four-piece set of Stellas.

At right is only a small sampling of the outstanding coins in this collection.

Limited-edition hardcover catalogs of the first sale are available in May for \$50. Reserve your copy today.

Visit www.davidlawrence.com/richmond for complete lot descriptions and images of every coin in Richmond Collection, Part I—U.S. Gold.

HIGH BIDS ARE NO GUARANTEE
MORGAN DOLLARS STILL RISING

The Market in DepthThis Week's Market

Mid-April finds the rare coin market as powerful as it has been all year. We all know that it has been a very good year for numismatics. Demand for rare coins is reaching its boiling point. Dealers are continually forced to increase thcir Bid in the hopes of buying fresh material. A scenario that features a dwindling supply and a growing customer base, which is keeping dealers plenty busy and very concerned. They tell us that it remains extremely difficult when it comes to buying. It appears that more collectors are out there buying coins and just putting them away. Price increases, especially significant ones, have not even persuaded these collector/investors to offer their rare coins on the marketplace. Many of these collectors are not as interested in the quick profit but rather they enjoy the challenge and appreciation of their coin portfolios. Dealers are frustrated and as they continue to do business it becomes more evident that higher prices are expected and necessary to secure these coins. To many, posting the **highest** Bid is extremely important as it should at least prompt some phone calls. However, dealers have seen their high Bids pass by with few calls and even fewer coins for their efforts. The demand is growing with Morgan Dollars and early Walking Liberty Half Dollars competing for the top series this week. Dollars have been hot all year and amazingly, generic Morgans continue to post impressive gains. Imagine, MS65 common date Morgans are up another 11 percent to \$111 Bid. Quantities are needed and it's not just one or two dealers trying to buy. Several dealers are out there looking to buy generic Dollars **in quantity**. Rarities, of all series and denominations, constitute a significant portion of the demand today. We have seen interest growing for everything from early coinage to key and semi-key dates. This interest is as strong today as we have seen it throughout 2004. We know that today's new collectors are more knowledgeable and they demand the rare dates just as seasoned collectors have for many years. The plus signs that dominate the early Walkers are a perfect example of this demand. Series that have a popular design along with many rarities and challenges become extremely desirable to collectors. Many of these collectors already have the short-set dates and it's time to move on to an even greater challenge. On April 21 Stack's will conclude its mail Bid sale. This sale includes U.S. coins along with ancient and modern world coins.

MERCURY DIMES: Mercury Dimes continue to move down a strong and steady path. There are no Bid changes but dealers are trying to buy just about anything at current Bid for the early dates. They are also seeking higher grade and Full Split Band issues dated after 1929.

WALKING LIBERTY HALVES: Big moves target select dates of early Walkers. 1921-S specimens grading MS64 for example, have jumped \$3,000 to a new Bid of \$34,000. Dealers are targeting grades MS63 thru MS65. Middle and late dates continue to draw attention too. 1934-D examples are now Bid \$825 in MS65 which is a 10% increase from last week.

DOLLARS: It's an understatement to say Silver Dollars are hot. With MS65 generic Morgans now Bid at \$111 and the same material solidly advancing in grades MS64 thru MS67, it is obvious that Dollars are on fire. Peace Dollars are in the mix too and in no small way. Dealers continue searching in both series for better and key date material in assorted grades; however, grade is increasingly becoming a secondary consideration to rarity.

PROOF SETS AND MINT SETS: Proof and Mint Sets are again drawing Bid increases for select better date issues. Both categories appear more stable lately with dealer trades taking place at or near current Bid.

COMMEMORATIVES: Bids are unchanged this week for Classic Silver and Gold Commemoratives. As has been the case lately, the Silver segment shows more demand than does Gold, which is curious considering the relative strength of Gold coinage in other areas of the market. Demand for Modern Commemoratives is amazing as Bid increases dot the chart for both Silver and Gold material. Be advised, if you don't see a plus sign there are still ready buyers for the balance of the category at current Bid. Platinum American Eagles are up in a big way with Spot Platinum trading at \$935.50 per ounce.

TYPE: Uncirculated and Circulated Type is solid after last week's run-up with no Bid changes to report. These same Type issues are still sought and dealers are now waiting to see if the Bid prices set last week will bring forth some badly needed material. Proof Type was very strong last week with numerous issues taking Bid advances. This strength remains present with a couple issues even moving higher.

GOLD: Spot Gold is up almost \$5 per ounce this week versus last week's report. Gold Type is moving higher too, although guardedly and selectively. The one area in the category that dealers appear most confident in is High Relief Saints, which have shown gains in various grades, in 12 of the last 16 weeks.

It's no secret quality coins deliver premium prices for consignors at auction. To attain astronomical prices, however, you must attract a captive audience with the desire and, more importantly, the money to buy them.

At Superior Galleries, we consistently realize higher prices at auction than any other coin auction company because we follow this simple but proven formula. Quality coins attract top buyers willing (and able) to buy coins above their current market value.

1893-S MORGAN AMONG NEVADA HOARD

NGC CERTIFIES SPECIMEN 65 GRANT WITH STAR HALF

The Market in Depth

Dealers have been asking for fresh material for as long as the bull rally in rare coins has been occurring. Many of these dealers are interested in buying Silver Dollars because the Morgan Dollar is arguably the most frequently asked for rare coin. One dealer told me that Dollars and Gold are what the coin market is all about. With all this demand continuing to overhang the market, Santa Barbara, California dealer Ronald J. Gillio announced that he bought a hoard that included tens of thousands of Silver Dollars. He purchased the hoard from the Fitzgerald heirs, owners of the Nevada Club that closed in 1997. These coins have remained un-searched and off the market for four decades in a Nevada warehouse. The big question that dealers are asking is, "What's in the hoard?" Gillio said that there are original Uncirculated bags of Morgan and Peace Dollars. At least one solid date 1887 Morgan Dollar bag is in the group. He also found mixed bags containing Circulated and Uncirculated Dollars. A spot check of an Uncirculated bag revealed MS63, MS64 and some MS65 examples. However, he expects other Uncirculated grades to come out of this hoard including MS66 and possibly higher. Further he says, "There is a good size quantity of all the different Mints in BU." Any rare dates? "One bag that I spread out included a Good 1893-S as well as two or three Circulated CCs" Gillio said. These coins are slated to be certified and graded by NGC. Also, Gillio added that the real fun will begin when these Dollars are examined for their VAM variety. Many dealers remember searching through bank rolls of coins in the early 1960s and so they can only imagine what will be uncovered from this hoard from Nevada.

NGC has certified and authenticated a 1922 Grant Memorial Commem Half Dollar with a Specimen 65 striking. It is believed to be unique and has a distinctive Satin Finish. Four Matte Proof examples are already recognized.

The overall rare coin market continues to push higher with select Silver Commems, Morgan & Peace Dollars, Mint State & Proof Type, Mercury Dimes and Walking Liberty Half Dollars participating. Dealers need coins because they have outstanding orders waiting to be filled. They also have inventories that remain sorely depleted. May continues to be a good month for the market.

This Week's Market

CENTS THRU HALVES: Nickels are hot! Increased Bids are seen for common date Buffalo and select Jefferson rolls. The always popular 1950-D is now \$400 Bid. State Quarter rolls are still attracting Bidders as well with several issues advancing this week.

MERCURY DIMES: Bidders are actively willing to support the current level for most of the Mercury Dime series. Increases are seen for the key, 1916-D with plus signs for MS64 FB and MS65 FB Dimes.

WALKING LIBERTY HALVES: Plus signs are occurring for select MS65 Walking Liberty Half Dollars. A few early date four-figure coins are in demand as are a few common late dates. Generally the market for Walkers is very strong.

DOLLARS: Circulated Carson City Dollars are difficult to locate and so Bid pushes higher. Better date Dollars are realizing super demand with dealers holding rarities in the driver's seat. Generic MS63 Morgans are up slightly to \$35 Bid. Peace Dollars are generating some noise of their own with select dates moving higher.

PROOF SETS AND MINT SETS: Proof Sets are mostly stable with some increases for select Prestige Sets. The 1990 "No S" Prestige Set is now \$5,500 Bid. Mint Sets are solid with select sets up as dealers look to buy sets that represent good value. It's mostly the odd years that are increasing with the 1973, 1993, 1995, 1997 and 1999 Mint Sets all higher this week.

COMMEMORATIVES: The big news in Silver Commemoratives is the slabbing of the Satin Finish 1922 Grant Memorial with Star Half Dollar receiving an NGC Specimen 65 grade. Maybe this find will entice others to take a closer look at their Grant Commems. Dealers target Silver Commems in AU and MS60 with higher Bids. Many of these Commems seem to represent an excellent value at these levels. Gold Commems are quiet though Bidding support is evident.

TYPE: Dealers are in need of quality Type and they are willing to pay strong money to buy. Increases are occurring for select Liberty Seated, Barber and Standing Liberty Quarters in Mint State condition. Nickels are hot in Proof Type with 3-Cent Nickels, Shield Nickels and Liberty Nickels all displaying higher Bids.

GOLD: Mint State Gold Type is generally mixed with several bullion sensitive issues declining in grades up to MS62. However, the popular \$20 High Relief is up in MS63 and the \$10 Liberty with Motto is up slightly in MS62. Dealers have yet to see any major unloading of Gold at current levels.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight–seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen** "raw" coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer–to–Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

MORGAN DOLLARS ARE NUMBER ONE

ACTIVE MARKET CAN BE COSTLY

The Market in Depth

The rare coin market continues to prosper despite its precipitous climb for many months without any significant profit taking. However, not all collector/investors, and even some dealers are aware of the higher Bids. One dealer said that if you don't keep on top of this fast paced market, you may suffer needless losses. Bids are moving so quickly that, for example, you may sell a key date for \$500 less than you could have received from another dealer. Check this week's Bids for MS64FB and MS65FB 1916-D Mercury Dimes.

Several dealers have returned from the Las Vegas Invitational Coin Show and are pleased after completing a successful show. They said that the market continues to be very stable with steady demand evident in several areas. Dealers continue to fill want list needs for their customers. Collectors are buying rare coins and these coins are being removed from the supply pool of available coins. We hear that many of these coins are going into collections that will be tied up for many years to come. Today's sophisticated collectors are buying coins from early Half Cents and Half Dimes thru rare date Gold. They are actively examining population reports and exploring their collecting options with advice from knowledgeable dealers. One midwestern dealer said the average age of his new collectors is 59. This baby boomer demand is significant because it represents affluent collectors unafraid to spend huge sums for the coins they admired many years ago. That's why the 1913 Liberty Nickel could command the \$3 million and that's why there was additional Bidders actively approaching that level.

The "hottest" most in demand item at the Vegas show was the Morgan Dollar. Carson City and Deep Mirror Prooflikes are changing hands at higher levels nearly as often as they appear. Of course, the publicity surrounding the purchase of the Nevada hoard has only added more fuel to an overheated market. Most dealers will be heading to California to participate in the public auctions and the June 3-5 Long Beach Expo. Set-up day on June 2 should also prove to be active. However, some are not expecting "blockbuster" shows because astute dealers may choose to hold back funds in order to Bid on the tremendous number of auction lots hitting the market over the next several days. Rather, they expect dealers will "pick and choose" carefully on the bourse floor.

This Week's Market

MERCURY DIMES: Plus signs are displayed for several tough dates with Full Split Bands. Along with the 1916-D, the 1917-D, 1921 and 1924-S are realizing higher Bids this week.

WALKING LIBERTY HALVES: Several serious collectors have undertaken the difficult task of completing Walker sets by date in Uncirculated condition. It is tough to find all the early dates and it is equally tough to match a quality set. Support continues to be seen throughout the series.

DOLLARS: Morgan Dollars are still one of the hottest series in today's market and they are also among the hottest in demand at shows. We see that the demand for many areas of this series remains unsatisfied. Carson City, New Orleans, generics, DMPLs and better dates are selling as quickly as they are offered. Buyers are gladly willing to pay Ask for this material in many instances. Pre-1921 generic MS65s are now Bid \$118, a level not seen since December 1991. Peace Dollar demand has also been evident with generic MS65s now at \$124 Bid.

PROOF SETS AND MINT SETS: Proof Sets weakened this week as some discounted sets remain available, overhanging the market. Increases may be put on hold until this group is dispersed. The lone increase is for 1984-S Prestige Proof Sets. Strong supporting Bids remain in place for many Proof Sets, especially the early sets. Mint Sets are generally receiving supporting Bids except for a few late date sets suffering decreases.

COMMEMORATIVES: Silver Commemoratives are generally steady with a few increases taking place. The 1928 Hawaiian Sesquicentennial has buyers interested in MS63 and MS64 examples at higher levels. Another tough issue, the Lafayette Dollar is also higher in MS65. Classic Gold Commems remain steady. \$10 Modern Gold Commems are down with BU and Proof examples participating. Increases are seen among Modern Silver Dollar Commems from 1990 thru 2001 in BU and Proof.

TYPE: The Type market is generally quiet although we know that several dealers are out there willing to buy these coins at current Bid levels. Dealers have buyers for Type and they know that these coins can quickly sell once they find them. The upcoming Long Beach Expo should provide a nice supply to those dealers looking for Type.

GOLD: A number of minus signs are crowding the Mint State Gold columns this week. Weakness is evident in many denominations from \$2.50 thru \$20 in grades from MS62 thru MS65. This weakness is seen despite the \$6 increase in Gold Spot.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS63-Choice BU: Brilliant Unc. (may exhibit some toning), but it should not be so dark as to hide any problems; will have minor bagmarks and may show weakness of strike. Above average coins.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

*Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

DOLLARS, TYPE & WALKERS DOMINATE BUSY LONG BEACH EXPO EXPECTED

The Market in Depth

June begins with dealers feeling very optimistic about the rare coin market. They know that it is difficult to buy coins and so they expect to stretch a bit when it comes to Bidding. That is just what we are seeing this week, an extremely busy week in the rare coin market. Two southern California auctions are still in progress as this is being written and immediately after these sales, dealers will head just a bit south to the Long Beach Expo. Interest for coins is running high as the collector base is still expanding, although not as fast as it had been earlier in the year. Still, solid demand is present and this demand can do wonders to buoy prices, even at the higher levels that they have attained during the first five months of the year. Expectations for the Long Beach Expo are still very good and especially if Gold holds at, or near its current level. Some dealers have noticed a definite surge in interest as Gold, once again, approaches the \$400 per ounce benchmark. Dealers also know that the southern California area is rich, containing a strong collector/investor base. This too can make for an excellent show.

Morgan Dollars have been among the strongest segments of the overall market for quite some time now. We see by the current Bids that this trend is continuing. The sheer number of multiple dealers Bidding against each other is a testament to the strength of the current Dollar market. It's not as if one or two dealers are jumping the Bid and others need to decide whether to match or increase that Bid. Instead, we are seeing several dealers increasing Bids to buy the select Dollars that they need to fill orders. One east coast dealer not making the trip to Long Beach said, "The market is pretty strong." He sees interest for coins in several series. Morgan Dollars are, of course, the number one mentioned series. However, Peace Dollars are also beginning to participate more and more with Bidders becoming more bold. Type and Walkers are also receiving an honorable mention. The objective for dealers though is to keep their liquidity strong. This is important because it puts dealers in a better position to buy deals when they're offered and/or to be able to stretch to buy select coins at the show and/or auctions. Dealers will begin buying and selling coins on dealer set-up day and hopefully, after the show's conclusion, come home with some interesting rare coins for their efforts.

This Week's Market

CENTS THRU HALVES: The roll market continues to impress as higher Bids are being placed on much needed material. Nickels and Half Dollars have been the two most active denominations, although this week a number of early Roosevelt rolls are higher.

MERCURY DIMES: Key dates are in demand throughout the entire coin market and the Mercury Dimes series is no different. The 1916-D is still being pushed to higher levels in hopes of luring some to market and away from tight collector hands. 1931-S Dimes are also higher in grades MS64FB and MS65FB.

WALKING LIBERTY HALVES: Dealers are still in need of the tough **early** dates for their clients who are building quality sets. Paying more than the next dealer is a good strategy, but being the highest buyer with a market presence is even better if one is to be successful in acquiring this scarce material.

DOLLARS: Morgan Dollars remain on fire, with stronger Bids being placed daily. The entire segment is in demand from common to rare. Generics are now Bid: \$120 in MS65; \$312 in MS66 and \$865 in MS67. Peace Dollars are also extremely active with MS66 common dates now at \$450 Bid.

PROOF SETS AND MINT SETS: Bids for early Proof Sets remain rock solid from 1936 thru 1973-S. Less can be said for regular Proof Sets dated from 1974 thru 1992 as many of these are currently available for lower levels. 1990 "no S" Proof Sets are higher with dealers needing quantities. Mint Sets are generally healthy except for a few late date sets that dropped a bit.

COMMEMORATIVES: Classic Silver Commemoratives have been full of activity these past several weeks and this report is much of the same. This area of the market remains bright, even though there are a couple more declining issues than advancing.

TYPE: Dealers have many new clients building Circulated, Uncirculated and Proof Type sets. Several higher Bids have been posted by dealers with the intent of fulfilling their growing customer want lists. All areas of Type remain strong with the most activity found for Silver coinage.

GOLD: Mint State Gold Type is slightly mixed as High Reliefs edge higher and select issues move a hint lower. This mixed activity is seen even as Gold Spot moved up \$9 from last week to settle at \$394.50 an ounce.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight–seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen "raw"** coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCL, ANACS, NGC and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCL, PCGS and NGC, please refer to the *Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices - particularly the pre-1941 issues. Washington rolls - dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

Realize the most money for your coins by dealing with world-class rare coin experts who have unlimited financial resources.

Sell Us Your Coins!

Top prices— Go where those "in the know" go to sell their coins! We buy millions and millions (and millions!) of dollars worth of coins each year from other dealers. Obviously, they're going where they can get the best deal for their coins, and that's why they choose **Spectrum Numismatics**. So should you!

We buy it all— Yes, we're definitely the company to see if you have a complete set of Capped Bust quarters in Gem condition and two Pan-Pac sets in the original frame. But we're also highly interested in the real world, and that includes the 67 assorted silver dollars you've had for years, along with the Mercury dime set missing five dates, the 20 1964 Proof sets and the Trade dollar an ancestor brought back from the Orient. We're interested in hoards, accumulations, portfolios, specialty collections, and every other conceivable coin holding that you can think of.

We buy it NOW— Most transactions with **Spectrum Numismatics** are completed in less than 72 hours (start to finish) and many take place on the same day. If we need to come see you there's a major airport only minutes from our office. If we do the deal by mail, as we do in 80% of the cases, your coins will receive same-day attention upon their arrival. If you make an appointment and come by our offices you'll find our service prompt and our people as agreeable as our prices.

Check us out— Need references? You've got it! Just give us a call and we'll provide you with any information that you might need or want to assure you that **Spectrum Numismatics** is the right choice every time!

Selling your coins to **Spectrum Numismatics** is as easy as one, two, three. In fact, it's even easier than that. Just give us a call, drop us a line or send us an e-mail at **JBrushSpectrum@aol.com**. We'll take care of the rest.

...a Friday morning report on the Coin Market

NO SIGN OF MARKET SOFTENING LONG BEACH BOURSE WAS ACTIVE & UPBEAT

The Market in Depth

Many dealers that attended the Long Beach Expo and public auctions associated with this major west-coast show anticipated a solid market. It wasn't surprising that most dealers that we talked with said that they had an excellent show. Still, some of the dealers said that even though they expected the market to be strong they wouldn't have been surprised if things softened somewhat. All markets need to take a breather once in a while. However even these dealers went home without ever seeing that softening materialize. There just isn't any sign of a market slowdown. Instead the show was generally active and upbeat. A lot of dealers attended the Long Beach Expo to buy coins and there was quite a bit of buying (and selling) taking place on the bourse. Dealers told us that they were able to find coins to buy and this was very satisfying. However, they also told us that the price levels that they had to pay were somewhat higher than they had anticipated. Obviously they anticipated strong levels, but prices were even higher. There just seemed to be very few bargains out there with one dealer commenting, "Everything is strong including generic Gold." All the signs still point towards a continuing, expanding customer base. There are many customers out there still waiting to buy rare coins. This **unsatisfied** demand continues to propel the market forward.

Proof Gold, according to at least one astute dealer, was the hottest part of the market at the show. There seems to be several "eager buyers" on the sidelines waiting to buy Proof Gold. Unfortunately there is not enough available supply at the moment to satisfy this special demand. Another dealer told us that it was easy to blow out coins (at Long Beach) that have been sitting in the back of his vault for too long a period of time. These coins were also receiving top Bids on the bourse and dealers were very happy with these sales. In many cases even these back-of-the-vault coins sold for levels that represented a significant profit. Those fortunate enough to have an inventory of attractive coins with eye appeal were in the driver's seat. These coins found serious demand at the show as these dealers came home with the sales to prove it. Type coins, key dates, Morgan Dollars and Proof Gold were often mentioned as doing very well.

This Week's Market

MERCURY DIMES: Mercury Dimes continue to enjoy a number of supporting Bids with a few issues moving higher as dealers seek these for their customers. Increases are targeting a couple of tough early dates. The 1919-S is up in MS64 and MS65, both need to exhibit Full Split Bands. The key, 1921-D is up in gem MS65 to \$2,300 Bid.

WALKING LIBERTY HALVES: The Walking Liberty Half Dollar series is another popular area of the market that is experiencing strong demand. The tough to find 1917-S Reverse, although much more available than the Obverse variety in this grade, is now up to \$2,800 Bid in MS64.

DOLLARS: What can we say about Morgan Dollars besides **sensational!** Key dates, generics, DMPLs and Carson City Mints are all attracting serious demand from many dealers. There appears to be a growing number of collectors beginning with this series and enough sustained demand from the more advanced collector/investors still looking for dates to keep Bids strong. Generic Morgans are higher in MS64, MS65 and MS66. Key dates moving up include: the 1883-S, now Bid \$2,000 in MS63 while the tough 1894 Philadelphia jumped to \$1,200 in XF.

PROOF SETS AND MINT SETS: Overall the Proof Set market is mixed. Early dates from 1936 thru 1974 are steady with even a couple of increases. The middle dates from 1975 thru 1991 are soft with quantities being offered at lower levels. Mint Sets are generally steady with just a couple of late date sets declining.

COMMEMORATIVES: Silver Commems have been showing more life of late. Several plus signs are seen this week with MS63 being the popular grade. Gold Commemoratives are very stable at current levels. Modern Commems are generally strong with the exception of some generic Gold issues. The \$5 BU Jackie Robinson is now Bid \$1,650. Increases are also occurring among BU and Proof Silver Dollars. Coin and Currency sets are strong as the Lewis & Clark sets hit the after market at \$125 Bid / \$140 Ask.

TYPE: Type, like Morgan Dollars is among the most heavily sought-after portion of the market. Dealers have customers waiting to get their hands on attractive, interesting Type coins. Examples that are fresh and relatively problem-free are commanding "stupid" money.

GOLD: Gold Type is experiencing some significant demand for several four- and five-figure issues this week. Serious money is out there and available for nice coins and it is obvious from these Bids that select Gold Type is in demand.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally - they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen raw** coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

NO VACATION FOR THE COIN MARKET

COMMEMS, DOLLARS & HIGH RELIEFS EXTREMELY ACTIVE

The Market in Depth

We are already well into mid-June and the rare coin market hasn't slowed down at all. Dealers are rather amazed at its continued strength and growth. They usually expect the market to slow down considerably at this time of year as people take vacations, attend graduations, do home improvements, and attend religious and family events. Dealers also plan accordingly with many taking time off in the weeks prior to or shortly after the ANA Money Show. Yet, the market is not slow and instead we see strong demand forcing dealers to increase their Bids. Collectors, investors and dealers all continue to be excited about the market. However, some have become slightly disappointed because they haven't been able to buy all the coins that they want.

Demand for key dates has not let up in the least. Many a dealer is looking to load-up on the keys. We are learning that several collector/investors aren't necessarily happy with just buying one or two. Rather, there is demand from a select group that is looking to buy key dates by the roll. Dealers tell us that these buyers are disgusted with the recent returns of their investments in the stock market and would rather put their money in rare coins. Dealers are chagrined at the task at hand that includes buying key dates in roll quantity. It is difficult enough for them to locate and buy a **single** key date here and there, let alone several. Consequently, Bids continue to move higher as dealers try to increase their ability to be successful in their quest for material. This scenario is why most dealers continue to be optimistic about the market for the balance of 2004. They are encouraged that demand is continuing to maintain its strength, but they are concerned about satisfying it. Original, fresh coins are badly needed and highly sought-after. Sophisticated collector/investors are chasing select material and they need nice, no-problem coins for the grade. They also want coins with attractive eye appeal and nice color if they can get it. Brilliant white coins are also desirable on most Silver issues. Rainbow toning, exceptional strike and eye appeal are at the top of the special demand list. It is tough enough to find nice material to buy, but when you include these additional requirements it becomes especially difficult.

This Week's Market

CENTS THRU HALVES: Late date Buffalo and early date Jefferson Nickel rolls are highly sought-after. Dealers are anticipating greater demand for Nickels as the new circulating Lewis & Clark Commemorative Nickel becomes mainstream in daily commerce. Some better date Franklin rolls are also higher, led by the key, 1949-S at \$1,800 Bid.

MERCURY DIMES: Supporting Bids dominate the Mercury Dime series as dealers are still looking to buy the better dates in quantity. Be sure to notice the \$100 increase for 1926-D examples in MS65 Full Band.

WALKING LIBERTY HALVES: Early Walking Liberty Half Dollars are hot. Strong demand for these select dates by collector/investors has forced the issue. Dealers are trying to fill this demand and the Bid increases hope to be their solution. Key and semi-key dates are in dire need with buyers mostly looking for MS63 and better grades.

DOLLARS: Last week we described the Morgan Dollar market as being sensational. If we could think of a better adjective for this week's activity we would use it. Several areas of the Morgan Dollar market are participating as Bids move ever higher. Key and semi-key dates are up from Circulated thru Gem condition. Dealers want quantity of this material and they are willing to pay up to get it. Increases are also found for select Peace Dollars grading MS66.

PROOF SETS AND MINT SETS: Proof Sets and Mint Sets are relatively quiet. We no longer see quantities being offered at Bid. Instead, more supporting Bids are being seen at current levels. We see that a few better Prestige Proof Sets are pushing a bit higher.

COMMEMORATIVES: An explosion of Bids for Silver Commems are seen this week. Dealers are targeting the low-end of the market as they believe these issues to be seriously undervalued. Gold Commems are lackluster with a few issues being discounted.

TYPE: Early Half Dimes from 1794 thru 1805 are generally higher in AU thru MS64. These four- and five-figure coins have buyers waiting to take possession. Increases are also seen for MS63 Capped Bust, Reeded Edge Halves and Trade Dollars. Proof Type is steady at current levels.

GOLD: Strong demand for High Reliefs is present, capped by the \$6,000 increase in Bid to \$100,000 for MS67 examples. Other popular Gold issues advancing include: Type II Gold Dollars, \$2.50 Indians and \$5 Liberty with Motto issues.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight–seen**. The coins may be certified or “raw” (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen** “raw” coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer–to–Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For the Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the Certified Coin Dealer newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. M5-65 singles may be found in the MONTHLY SUPPLEMENT: Mercury & Walker singles are in the CDN

BULL MARKET RAGES AS SUMMER BEGINS DEALERS ACTIVELY SEARCH FOR BETTER MATERIAL

The Market in Depth

The coin market is simply cruising through June with strong demand evident in many areas. The market is also getting good news from the precious metal's arena as Gold and Silver have come off their lows. Gold is now back above \$390 per ounce and Silver is trading near \$5.85 per ounce. Of course the increasing metals also bodes well with the coin market, not that it needed any help. Still, it doesn't hurt to get that little boost that comes from new investors buying Gold and Silver bullion. The strong demand that is being experienced throughout the market includes the numerous want list coins that dealers still need to fill. Many of the dates needed are not so easy to find because of their rarity and because they remain impounded in collections. Still, increased Bids have a way of changing the attitudes of the present owners and sometimes the lock on these coins will open. That is what we believe many dealers are trying to do with their week-after-week diet of increased Bids. They tell us that the demand for select dates and mintmarks is relentlessly trying to be satisfied. Collector/investors are viewing their collections frequently and it is the missing examples that really bother them. These are well-heeled collectors who are bold enough to offer strong money to fill the holes. Still, strong Bids don't always get the job done and long time collectors know that it takes patience, as well as money to be successful. Coin collecting is not about speed but about the careful examination and study of each individual rare coin. This study has been responsible for the discovery of many a rare variety and error coins and this study also provides much of the enjoyment.

Consequently, the market has retained its strength as we begin the summer season. The bull market seems to be resistant to the normal slower periods that usually define this time of year. Collector/investors know what they want and they are continuing to push forward in an effort to be successful. This kind of market atmosphere should prove to be very optimistic as we plow thru summer and approach the American Numismatic Association's annual convention extravaganza. Meanwhile, dealers remain focused as they try to buy the elusive issues that their customers continue to demand.

This Week's Market

MERCURY DIMES: Buyers are still available at Bid for the majority of dates from 1916 thru 1928-S in all Uncirculated grades. Later dates are also needed with Full Split Bands in Mint State 64 and higher. Of course the key dates remain in serious demand for just about any condition.

WALKING LIBERTY HALVES: Last week's Bid increases for early Walkers were mostly unsuccessful in bringing material to market. So, dealers have raised Bid once again for many early dates in MS64 and MS65 in the hopes of triggering some transactions. The action in the short-set dates has quieted down quite a bit as of late.

DOLLARS: Morgan key dates, CCs, better dates and DMPLs are all up as we have almost come to expect with increases occurring week-in and week-out. Select Peace Dollars are also higher with the 1921 High Relief now Bid \$600 in MS64. Modern Clad Dollars are also active as 1999 Proof SBAs move up to \$8.50 Bid and Sacagaweas dated 2001 move up to \$3 Bid.

PROOF SETS AND MINT SETS: A few minor increases are seen for select Proof Sets with the remaining issues steady at current Bid levels. It was a case of "money talks" as the Atlanta auction of 5,000 unopened Proof Sets from 1952-57 was canceled with the hoard being sold to a collector just prior to the Expo. Mint Sets are steady overall with only a couple of tiny declines occurring for 2000 and 2003 sets.

COMMEMORATIVES: Silver Commems remain very active after last week's barrage of increases for lower grade material in the XF thru MS60 range. Buyers are still anxious for this material and have also raised a number of Bids in higher grades. The Hawaiian Sesquicentennial is now Bid \$1,800 in MS63 and \$2,500 in MS64. Gold Commems tell a different story as more declining issues are recorded.

TYPE: Circulated, Proof, and Mint State Type all continue to shine from the demand that simply will not let-up. In today's market, any material that is clean, problem-free and accurately graded can be sold rather quickly. Large premiums are being paid for Type coins that are at the top-end of their grade category, attractively toned or bright and lustrous.

GOLD: Bids for Gold Type are somewhat mixed as Gold Spot continues to teeter-totter, down \$10 one week and up \$10 the next. One thing is for certain: the ongoing need for \$20 High Relief Saints. Deep pocket collector/investors want more of these Gold beauties and they have several dealers working on their behalf in trying to buy them.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.											
1986	14.00	+	14.50	43.00	46.00	101.00	106.00	220.00	+	240.00	402.00	415.00	~ ~ ~	~ ~ ~	MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck. MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins. MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible. MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal. MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date. Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides. * Please Note: This page alternates weekly with Page 3A which contains BU and Proof Rolls.

\$11 MILLION AUCTION AT MIDAMERICA EXPO FAST PACED MARKET LEAVES DEALERS WEARY

The Market in Depth

Dealers are still finding it to be extremely difficult to buy rare coins for their customers in a timely fashion. The availability of the key and semi-key dates has not been anywhere near sufficient to satisfy demand. Dealers understand that many of the keys and semi-keys are still undervalued and so they are willing to stretch to buy them. That's why we are continuing to see increased Bids for many of these better date rarities. Dealers are pushing Bids higher nearly every week in an effort to buy much needed material. They are doing this while still trying to buy coins as reasonably as they can. This benefits their customers and themselves.

For dealers, the past several weeks have been extremely hectic. New coin shows, like the one held last week in Atlanta, have been added to their already busy schedules causing some to experience burn-out. The 23rd Annual MidAmerica Coin Expo in Rosemont, IL June 24-27 was a case in point. Some dealers were disappointed, saying that there wasn't enough new material to buy. Some went on to say that they had already looked at each other's inventory in the weeks prior to the show. We know that dealers have been through a rigorous auction and show circuit and it is becoming more difficult to maintain today's pace. Remember this is usually the vacation period as things tend to slow down. Yet, many will still make their way towards Baltimore for the important Coin & Currency Convention July 9-11.

Still, demand was evident in Rosemont but there wasn't enough coins to buy. Dollars remain hot. Morgan Dollars remain in control with dealers scratching their heads wondering when, and if they will turn. Demand from TV sales and tele-marketers continues to eat-up any available excess supply. Better dates are still highly sought-after with want list demands growing. Quantities are needed but dealers would still be satisfied with just buying a single coin every now and then. American

Numismatic Rarities and Stack's hosted the Expo auction featuring the Medio and Gomez collection Part II on June 23-26. The sale realized nearly \$11 million. We have listed a few of the many high-lights.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally - they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder - but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions - you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

This Week's Market

CENTS THRU HALVES: Buffalo and Jefferson Nickels are dominating the BU roll market. The key, 1950-D, Jefferson Nickel is now Bid \$500 per roll. Weakness is noted for several Washington Quarters and Kennedy Halves from the 80s and early 90s.

MERCURY DIMES: The strength of the Merc market is strong for the keys and semi-keys at current levels. Dealers continue to Bid for select issues hoping to steal one or two for their customers. Full Split Band Dimes are certainly preferred.

WALKING LIBERTY HALVES: Interest remains keen for the Walking Liberty Half Dollar series. Dealers are concentrating on the tougher, earlier dates by increasing Bid for select issues. Denver and San Francisco issues are taking center stage by sporting a majority of the plus signs.

DOLLARS: Generics in MS66 and MS67 are pushing higher with MS67 now Bid above \$880. New Orleans, Carson City, San Francisco and even some Philadelphia issues are also entertaining higher Bids this week. Several plus signs are also found in the Peace Dollar section as well.

PROOF SETS AND MINT SETS: Proof Sets and Mint Sets are trading near current levels. We do see a few Proof Sets being offered at Bid but not even close to the extent that was experienced earlier in the year. Mint Sets are near equilibrium, however, the 1973 set is needed at \$18.25 in quantity. We also note that the 1941-64 Washington Quarter BU set is up at \$775 Bid.

COMMEMORATIVES: Gold Commemoratives are the highlight this week as dealers increase Bid for many Extremely Fine examples. Collectors like building XF sets because the coins are both attractive and affordable at this state of preservation. Silver Commems are mostly steady with many supporting Bids being offered.

TYPE: Many a collector/investor seeks out to buy attractive Type coins. Dealers have said that demand for select Type has been strong throughout the year. Draped Bust Dimes are this week's star performer with increases appearing in several grades. Liberty Seated Half Dollars, without Drapery are needed by way of higher Bids. Proof Type is steady.

GOLD: The volatility of the Spot Gold market continues as nervous investors place orders and sell positions quickly with each related news item. Bullion related coins are less volatile than Spot as holders of common date Gold keep fast to their positions. There is some weakness for select \$10s and \$20s in MS62 and MS63. However, MS65 and MS67 Gold Bids are higher, led by Quarter Eagles. \$20 High Reliefs are increasing in most Mint State grades.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are in the CDN

...a Friday morning report on the Coin Market

MAJOR RARITIES TO HIT AUCTION BLOCK

COMMEMS FACE STRONG DEMAND

The Market in Depth

Most dealers took a short break to celebrate Independence day over the extended weekend. Meanwhile, the current coin market is shooting off some fireworks of its own. It seems as though the overall rare coin market didn't miss a beat as demand remains as powerful today as it did only a week ago. Interest continues to be spread over many different areas of the market as well. The diversity of demand is the reason why many dealers believe that the current bull market has staying power. They expect the remainder of 2004 to be just as solid as the first half of the year with continued plus signs. Precious metals also didn't skip a beat, continuing to fluctuate with sharp increases one day followed by sharp decreases the next and so on. Despite the continued volatility of bullion, dealers tell us that their customer base is still expanding with a growing number of potential buyers being repeatedly introduced to the market via television among other venues. Just about any coin that is problem-free and original can be sold with ease in today's market. However, it is the attractive, premium quality coins that possess rarity and/or an interesting story that are the most salable today. Eager buyers are waiting for these kinds of coins and will take quantities

of them. Dealers are still struggling to keep up with the demand and they are also struggling to maintain a representative inventory for their clients. The dwindling supply of available fresh material has been a sore spot for many dealers and they are left to do the best that they can with what they have to sell. Many are encouraged by the upcoming July auctions to be held in New York City.

David Lawrence Rare Coin Auctions will host the Richmond Collection Part I featuring Gold coins July 22-23. On July 24th, DLRC Auctions will also conduct the New York Invitational Sale. We have listed a few of the many highlights.

This Week's Market

MERCURY DIMES: Bidders are still playing the Merc market cautiously. They continue to pound away with supporting Bids, hoping to buy one or two dates here and there without driving up prices. That's the plan anyway.

WALKING LIBERTY HALVES: Strong demand has not yet subsided in this popular series. Plus signs are appearing for several tough early dates with four- and five-figure price tags. Early Walkers seem to be on everyone's want list and the competition for these dates, when they do appear, is great.

DOLLARS: Morgan Dollars are still moving up, although not at the fast and furious pace that we have come to expect. DMPLs and some tough New Orleans issues are higher. Carson City Mints are still receiving their share of demand along with many key and semi-key dates. Peace Dollars remain solid at current Bid levels.

PROOF SETS AND MINT SETS: Mint Sets and Proof Sets are relatively quiet as dealers have found an equilibrium trading range at the moment. There a few Proof sets being discounted but the majority of the sets are finding support via dealer Bids. Notice that the 1960 Small Date Proof Set dropped a bit as one dealer is looking to unload 18 sets. Mint Sets are very stable at current Bids.

COMMEMORATIVES: Gold Commems were the star last week and this week it's the classic Silver Commems turn. A large number of plus signs are chasing the XF, AU and MS60 grades for many issues. Also, select demand has pushed Bid higher for a number of issues in MS63 and better condition. Modern Commems are selectively higher led by the \$5 Gold 1997 W Jackie Robinson at \$1,850 Bid in BU.

TYPE: Circulated and Mint State Type remain extremely strong and highly sought-after. Dealers tell us that many of their better customers are working on Type sets. They only need to find attractive examples and they have a ready sale. Several issues are receiving increased Bids including: Chain Cents, Shield Nickels with Rays, Draped Bust Large Cents, Dimes & Quarters, Capped Bust Half Dollars and Barber Half Dollars.

GOLD: Gold Type is mixed this week, reflecting the up and down movement in the Spot price. Minus signs are appearing for several denominations from \$1 thru \$10. However, plus signs are seen for \$2½ Indians in MS65 and for \$10 Libs with Motto in MS62. Overall, demand appears to remain better than adequate for Gold Type.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen 'raw' coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

“JUNK BOX” HALF DIME & UNIQUE DIME BRING \$1.5 MIL
QUANTITIES OF FRESH MATERIAL NEEDED

The Market in Depth

It's mid July and dealers are a bit fatigued. The fast pace that was established during the first half of the year has begun to catch-up with many dealers. They have been on the go nearly constantly with a busy show and auction schedule that has presented many long hours of work. Traveling and filling want lists are only two of the several difficult tasks dealers need to perform in order to maintain a successful business. A dealer commented that many are just "burnt-out." July means summer and it usually means some vacation time for dealers. Unfortunately, the increasing number of shows and auctions have left little opportunity for them to get away for much time.

The July Baltimore Coin and Currency Convention was slow for some dealers and definitely weaker than they had expected. As it was, the show still found business readily being done if the coins were offered at current levels. Dealers couldn't find much fresh material on the bourse and most of them really didn't expect to. There was a noticeable number of "big players" that were absent from the floor curtailing the normal Baltimore "buzz". Yet despite all its negatives, Baltimore reinforced the notion that the rare coin market remains solid and bullish. Demand for attractive Mint State and Proof Type was evident. The same could be said for better date and select generic Morgan Dollars. Early coinage remains hot as well with buyers not able to accumulate the number of coins that they need.

Once a "junk box" coin, an 1870-S Liberty Seated Half Dime brought over \$660,000 when the hammer fell. The happy buyer was fully prepared to pay much more. Bowers and Merena conducted the July 2004 Baltimore Auction along with Jim Gray's North Carolina Collection on July 8-9. The sale totaled \$6.5 million. We have listed just a few of the many prices realized from this sale.

This Week's Market

CENTS THRU HALVES: A few common date Mercury rolls are advancing but the bigger news comes from the Bid increases for a couple of early Roosevelt rolls. The better date Roosie, 1949-D is now Bid \$410 a roll. Also, the King of Jefferson rolls, 1950-D is needed in quantities with a high Bid of \$540.

MERCURY DIMES: Demand for Mercs remains stable with dealers maintaining Bids at current levels. Dealers are looking for attractive, original Dimes with luster and that they prefer brilliant white surfaces. Full Split Band dates are also badly needed. The key dates are still unavailable in the quantities that are needed.

WALKING LIBERTY HALVES: Dealers in attendance at the Baltimore show said that they noticed an unusual number of key date Walkers. However, the asking price was such that these coins weren't being given away.

DOLLARS: One dealer at Baltimore said that "all Carson City Morgans in MS66 and higher are white hot." Meanwhile all gem DMPL Dollars are quietly being purchased and put away. Better date Morgans are not as available as buyers would hope and Bids are still in place for these dates. Generic MS67s are a bit higher this week as are AU Peace Dollars.

PROOF SETS AND MINT SETS: The market for Proof Sets is mixed. Some dealers are offering sets in quantity at Bid. Yet, other dealers are willing to pay more than Bid for select sets. The 2001-S 10 piece, 5 piece and Silver Proof Sets are all higher. Mint Sets are mostly higher with increases scattered throughout the middle years.

COMMEMORATIVES: Gold Commemoratives are still entertaining higher Bids. Again, dealers are targeting the XF and AU grade categories as they believe this area is still undervalued. Silver Commems are somewhat mixed with select Commems grading MS65 and MS66 now lower. One dealer is looking to buy quantities of Uncirculated Iowa Half Dollars at \$70 Bid.

TYPE: Dealers are actively pursuing nice Type as they have many customers waiting to buy these coins. Early Type is especially sought-after with higher Bids in place for Flowing Hair Half Dimes, Capped Bust Quarters (Large and Small Size) and Flowing Hair Dollars. Liberty Seated Dollars in PR63 are also reflecting demand at \$2,450 Bid.

GOLD: Gold Spot continues to play the up and down game but the general direction for Gold Type is up. Plus signs are found in several denominations of Gold grading MS62 this week. High Relief issues continue, again, to move higher as the demand has yet to be satisfied.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen "raw"** coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions: you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

It's good to be back.

From dealer to grader, now back to dealer, exciting times are here.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

I am proud to announce the launch of my new company, John Maben Rare Coins (JMRC).

In case we have not met, I have been in the coin business since 1978, with the last 8 years grading at NGC and 7 of those as a Grading Finalizer. Over the years, I have purchased tens of millions of dollars worth of coins, and graded and authenticated millions of coins to the highest industry standards.

And now, with the opening of JMRC, I have set my sights on being a coin company that reminds people of the good old days, when things were far less complicated. By that, I mean we are here to deliver a complete range of beginning-to-end services that assist other dealers, advanced collectors, and investors in maximizing their returns when buying and selling coins. No hyper-specialization, no investor-only or dealer-only emphasis.

JMRC is a well-rounded, full service company you can trust, and enjoy working with on a regular basis. Simply put, I would like to put my years of experience to work for you in those situations where you need definitive answers and a "total numismatic solution."

If you are selling and looking for the "right" company to assist you in an orderly disposition that will maximize your profit potential, JMRC is here to provide the one-stop services you need. If you are building a collection or portfolio, and would like professional guidance from a knowledgeable and trusted source, JMRC is here to serve you.

Consider that, as President of JMRC, I am uniquely qualified to offer you all of these benefits:

- Advice on a coin you are thinking about buying for a significant upgrade. Who better to ask?
- Direction on a coin where professional conservation care might make all the difference. As a key contributor both conceptually and materially to the formation of Numismatic Conservation Services (NCS), the only firm of its kind, I have extensive experience in evaluating coins as candidates for conservation.
- Extensive contacts and decades of experience that will assist in obtaining top dollar when selling.
- Relationships with major auction companies that allow me to negotiate for you when consigning, and to make representation on your behalf when buying.
- Assistance in determining how much to bid on individual coins and collections.
- The ability to put together and finance any size numismatic deal.
- A recognized "eye" for precision grading that is nearly unrivaled, even among professional graders.
- The convenience of our close proximity location to NGC and NCS, in the Sarasota, Florida area.

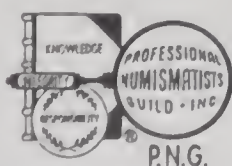

Whatever your needs, JMRC is here to help you buy and sell more coins, more profitably.

. . .a Friday morning report on the Coin Market

DEALERS ACTIVE PARTICIPANTS IN NY AUCTIONS STATE QUARTERS KEEP DEMAND HEALTHY

The Market in Depth

July has already been quite a busy month, but for many dealers there is still much more work to be done. Most dealers are already in New York participating in the New York Invitational Coin Show and auctions that accompany this major show. These auctions are important to dealers because they present an excellent opportunity to buy rare coins, either for inventory or for clients. Along with client representation at Auctions several dealers continue to service lengthy customer want lists. Many of the coins on these lists are earmarked for many knowledgeable and well-heeled collector/investors. A great number of the coins that adorn these want lists are being offered in these NY sales and have already been targeted by collector/investors. Dealers must remain prudent and do their best to take advantage of these opportunities presented to them. They will need to be competitive while being prepared to Bid strongly as the select rarities hitting the auction block don't come around that often. There are many more knowledgeable collector/investors vying for rare coins today than even several years ago. These potential buyers have done their homework and they are willing to pay the strong money that's being realized at today's public auctions. The demand, and the prices realized for rarities usually rises to the occasion when this material finally hits the auction block.

Today's electronic and internet involvement in the auction Bidding process has resulted in increased exposure and higher prices paid for rarities. Many expect this trend to continue while building a larger base of buyers for future auctions. The demand end of the market has held strong because of the greater exposure that rare coins have received from the local and national press. A lot of this increased exposure is due to continued production of new designs coupled with the release of the next circulating state Quarter. Interest in these late date Quarters are also evident by the strength of the after market activity by dealers and collectors. In turn, this demand has filtered its way to other parts of numismatics causing inventories to be depleted and key dates to disappear. After dealers complete their busy auction schedule this week they will head to Saint Louis July 30-31 to participate in the Gateway City Sale by Scotsman. This will wrap-up a month that has certainly been rich in auction lots, and one that has been most welcome by dealers.

This Week's Market

MERCURY DIMES: This series remains very well supported at current Bid levels but simply refuses to move higher. Most of the better date and quality Winged Liberty Dimes that are available in the market are not being discounted.

WALKING LIBERTY HALVES: Early Walking Liberty Half Dollars are receiving the lion's share of the action. Dealers continue to maintain customer want lists that include many of these early dates. This week, besides all the strong supporting Bids among the early dates the 1927-S has increased in MS63 and MS64.

DOLLARS: The focus of Bidders continues to turn its head towards the DMPLs. Several dealers have been telling us how very much undervalued these rarities have been. As you can see by the healthy number of plus signs for DMPLs the days for these being undervalued are numbered. Make sure you notice the continued strong Bid increases taking place for a few New Orleans issues. DMPLs aren't the only Morgan Dollars that are believed to be undervalued.

PROOF SETS AND MINT SETS: Proof sets are still mixed. The hot items are: early sets up to 1963, select late sets from 1999 to date and Prestige sets. 2004 Silver Quarter Proof sets are now listed with a Bid of \$31 and Ask of \$35. These first year of issue sets became very volatile after the U.S. Mint quickly sold out. Mint Sets are mostly sound at their current Bid levels.

COMMEMORATIVES: Much activity continues within the Classic Silver and Gold Commemorative series via higher Bids. Dealers continue to push up Bids with the hopes of waking up sellers. Modern Commemoratives are equally as active as their classic predecessors. Multiple buyers are available for the majority of listed single issues and for all listed sets dated after 1992.

TYPE: Type is still in favor as dealers try to place select Type coins with their customers. A healthy increase is seen this week for the first year of the Quarters, 1796. Draped Bust Quarters are advancing nicely in Good thru Very Fine condition. Another early Type issue Bid higher is the 1794-1795 Flowing Hair Half Dime in MS60. Shield Nickels may finally be awakening judging by the jump in MS65. Proof Type finds Morgan Dollars heavily sought-after in PR63 and better grades.

GOLD: Demand is strong among the rarest Types including: Type II Gold Dollars in MS64; \$2.50 Indians in MS65; \$3 Indian Princesses in MS63 and MS64; and, \$20 High Reliefs in MS64 and MS65. Meanwhile Spot continues to flirt with the \$400 per ounce benchmark. Dealers take a cautious, but confident approach that Gold will hold that level.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight–seen. The coins may be certified or “raw” (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally. They do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight–unseen market, which already include consideration of certification costs. Bids for a sight–seen “raw” coin may be higher or lower than for a sight–unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer–to–Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

...a Friday morning report on the Coin Market

NEW YORK COIN AUCTIONS TOTAL \$25 MILLION

\$1 GOLD RARITY FETCHES \$690,000

The Market in Depth

Last week's New York Invitational Coin Show met or exceeded the high expectations of most dealers in attendance. The auctions associated with the New York show did fabulously. The American Numismatic Rarities July 23 Oliver Jung Type collection auction, consisting of only 107 coins brought \$5.6 million. The Heritage Signature auction held July 20-21 realized more than \$7.3 million. Part I of the Richmond collection and other rarities sold by David Lawrence Rare Coin Auctions realized over \$11 million July 22-24. Some of the many highlights from the sales mentioned above include: an MS65B 1793 Chain, AMERICA, Periods Cent at \$391,000; an MS63 1849-C Open Wreath \$1 Gold brought \$690,000; an MS63 1808 \$2.50 Gold claimed \$322,000; an AU50 1856-O \$20 Liberty brought \$276,000; and an MS62 1927-D \$20 Saint-Gaudens sold for \$575,000.

Besides the auctions there was plenty of wholesale activity taking place on the bourse even though it was smaller than other major shows like Long Beach and Baltimore. One east coast dealer in attendance said that prices were very strong, and in many instances exceeded Bid levels. Interest was especially keen for early material. Anything that was 1834 or earlier found exceptional support and strength. Half Cents up to 1811 were in demand in grades VF and better. Of course, buyers of early Copper are mostly looking for problem-free examples. However, even the lower grade 1793 Half Cents were able to command excellent prices by eager buyers. Similarly, Large Cents up to 1814 were realizing very strong interest from dealers. Problem-free VF and better quality specimens were quickly bought. Also, 1793 Large Cents were rapidly snapped-up in VG and better condition. The middle and late date Large Cents are a bit on the soft side, according to one early copper specialist. A lot of collector demand is evident and "nice stuff" is simply disappearing from the pool of available rare coins. This market remains very broad-based with many individuals buying and looking to buy quantities of rare coins rather than just one. For the most part, collectors are taking rarities off the market but there are a few dealers still willing to speculate. These dealers don't mind owning select major rarities because of their proven track record and because it is a strong market. Some dealers are even stocking select dated rarities and they are stretching to buy them. Collectors are the end consumers and they are playing a powerful role in the success of this market.

This Week's Market

CENTS THRU HALVES: Early Roosevelt Dimes and Franklin Halves are on the positive side with plus signs targeting select issues. A few Jefferson Nickel rolls are also higher including the key, 1950-D, now at \$580 Bid. Sporadic weakness is seen for select Washington Quarters and Kennedy Half Dollars.

MERCURY DIMES: Bids continue to be plentiful at current levels. There is an increase this week for a 1920-S in MS64 Full Band. The better dates of the series are still not as easy to find and dealers may have to rethink some Bids.

WALKING LIBERTY HALVES: On the whole, Walking Liberty Half Dollars are solid with the early and middle dates finding plenty of Bidding support. These tough dates don't appear as frequently and so a dealer has to be ready when they do finally appear. A few late dates are once again showing increases, this time in MS64.

DOLLARS: Bidders remain omnipresent for Morgan Dollars but we don't see the numerous jump Bids that set the tone earlier in the year. Solid demand is still in place for better dates including the Carson City and New Orleans issues. DMPL's are also the focus of attention as some dealers are desperately trying to buy select dates for their customers. Generic Morgans are higher with MS65s now Bid at \$125. Peace Dollars are more active and generating some plus signs as well.

PROOF SETS AND MINT SETS: Proof Sets and Mint Sets are mixed with some sets still being offered at discounted levels.

COMMEMORATIVES: Silver Commemoratives are doing well with transactions occurring at current levels. Gold Commems are a bit soft in the higher grades with a couple issues dropping slightly. Yet, strong support continues for XF and AU Gold Commems.

TYPE: There is exceptional demand for Type as we saw in the recently concluded ANR sale of the Oliver Jung collection in New York. Dealers are always looking to buy nice Type and they know that it will take strong Bids to be successful. Notice the increases for 1796 Draped Bust Quarters in Good, VG, Fine, VF, MS60 and MS65. This first year of issue has been a favorite of collectors for years. Proof Type is solid with eye appealing examples realizing strong interest.

GOLD: Gold Type is a little weaker, probably in reaction to bullion's failure to hold \$400 per ounce. Several denominations are trading lower in MS64 including: \$2.50 Liberty, \$5 Liberty and \$10 Indians. \$20 Saint-Gaudens are lower in MS63 and MS65 while \$2.50 Liberties are also down in MS65. High Relief \$20 Saints are holding steady this week at current levels.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight–seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a sight–seen "raw" coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder – but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions – you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem" full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT: Mercury & Walker singles are in the CDN

...a Friday morning report on the Coin Market

HOT MARKET GREETSS AUGUST

KEY DATES NEEDED IN QUANTITY

The Market in Depth

The first week of August finds plus signs continuing to appear in our Bid columns. Interest for rare coins remains strong and dealers tell us that the underlying demand has a lot to do with it. Many collector/investors are continuing to expand their want lists. This by itself puts upwards pressure on price but it doesn't stop there. A growing want list means that dealers are even more hungry to buy coins to satisfy their clients. However, inventory levels are getting dangerously low and these same dealers are trying to solve this problem as well. Now as more demand enters the equation you have the makings of real problems. Select rare coins have been leaving the marketplace to be put away for an indeterminate amount of time. If the supply side of the market doesn't improve then higher prices may force some of these coins back into play. Still, dealers understand that they need to concern themselves with the present and right now, they still need to buy rare coins. So they are trying their best to acquire to some before the American Numismatic Association's National Money Show gets under-way in Pittsburgh. Bowers and Merena will conduct a Rarities Sale August 14 in conjunction with the show. This sale will feature several Registry Sets.

Dealers are aware that a solid inventory can do wonders for them at this show. The opportunity to attend a show that usually features the best coins that dealers have to offer can only be a plus. Quality coins, key dates, semi-keys, low-pops and any coins that are interesting because they have a story to accompany them are usually at the top of collector want lists. Key dates have been appreciating throughout 2004 and we still see that this nearly insatiable demand is not yet satisfied. The strong demand for keys is said to be firing on all cylinders. We also see that the demand is diverse enough to include many key and semi-key dates in several grades. It used to be that a buyer would come along and demand a specific grade key and when that coin was found the demand was satisfied. Not today! Quantities of keys are needed in several grade categories with some buyers ready to absorb multiples at each grade. This can give you some idea of just how strong today's bull market is as we plow thru summer.

This Week's Market

MERCURY DIMES: This segment of the market may have finally come on board by way of higher Bids. Dealers are in need of the key dates along with the better dates in just about every grade, if problem-free of course. Buyers are also available at these levels for most Mercury Dimes with mintmarks dated prior to 1929.

WALKING LIBERTY HALVES: The early Walkers remain super strong in MS63 thru MS65. Bright coins with a better than average strike and luster are being quickly bought when offered. A handful of short-set dates are also needed in MS64, these 20-piece sets are Bid \$1,150.

DOLLARS: What a difference a week makes. Higher Morgan Dollar Bids are plentiful once again. Healthy increases have been recorded for '79-CC, '84-S, '85-CC, '90-CC, '92-S, '93-S, '94 and '95-O among others. Peace Dollars are also full of activity this week with plus signs seen in grades Fine thru MS66. Common dates are a bit higher in MS66, now Bid \$460.

PROOF SETS AND MINT SETS: Proof sets as a whole have yet to agree on a focused direction, rather they remain mixed. Prestige sets, "No S" sets, and select late date sets all remain active. Among the many declining issues, Mint sets are highlighted by the increases seen for sets dated 1961 and 1973.

COMMEMORATIVES: Bids for low grade Gold Commems have jumped by as much as 24%. Buyers are looking for quantities of original undamaged coins, raw or encapsulated. Silver Commems are even more active with grades XF thru MS66 participating. Several of the better Modern \$5 Gold Commems are higher, as is the \$10 Bimetallic in Unc. Multi-coin sets issued after 1992 continue to have buyers available. Lewis and Clark C&C sets are now listed with a spread of \$116 Bid / \$125 Ask. Also listed is the first \$10 Gold Commem made since the inception of the series in 1984.

TYPE: Dealers are just not able to find enough Type to satisfy their customer's needs. Collectors with a broad range of pocket-book sizes are anxiously waiting to purchase that next coin for their sets. Nearly all areas of Copper, Nickel and Silver Type are steady to higher in Proof, Mint State and Circulated condition.

GOLD: Gold Type continues to be soft overall, but some pockets of demand do exist. The tougher issues remain as hotly pursued items. Higher Bids are seen for Type 2 Gold Dollars, \$3 Princesses and High Reliefs. Wholesalers have discounted a number of issues in MS63 and MS64 resulting in lower Bid levels.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction, you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For the Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer Newsletter*.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.											
1986	14.00	14.50	41.00 -	43.00	101.00 -	106.00	260.00	285.00	410.00 -	422.00	~ ~ ~	~ ~ ~	MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.	MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.	MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.	MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.	MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.	Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

Part I | US Gold

Richmond, Part I

Tops \$11 Million!

After 25 years in the coin business, our first live auction was a huge success. The Richmond, Part I Sale (including the Supplemental Catalog) realized \$11.1 million in vigorous bidding activity.

In bringing this collection to market, we had all the bases covered: direct bidding on our web site, eBayLive Internet bidding during the auction and, of course, a great New York City venue for the live auction.

Shouldn't you be doing business with DLRC? Whether buying or selling — \$100 or \$1 million — we will treat you with the utmost respect and attention you deserve.

Learn More: visit our web site at www.davidlawrence.com for the complete prices realized report for Part I. While you're there, learn about our next two live auctions: Richmond, Part II & III, scheduled to take place November 29, 2004 & March 7, 2005 in Baltimore, MD.

Consignment Deadline: We are accepting a limited number of special consignments for inclusion in the Richmond II catalog. Contact Win Callender or John Feigenbaum to discuss.

PAN HOSTS PRE-ANA IN PENNSYLVANIA

EARLY GOLD & KEY DATES HEAVILY SOUGHT-AFTER

The Market in Depth

The pre-ANA is beginning with the Pennsylvania Association of Numismatists hosting the show in Monroeville Aug 13-16. This show will give dealers a final chance to plan their strategy for the ANA. Activity is expected to be brisk and prices strong as things get underway at the pre-ANA. This year's ANA will follow with the market riding high with prosperity found all around. This has been the story for most of 2004 as coin prices push higher. Strong demand is being maintained as dealers post solid Bids for the coins that they need. Gold is maintaining its contact with the \$400 per ounce benchmark. This is seen as a bullish sign and consequently dealers are staying optimistic. Inventory levels, while severely depleted throughout much of 2004, have received help from the myriad of public auctions that have already taken place. Still, dealers need to buy more rare coins as want lists remain unfulfilled. Also, the increasing customer base is adding to the demand while putting pressure on the limited supply. It's no wonder that we see a wealth of increases appearing throughout our Bid columns nearly every week.

Little has changed in the way of specific needs by dealers because their customers are still demanding the "usual stuff." Key dates remain hot in August with buyers seeking the keys in all of the popular series. Key dates from the Bust, Liberty Seated and Barber series are extremely tough to locate. When rare dates from this area become available the price level jumps. Well-heeled buyers for this material are responsible for these increases. These are knowledgeable collector/investors who understand rarity and are willing to leap at the opportunity. That is why the big bucks have been set aside for the keys. Still these buyers are quality conscious, looking for no problem examples with nice, clean surfaces. Coins that measure up can usually command greater prices. Dealers don't mind paying the additional money because their customers are so knowledgeable and they want to place the coins with them when they can. Early Gold Type is another area of the market that is red hot. Interest in early Gold has been growing and like the key dates, it isn't so easy for dealers to accommodate their customers. Often, they will have to do battle with other dealers and high-powered collector/investors at public auction for this material. They will also need to have excellent credit as this area of the market is not inexpensive.

This Week's Market

CENTS THRU HALVES: The roll market remains strong, as it has now for quite some time. Select Silver war Nickels are higher, as are the ever popular '50-Ds now Bid \$620 a roll.

MERCURY DIMES: Even though no plus signs are to be found, buyers remain in place at their higher Bid levels posted last week. The key and semi-key dates continue to be targeted by collectors, with several dealers actively searching for them on behalf of their clients. The 1921-D has a higher Bid of \$775 in AU50 condition.

WALKING LIBERTY HALVES: Last week we commented on how super strong Walkers are in grades MS63 thru MS65. This week finds this area of the market even stronger as the AU50 and MS60 grades join in. Look at the \$93,000 Bid seeking 1919-D examples in MS65. This buyer has also posted several higher sight-unseen Bids in grades MS66 & MS67 as seen in the *Certified Coin Dealer Newsletter*.

DOLLARS: No doubt about it, Dollars are hot! Morgan and Peace are attracting strong Bids this week. Morgan Dollars are in great demand throughout the series but the better dates are realizing supreme demand and Bids. Key dates, semi-keys, slightly better than common dates, DMPLs and MS67 generics are all higher. Peace Dollars are receiving quite a bit of attention as well. Proof Anthony and Sacagawea Dollars are also sought-after as demonstrated by a few plus signs of their own.

PROOF SETS AND MINT SETS: Proof Sets are mixed with not as many sets being offered at Bid this week. Plus signs are occurring for several sets from 1998 thru 2003. The Mint Set market is steady with a few years advancing.

COMMEMORATIVES: Silver Commems are realizing increased Bids for nearly every issue in many grades. Yes, the increases are relatively small but the trend has been established and obviously past increases have failed to generate the number of coins needed to satisfy the demand. Select higher grades are also up this week as dealers try to buy examples before the ANA. Gold Commems are experiencing similar demand and similar increases.

TYPE: Type is an area of the market that is also doing very well. Increases are seen for Circ, Mint State and Proof Type. Dealers are trying to fill demands from their customers but unfortunately they must battle other dealers looking to fill similar demands. Nice quality, attractive examples are quickly bought when they appear on the market.

GOLD: Gold Type is steady to higher this week. High Reliefs and \$3 Gold are especially sought-after. Dealers have been targeting these two areas of late which are up in three grade categories each.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer Newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" or "top" rolls are worth more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem roll strike warning Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

Sell Us Your Coins!

Top prices— Go where those "in the know" go to sell their coins! We buy millions and millions (and millions!) of dollars worth of coins each year from other dealers. Obviously, they're going where they can get the best deal for their coins, and that's why they choose **Spectrum Numismatics**. So should you!

We buy it all— Yes, we're definitely the company to see if you have a complete set of Capped Bust quarters in Gem condition and two Pan-Pac sets in the original frame. But we're also highly interested in the real world, and that includes the 67 assorted silver dollars you've had for years, along with the Mercury dime set missing five dates, the 20 1964 Proof sets and the Trade dollar an ancestor brought back from the Orient. We're interested in hoards, accumulations, portfolios, specialty collections, and every other conceivable coin holding that you can think of.

We buy it NOW— Most transactions with **Spectrum Numismatics** are completed in less than 72 hours (start to finish) and many take place on the same day. If we need to come see you there's a major airport only minutes from our office. If we do the deal by mail, as we do in 80% of the cases, your coins will receive same-day attention upon their arrival. If you make an appointment and come by our offices you'll find our service prompt and our people as agreeable as our prices.

Check us out— Need references? You've got it! Just give us a call and we'll provide you with any information that you might need or want to assure you that **Spectrum Numismatics** is the right choice every time!

...a Friday morning report on the Coin Market

THREE PA AUCTIONS EXCEED \$17.8 MILLION “PHENOMENAL” PNG DAY PRECEDES ANA

The Market in Depth

The August 13-16 pre-ANA in Monroeville, Pennsylvania has concluded with dealers expecting a bit more. One dealer said that it certainly did not meet his high expectations, while another felt it was slow. One said that many of the better coins were yet to arrive. Remember, this is only the pre-ANA show. Several dealers are only able to schedule the big ANA show without incurring the added costs of a pre-ANA. However for what it was, many still did “OK.” One dealer said that retail attendance was really “pretty decent” with the bourse becoming crowded at times. Transactions that were occurring on the bourse did so at today’s strong levels. The pre-ANA proved that higher prices are still secure with hungry buyers trying to add to their stock and/or obtain a few examples to fill customer want lists. The real power of the market was experienced during the three Pittsburgh auctions held August 14-16. Dealers have told us that the prices realized at these sales were rather strong with a considerable amount of competition. Condition census rarities were blazing hot. The Bowers and Merena Rarities Sale, August 14, realized \$6.6 million. The Classics sale held by American Numismatic Rarities on August 15 claimed \$6.7 million. Finally, the August 16 Superior auction finished with \$4.5 million. We listed a few major highlights from each sale.

The August 17 PNG Day was “quite busy,” according to one dealer. Activity seemed to increase as more and more dealers arrived. Another dealer said that PNG

Co.	Date	Denomination	Grade	Realized
B&M	1916	Buffalo 5¢, Dbl'd Die	MS64	\$281,750
B&M	1918/7-D	Buffalo Nickel	MS65	\$287,500
ANR	1796	Bust Half, 15 Stars	MS63	\$189,750
ANR	1844	Liberty Seated Dollar	PR66	\$132,250
B&M	1808	\$2½ Capped Bust	MS62	\$207,000
Superior	1802/1	\$2½ Capped Bust	MS64	\$103,500
ANR	1879	\$4 Stella, Flowing	PR66	\$201,250
Superior	1879	\$4 Stella, Flowing DCam	PR66	\$224,250
Superior	1796	\$5 Cap. Bust, 6 over 5	MS62	\$100,625
Superior	1797/5	\$5 Cap. Bust, Heraldic	MS61	\$149,500
ANR	1865	\$20 Liberty, DCam	PR65	\$264,500
B&M	1915-S	\$50 Pan-Pac, Round	MS65	\$103,500

Day was “phenomenal.” Rare coins were selling rather easily at very strong prices. Type was one area of the market receiving attention. Circulated, Mint State and Proof Type are all experiencing strong demand. Silver Commems and dated Gold were also sought-after during PNG Day. All this activity should bode well for the upcoming ANA.

This Week’s Market

MERCURY DIMES: The status quo is being maintained in the Mercury Dime market. Dealers are still reluctant to increase Bid and remain steadfast with their existing positions. Key and semi-key dates are still heavily sought-after in nearly every grade.

WALKING LIBERTY HALVES: The Walking Liberty Half Dollar market continues to trade actively. Plus signs are the product of this activity with dealers trying to buy coins for their customers. Mint State 65 is the grade of choice with plus signs are appearing for early, middle and late dates. Examples dated 1920-D and 1920-S stand out as two tough issues for collector/investors, especially in MS64 and better condition.

DOLLARS: The Morgan Dollar market is displaying less plus signs than we are used to seeing. Still, the absence of minus signs coupled with the strong number of supporting Bids depict a market that is still realizing heavy demand. A few “CC” Dollars in high grade have edged higher as did the 1890 and 1902-S in MS65. Peace Dollars are steady.

PROOF SETS AND MINT SETS: Proof Set activity is focused on the later date Silver sets. These are needed in quantity by dealers. An increase to \$17 is in place for the 1986-S Proof Sets with the demand not yet fully satisfied. Mint Sets are relatively quiet save for the higher Bid of \$19 for 1973 sets and a couple minor declines for 3-piece Bicentennial and 2003 sets.

COMMEMORATIVES: Silver Commemoratives have been gaining strength over the last couple of months and that momentum is continuing this week. Increases are taking place for a handful of issues while the majority still have buyers at current levels. Low grade Gold Commems remain in demand with quantities needed. Modern Commems are generally steady with increases seen for select \$5 and \$10 Gold Olympic issues.

TYPE: The market for Type coins is very powerful. We are hearing good reports about Type in Pittsburgh and also see increased interest for the same on the electronic dealer trading networks. Notice the strength in Proof Dollars. Liberty Seated, Morgan and Trade Dollars are all higher in Proof 65. Liberty Seated Dollars with Motto, Barber Dimes and Barber Quarters are all higher in MS65 reflecting the strong demand from those collector/investors working on high quality Mint State Type sets. Circulated Type is also solid.

GOLD: Weakness has hit a few denominations in the MS63 and MS64 grade category. Throw in a few plus signs to combine for a mixed Gold Type market. This seems fitting as Gold Spot remains quite volatile.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or “raw” (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen “raw” coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions: you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	BID	ASK	Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all equally high grades.

May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.	MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.	MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

HIGH EXPECTATIONS MET DURING ANA WEEK
ANA AUCTION EXCEEDS \$20 MILLION

The Market in Depth

The ANA's National Money Show and auction simply confirmed what most dealers already knew prior to arriving; that this rare coin **bull** market is for real. Most dealers were very satisfied with the high level of activity and the amount of business that they were able to transact. Optimism was omnipresent as an astounding dollar amount of rare coins were both displayed and offered for sale. A bourse that displayed not one or two, but **three** 1804 Draped Bust Dollars without dominating the attention of coin enthusiasts is just another indication that this bull market is very broad-based. Dealers had nothing but praise for the market's activity. One dealer said, "He is delighted by what he sees (in the market)." He was just one of many dealers that said how very active the market was at the Pittsburgh ANA. We talked to many dealers that said they were able to buy coins for their inventories and their customers. However, they did have to pay strong money to be successful but that is what it takes to get the deal done today. There wasn't any particular area of the market that was head and shoulders above the rest. Dealers just said that virtually all areas of the market were realizing strong demand and interest. Some went on so say that they never sold so many coins from their show cases with such ease. Fewer tire-kickers were seen along with less haggling over price. One of the many exciting highlights at the show included a Copper 1792 "No Silver Center" Cent discovered by a New York family that was brought in, authenticated and graded VF by PCGS.

Public auctions that took place subsequent to, and during the ANA were responsible for millions of dollars in rare coin transactions. The official ANA auction conducted by Heritage realized more than \$20 million. The continuing high number of rare coins being consigned to public auction is certainly indicative of a market where demand exceeds supply. Sellers anticipate strong prices. A lot of these coins are not only selling and leaving the market for an indefinite amount of time, but the successful buyers are paying very strong money to own them. We knew that many dealers began the ANA with high expectations and these dealers left Pittsburgh either fulfilling those expectations or exceeding them. Most believe that this continued strength should carry through the rest of the year. This is provided that interest rates and/or the stock market don't suddenly take off. As it stands now, dealers say there are plenty of collector/investors willing and able to buy and put away rare coins.

This Week's Market

CENTS THRU HALVES: Buffalo and War Nickel rolls are realizing higher Bids as the strong interest in Nickels continues to grow. Select San Francisco Mint Dime rolls are higher including: 1937-S, 1939-S, 1942-S and the key Roosevelt 1949-S. State Quarters are a bit softer with at least one dealer offering quantities of 28 piece \$1,000 Bag Sets for \$83,500.

MERCURY DIMES: Strong demand for Mercs continues with a strong increase to \$1,520 Bid taking place for the tough 1923-S in MS64FB. Otherwise we see strong supporting Bids blanket the series.

WALKING LIBERTY HALVES: Increases are found among the Walker series following last week's plus side activity. Walkers were in demand on the ANA bourse as well. The hard to find **early** dates are higher with two of them, the 1918-S and 1927-S up in two grades each.

DOLLARS: Morgan Dollar key dates, Carson City and DMPL issues are higher. Demand for better date Morgans was evident on the bourse at the ANA and this demand is still unfulfilled. Some dealers are wondering just how high the "CCs" are going. Strength is also evident in the Peace Dollar series with several better dates increasing in MS65.

PROOF SETS AND MINT SETS: Several Proof Sets are being discounted this week as dealers look to blow-out some sets that have been on the shelf too long. The 2001-S 10-piece and Silver Proof Sets are active with dealers pushing Bids higher. Also, the 2003-S 10-piece Proof Set is now at \$26.50 Bid. Mint Sets are basically steady with only the 2003 Mint Set declining slightly.

COMMEMORATIVES: Silver Commems are continuing to move higher as they been for several months now. Dealers have been trying to buy these issues but they realize that it takes higher Bids to be successful. Consequently another round of plus signs are appearing. A similar scenario exists with Circulated Gold Commems.

TYPE: Type was clearly among the top areas of the market during the ANA. Dealers have told us that they have a growing number of customers buying Type. Draped Bust Quarters are especially hot. It is a one-year, first-year Type and that adds to its appeal. Type II Standing Liberty Quarters are up in MS64 and MS64FH. Also, Barber Halves jumped this week in PR65.

GOLD: Gold Spot is still quite volatile but continues to cling to the \$400 per ounce area. Gold Type reflects the up and down nature of Spot Gold with a couple of issues in MS64 lower and several MS62 and MS63 higher. Be sure to notice the increase for MS62 \$3 Gold and for High Reliefs in MS63 and MS65.

The weekly **COIN DEALER** newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer Newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

MARKET STRENGTH SEEN FROM BOTTOM TO TOP

HECTIC LONG BEACH EXPO EXPECTED

The Market in Depth

Dealers are planning on having an active and profitable experience at the Long Beach Expo to be held September 9-11 in California. Many, if not most will be in attendance primarily to buy fresh material for their clients and showcases back home. Much of this material will be purchased on the bourse and surrounding auctions. Superior will call their sale in Beverly Hills beginning Sept. 5 while Ira and Larry Goldberg will host a Sept. 6-7 auction in Los Angeles. Heritage's Signature sale will take place Sep 9-11 in Long Beach.

Not all dealers participate in the rigorous show circuit, traveling from one city to the next for show after show and auction after auction. Expenses and manpower prohibit many of the small "Mom & Pop" shops across America from attending. These dealers stay connected to those that do attend these events and are well aware of the excellent market we are currently experiencing. While it is true that dealers have been doing phenomenally well with the numerous shows and auctions, dealers that have small coin shops around the country are also doing very good. Many of these shops are extremely busy servicing a customer base that consumes lower end and middle range rare coins. One such east coast dealer said that the market for him is "very active" and "very good." He sees a continued flow of "steady business" at his coin shop. His customers don't necessarily buy the top end material but there is strong demand for the low thru middle range coins nonetheless. Key dates, in the lower and middle range grades, are just "flying out the door." His problem, just like for the higher-end dealer, is that there isn't enough material available for him to buy. His customers are actively pursuing better dates, nice Type and interesting (coins with a story) rare coins of all denominations. Key dates from the Lincoln Cent or Buffalo Nickel series are among the many primary needs of his customers. For example, any Circ or low grade Unc 1909-S VDB could be sold several times over when he is fortunate enough to buy one. However, even attractive Extremely Fine Capped Bust Half Dollars are gobbled up by his hungry Type collectors. We know that these buyers don't spend thousands of dollars per coin but their needs are important, evident and growing. This bottom end of the market strength is pertinent to continued health and growth of the customer base. These consumers of low end and middle range rare coins may become tomorrow's big buyers. Still the depth and power of the current bull market are defined by a combination of the needs and demands of all collectors, large and small.

This Week's Market

MERCURY DIMES: Solid Bids remain in place for most of the better early dates along with all of the key dates. High grade Mercury Dimes with strong strikes are also needed with MS64FB thru MS67FB remaining as the grades of choice. A nice bump upward has been recorded for 1917-S examples grading MS64FB and MS65FB.

WALKING LIBERTY HALVES: Walkers are steady following a wealth of activity seen throughout this year and last. The focal point continues to shift from the tough early issues up to grade MS65 to the late short-set dates in grades MS65-MS67. Proof examples also remain active, as dealers continue to re-assemble and market early Proof Sets.

DOLLARS: Carson City Morgans are still in serious demand and continue to advance especially in the higher grades. Deep Mirror Proof Like Morgans are hot, hot, hot! At first many felt DMPLs were elevated simply because their Mint State counterparts were moving up. This is not the case, one group of dealers has been shipping these beauties overseas to financially sound collector/investors and they believe these coins may not come back to market for many generations. Another group of dealers is building sets of "CC" DMPL's for anxious clients. Common date Peace Dollars are now Bid \$42 in MS64.

PROOF SETS AND MINT SETS: Several Proof Sets are higher including Silver sets dated 1995, 1997, 1998 and 1999. Mint Sets are a bit mixed with the 1947 and 1948 double issue sets along with the 2003 set moving lower. 1973 Mint Sets are higher with dealers looking for moderate quantities.

COMMEMORATIVES: Circulated Commems in both Gold and Silver are up. A majority of the issues are again higher, nearly a repeat of last week's activity. When Bid increases fail to bring material to market dealers are left with little choice but to raise Bids even higher, if they are to be successful. Contemporary Commems remain solid with several dealers having a hand in the action.

TYPE: Type is still among the leading areas of the overall rare coin marketplace. Just about anything that is problem-free and pleasing for the grade is in demand. However, material that is lackluster or continually available from several sources must be discounted in order to sell. Bust coinage is on fire in Mint State and Circulated condition. Full Head Standing Liberty Quarters have inched higher once again in MS64FH.

GOLD: Gold Type remains volatile with no clear direction pinpointed as of yet. The up and down nature of the current Spot market is without a doubt having an influence here. Bids for High Reliefs are up in MS60 and MS63.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

It's good to be back.

From dealer to grader, now back to dealer, exciting times are here.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

I am proud to announce the launch of my new company, John Maben Rare Coins (JMRC).

In case we have not met, I have been in the coin business since 1978, with the last 8 years grading at NGC and 7 of those as a Grading Finalizer. Over the years, I have purchased tens of millions of dollars worth of coins, and graded and authenticated millions of coins to the highest industry standards.

And now, with the opening of JMRC, I have set my sights on being a coin company that reminds people of the good old days, when things were far less complicated. By that, I mean we are here to deliver a complete range of beginning-to-end services that assist other dealers, advanced collectors, and investors in maximizing their returns when buying and selling coins. No hyper-specialization, no investor-only or dealer-only emphasis.

JMRC is a well-rounded, full service company you can trust, and enjoy working with on a regular basis. Simply put, I would like to put my years of experience to work for you in those situations where you need definitive answers and a "total numismatic solution."

If you are selling and looking for the "right" company to assist you in an orderly disposition that will maximize your profit potential, JMRC is here to provide the one-stop services you need. If you are building a collection or portfolio, and would like professional guidance from a knowledgeable and trusted source, JMRC is here to serve you.

Consider that, as President of JMRC, I am uniquely qualified to offer you all of these benefits:

- Advice on a coin you are thinking about buying for a significant upgrade. Who better to ask?
- Direction on a coin where professional conservation care might make all the difference. As a key contributor both conceptually and materially to the formation of Numismatic Conservation Services (NCS), the only firm of its kind, I have extensive experience in evaluating coins as candidates for conservation.
- Extensive contacts and decades of experience that will assist in obtaining top dollar when selling.
- Relationships with major auction companies that allow me to negotiate for you when consigning, and to make representation on your behalf when buying.
- Assistance in determining how much to bid on individual coins and collections.
- The ability to put together and finance any size numismatic deal.
- A recognized "eye" for precision grading that is nearly unrivaled, even among professional graders.
- The convenience of our close proximity location to NGC and NCS, in the Sarasota, Florida area.

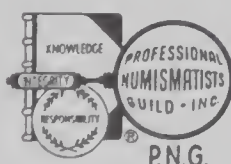

Whatever your needs, JMRC is here to help you buy and sell more coins, more profitably.

ACTIVE LONG BEACH EXPO ANTICIPATED

MARKET SLOWS A BIT AFTER HOT SUMMER

The Market in Depth

Many dealers are already on the west coast participating in the pre-expo auctions before heading to the convention center in Long Beach. Optimism still prevails as dealers tell us that the collector market is still fine with many actively pursuing specific rarities. We are also hearing that the general market, while still bullish, has "dropped off a bit" from the levels that were being experienced earlier in the summer. The exceptional pace that the market established during much of 2004 was just too impossible to maintain. Still many dealers are seeing their regular customers trying to buy specific key dates and other attractive collector coins. Primarily, they are looking to spend up to \$2,000 per coin. Coins that are priced below the \$2,000 level are relatively easy sellers as most collectors feel comfortable with coins in that price range. Coins priced between \$2,000 and \$10,000 are a little tougher to sell, according to some dealers. However, it still depends on each dealer's customer base and that dealer's ability to find and buy the right coins.

Of course the economy has something to say about today's demand level for rare coins. While collectors and collector/investors feel good about their financial position they are more inclined to spend a portion of their disposable income on coins. When things are great they are even willing to increase that spending. Today, some of these collector/investors are preoccupied with their children heading back to school. It has been a very active market and we have seen some of that extreme activity settle back down a bit. Spot Gold and Silver levels also have a role to play and prices have softened. Still, the levels are high enough to maintain that bullish direction. So many collector/investors are simply taking the current weakness in stride. On the buying side, dealers tell us that things have loosened up a bit. This is good news. Dealers say that they are currently finding more people willing to sell their coins. Some of these sellers are taking some profits. These are buyers who have accumulated rare coins over the last five to ten years. This is the market atmosphere as we begin the week of the expo. Consequently, the Long Beach Expo should be an active and rewarding show for dealers wanting to do business.

This Week's Market

CENTS THRU HALVES: Although the Roll market remains quite strong, only a handful of advancing issues are found in this report. A few declining issues are found in every denomination excluding cents. Early Lincoln (pre-1932) Bids are higher in grades MS64 Red and MS65 Red.

MERCURY DIMES: Dealers are still offering current levels for the majority of Uncirculated issues with Mintmarks from the teens and twenties. Later dates are also in need beginning with the MS64 Full Band grade.

WALKING LIBERTY HALVES: Walkers continue to stabilize in grades AU through MS65 with no real changes to report from last week. Circulated Walkers are extremely active with several Bid jumps occurring for a number of dates as seen in the *CDN Monthly Supplement*.

DOLLARS: The level of demand found for Morgan Dollars continues to impress even those that don't care as much for them. The interest for Carson City and Deep Mirror Proof Like examples is running one, two again this week. Dealers have increased their Bids for these popular and desirable Morgans once again. Key dates are still in vogue and be sure and notice the higher Bid for the key 1893-S in VG. Increases are also seen for common date pre-1921 issues in VF and XF. Generic Peace Dollars in MS64 are receiving a lot of attention with a higher Bid of \$45.

PROOF SETS AND MINT SETS: Proof Sets are mixed as a small quantity of Prestige sets were offered at Bid. The early Proof Sets are solid with some Bidders willing to pay 5 to 10 percent more if offered sets void of hairlines. 1951 and 1952 Mint Sets are higher.

COMMEMORATIVES: This may sound like a broken record that continues to skip, as the news remains the same week-in and week-out. Gold and Silver Commems are up again in both Circulated condition and Mint State.

TYPE: Dealers are well aware of their clients desire to own nice Proof Type material and will make purchases in an instant if and when it is offered to them. Draped Bust Dollars are now Bid \$45,000 in PR60 while Gobrecht Dollars are up in PR60 thru PR64. Demand remains for Mint State Type as well even though only a couple of plus signs are present.

GOLD: The market for Gold is mixed with select early Half Eagles, Eagles and Double Eagles moving higher in grades up to MS64 while \$2½ Liberties and Gold Dollars (Type 1 & 3) drop. Gold Spot remains quite volatile, down just over \$10 from last week.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and generally less than the Jefferson series, some of the rolls in the late 50's tend to be dark - these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" rolls are worth more than listed prices - particularly the pre-1941 issues. Washington rolls - dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

TYPE, DOLLARS & COMMEMS LEAD MARKET WELCOMED BREAK IN SHOW CIRCUIT

The Market in Depth

The activity level during the Long Beach Expo was basically maintained throughout the show. However, some dealers feel that the market has “relaxed a bit” from the furious pace that was experienced earlier in the summer. Dealers reported that business was taking place on the bourse although they did complain that this show, coming closely on the heels of previous shows, had slim pickings. One dealer said, “All the coins have been seen only a few short weeks before....” Therefore, the buying and selling that took place was very **selective**. Some dealers needed to overhaul portions of their inventory and blow out (at Bid) coins that didn’t fit the mold of their present customers and buy some that they can sell. A few dealers were cash poor from auction bills and overdue customer invoices. Others were waiting to see whether or not coins out on memo “will stick.” These dealers are more cautious when buying during the Long Beach Expo and doing so only when the coin was an “absolute rip.” Many dealers are now welcoming the break they will receive following Long Beach. The next really major show is not until December in Baltimore.

The market continues to attract strong collector/investor demand with dealers still actively pursuing coins to fill want lists. The Long Beach Expo found generic Gold drifting but there was also very strong demand seen for other select areas of the market. Bust coinage, for example, was very hot! Interest was seen targeting Bust Halves and Dollars. Attractive Circulated examples are high on everyone’s list of coins to buy. Very Fine and better examples are not only very salable at current levels, but many believe they offer excellent future potential as well. Proof Gold remained in short supply with not much available for dealers to choose from as they strolled the isles. Rare date Gold is becoming more and more in favor as buyers are finding it difficult to obtain select issues for their customers. Charlotte, Dahlonga and Carson City Gold are very strong at the moment. Be prepared to pay strong money for nice coins. Deep Mirror Proof Like Morgan Dollars are still heavily sought-after with Bids moving higher and supplies remaining limited. Better date Morgans continue to attract buyers with some raising the ante just to be filled.

This Week’s Market

MERCURY DIMES: From all appearances, the Mercury Dime series seems quiet. Indeed, it is in many cases but it also has ready buyers for early Denver and San Francisco dates, key dates and semi-key dates when they become available.

WALKING LIBERTY HALVES: Walking Liberty Half Dollars are attracting strong demand for the early dates. Many of these hard to find dates are gobbled up quickly when offered for sale. Notice the \$400 Bid jump for the 1917-S Reverse in MS64. The later dates of the series are rather quiet at the present time.

DOLLARS: Dealers at Long Beach had nothing but accolades when asked about the present state of the Dollar market. Deep Mirror Proof Likes are high on the list of needed Morgans. Carson City and the rest of the key and semi-key dates of the series are still receiving strong Bids. Be sure and notice the new higher Bids for four popular key dates: 1893-S at \$6,500 in XF; 1894 at \$25,000 in MS65; 1895 at \$50,000 in Proof 65 and an 1896-S at \$75,000 in MS65 DMPL.

PROOF SETS AND MINT SETS: The market for Proof Sets remains mixed. Sets being offered at Bid are responsible for most declines. Once these sets are absorbed stability should return. Increasing demand for several late date Silver sets and three 10-piece sets helped push some Bids even higher. Mint Sets are mostly lower as several sets remain available at Bid.

COMMEMORATIVES: Silver Commems continue to glow brightly as Bids increased again this week. Value is important and these Commems still represent an excellent value at these levels according to several dealers. White coins are preferred. Gold Commems are holding their previously seen gains. Coin & Currency Sets are higher among Modern Commems along with an increase for Unc Mt. Rushmore Half Dollars.

TYPE: Circulated Bust Halves are on the move in grades up to XF. Proof Type is also attracting higher Bids for a number of issues. Gobrecht Dollars are making a repeat performance while being joined by Proof Morgan Dollar increases. Type continues its strangle hold on demand from eager collector/investors.

GOLD: For the most part Gold Type was drifting at Long Beach, confirmation can be seen in the several denominations that are now lower in MS63 and MS64. It is not all gloom for Gold as High Reliefs have been on a roll for some time now and continue to do so. Three Dollar Gold continues to remain in demand across-the-board.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight–seen. The coins may be certified or “raw” (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen** “raw” coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The **CDN** may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer–to–Dealer transactions: you should expect to pay a premium above Ask when purchasing coins in a retail transaction, you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the *Certified Coin Dealer newsletter*.

It Pays To Choose The Very Best.

The very best for *you*, that is.

Presenting a new, ground-breaking endeavor to the world of numismatics, and to the exciting arena of rare coin auctions. **Spectrum Numismatic Auctions** consists of three names familiar to rare coin collectors, now combined to specifically fit your individual needs.

BOWERS AND MERENA AUCTIONS

—When great collections are sold... Bowers and Merena sells them!—

The *pre-eminent* coin auction company of the past three decades, Bowers & Merena has sold hundreds of millions worth of coins, paper money, and other numismatic items on behalf of tens of thousands of consignors. Bowers and Merena has sold four of the five most valuable U.S. coin collections ever formed, including the Louis Eliasberg (\$45 million), Harry Bass (\$38 million), John Works Garrett (\$25 million) and Ambassador and Mrs. R. Henry Norweb (\$20 million) collections.

In addition, of the seventeen highest prices realized for a rare coin at public auction, Bowers and Merena holds nine of them, including \$4.1 million for an 1804 silver dollar sold in 1999. Today, the firm continues its more than 30 year tradition of serving sophisticated, high end coin auction buyers. Contact Steve Deeds at stevedeeds@aol.com

COMPLEX COIN MARKET TOUGH TO PREDICT
BISON REVERSE FOR 2005 JEFFERSON NICKEL

The Market in Depth

Dealers will have an opportunity to reflect and take a closer look at the market and its direction now that the busy past few months are behind them. Although comments regarding a slight market breather before the holiday season may be warranted, many believe we will see steady advances in the long run. New collectors are likely to continue to enter the market with five more years of the State Quarter program remaining. The new circulating Jefferson Nickels commemorating Lewis and Clark and the Louisiana Purchase will probably hook new collectors and also bring some back that have left the hobby. The first newly designed Jefferson Nickel to be released in 2005 will bear an image of a Bison on the reverse reminiscent of the popular Buffalo Nickel. Some have said that the volume of transactions taking place at shows and auctions continues to steadily increase. One dealer mentioned that he is not selling much material in the \$500-\$1,500 price range, though he is selling plenty of coins priced at \$3,000 and higher. Are collector/investors upgrading? Are more well-heeled collectors entering the fray? There are some collector/investors looking to upgrade their sets but he believes that there are also other reasons. He has noticed that some of his customers are broadening their interests, looking to move on to other series. It seems that they are most concerned about **value** for their coin purchases. Many of them believe that a lot of the 20th century popular coins are already selling at levels relative to their scarcity. Some feel that they missed the boat on these. However, astute collector/investors are continuing to buy those undervalued rare coins that offer better potential.

Dealers try to stay ahead of their customer’s demands and so naturally they want to stock those coins that will sell. Consequently they are rearranging their inventory to offer coins that will be more salable. According to one dealer, many late 19th century coins seem to fit the bill when it comes to good value and potential. The Barber series, for example, may contain a fare share of sleepers. The same may be true for the 3-Cent Copper-Nickel and Silver pieces as do Shield and Liberty Head Nickels in business strike and Proof. Peace Dollars are another area to consider especially when you compare it the powerful Morgan series. Dealers need to be prepared to use their experience and wisdom when their clients ask for guidance in directing them into select coins. What areas will shine and which will be left behind?

This Week’s Market

CENTS THRU HALVES: The popular zinc-plated steel Cents of the Philadelphia, Denver and San Francisco Mints increased this week. Strength is also evident for 1960 Small Date Lincoln Cent rolls. A few San Francisco Mint Franklins from the early to mid 1950s are higher while a few from the late 1950s are lower. State Quarter rolls are generally mixed.

MERCURY DIMES: Key date Mercs are realizing higher Bids this week. Notice the Bid jumps for the key 1916-D in MS60 thru MS65. Interest is also appearing for 1942/41-D in several Mint State grades. The popular 1945-S Micro S is also participating with some gains.

WALKING LIBERTY HALVES: The early, better dates of the Walker series are still needed by dealers for their customers. Several four- and five-figure better dates are sporting plus signs. Collector/investors looking to upgrade or just fill in some holes in their set need to be patient as these coins are very tough for dealers to find.

DOLLARS: Morgans are displaying their usual scenario with strong demand and plus signs scattered throughout the series. DMPLs, Carson City issues, key & semi-key dates are all advancing. More players are entering the DMPL battle as higher Bids are recorded for some of the “CC” DMPLs. The small gains for a few slightly better dates in Circ may be pointing to new collectors of Morgans. Peace Dollars by comparison are very quiet.

PROOF SETS AND MINT SETS: The market for Proof Sets and Mint Sets improved this week. We see many more supporting Bids and fewer sets being offered at, or below Bid. Prestige and late date Silver, Quarter and regular Proof Sets are higher. The 2001-S Silver is now at \$130 Bid with one dealer willing to pay more for quantities. Mint Sets are solid with a couple of gains while the only decrease appears for the 2003 set.

COMMEMORATIVES: Silver Commems are still moving in a positive direction. The popular Hawaiian and Gettysburg issues are up in XF, AU and MS60. However, dealers are mostly increasing Bid for select issues grading MS64 and MS65. Among Gold Commemoratives the 1904 and 1905 Lewis & Clark \$1 issues are lower in MS65.

TYPE: Type is quite powerful and leading the market higher this week. Interest is seen for Circ, Mint State and Proof Type. Bust coinage is fueling the rally with increases seen for Circ Half Dimes, Dimes, Quarters, Half Dollars and Dollars. Bust material is also higher in Unc and Proof as well. Barbers and Seated Liberty Proofs are also making a statement of their own.

GOLD: Gold Type is relatively quiet although several plus signs are appearing. Many of these increases are reflecting the higher Spot prices. However most issues are holding at current levels.

The weekly **COIN DEALER newsletter** (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or “raw” (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** raw coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder – but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer-to-Dealer transactions – you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC please refer to the *Certified Coin Dealer newsletter*.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and 'gem' rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; 'gem, full steps' rolls (when available) bring higher prices. In the Mercury series 'gem, full bands' rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or 'put together' bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

HEALTHY MARKET MARCHES ON
COLLECTORS GAIN AN EDUCATION

The Market in Depth

We begin October on an optimistic note. Most dealers believe that the market, while not as robust as we have seen in August and early September, is still very healthy at current levels. Some even say that it is simply "awesome." One astute dealer said this market is totally unique in that, "It's an educated buyer's market." There are sophisticated buyers out there that have grown-up quickly from lessons learned as opposed to leaving the hobby in disgust. Much of this fast numismatic education is being facilitated by the constant exposure to coins on internet auction sites. Those participating in internet auctions have learned, sometimes the hard way, what coins are a good value and what coins are not. Lessons learned from buying and selling on ebay and other avenues have forced these novices to understand the workings of the rare coin market. This is one reason why today's buyers are demanding quality and originality. These customers know that junk is junk and they do not mind paying strong money for better material. Their education and awareness has continued with the bombardment of the many new coin designs being pumped out by the U.S. Mint. All this education and interest in rare coins has created a situation where supplies of quality key and semi-key dates lag behind demand in some cases dramatically behind.

Many dealers believe that this market is here to stay from the growing number of new collectors and from those that are already interested and continue to expand their numismatic horizons. Yes, Bids have increased in many areas, and in some cases substantially but there still does not appear to be any glut of material pouring into that demand. It's a smart market today with no real sign of collections being dumped onto the market for profits. Instead, the new higher levels are being digested and the smart collector is now tendering higher Bids for these coins. That is what one east coast dealer believes is happening with Draped Bust Dollars. This segment of the market increased rather precipitously over the last year or more. He said that the new higher prices seemed to turn-off a lot of his customers. Now, they have fully adapted to the new levels and Bust Dollars are selling once again. He does say that his customers are very knowledgeable and they want no-problem coins for the grade. Consequently many middle grade circulated Dollars are readily selling. Nice VF, XF and AU examples, when available, have ready buyers waiting in line for them.

This Week's Market

MERCURY DIMES: Interest for key date Mercs is evident whenever we discuss the series with dealers. Customers always seem interested in buying or upgrading a key date when they become available. Buyers want nice white coins with a strong strike and lots of luster.

WALKING LIBERTY HALVES: Walking Liberty Half Dollars remain a popular series. Still, the challenge of the early dates doesn't seem to stop collectors from trying to complete the entire series. The difficulty in doing so is amplified by the prohibitive cost in the higher grades. Bid for a 1916-47 set in MS63, for example, is an impressive \$87,438.

DOLLARS: Morgan Dollars have fewer plus signs appearing today than during the past few months but the demand is still very powerful. DMPL issues continue to be hotly pursued by several dealers. The Carson City demand is also apparent as common "CCs" in MS63 and MS64 are now \$185 and \$200 Bid respectively. The better date 1928 and 1928-S Peace Dollars are higher this week as well.

PROOF SETS AND MINT SETS: The Proof Set market continues to gain strength. We don't see as many dealers offering sets at Bid unless they are trying to move out an entire lot. There seems to be increased activity and interest for all the 2001 sets. Plus signs are seen for many Silver and Silver Premier sets with buyers looking for quantity. Mint Sets are steady.

COMMEMORATIVES: Silver Commemoratives are holding firm this week. However three better issues of the Silver series, the Hudson, Missouri 2X4 and the Spanish Trail are receiving some increased Bids. Gold Commemoratives are moving in the opposite direction with discounting taking place for select MS64 and better issues. Coin & Currency Sets, BU & Proof Silver Dollars and \$5 Gold Modern Commemoratives are doing well this week. Interest for Modern Commems overall remains strong.

TYPE: Dealers are still finding many of their customers looking to buy Type. Increases are taking place among Mint State Shield Nickels, Liberty Nickels, Capped Bust Dimes and Liberty Seated Dimes. Circ Type is doing very well with highlights found among 1796 Quarters and Capped Bust Halves.

GOLD: Weakness is dominating the Gold Type chart this week. Many denominations, from Gold Dollars thru \$20 Saints are among those loosing ground. Select issues grading MS63 and MS64 are being hit. Type II Gold Dollar spreads are tighter in AU58 with quantities remaining available at Ask as a slightly higher Bid is recorded.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed bid price. COLLECTORS DIGEST HIGHER LEVELS EARLY LARGE CENTS SOUGHT-AFTER

The Market in Depth

Demand from collectors remains in place and buyers are ready to take action when the right coin comes along. Some of the most die-hard collectors of all, those that collect Half Cents and Large Cents by date and variety, are a perfect example of this strong demand. An early Copper specialist said that the auction or private sale of important and scarce Copper coins usually command top dollar. The strong levels being paid for the tough early Sheldon numbers in XF and better indicates the strength of this collector base. When material dated from 1793 thru 1814 becomes available it can command very strong prices. The buyers are usually hard-core collectors but there are also a number of dealers that do battle for these coins as well. Early Large Cents in XF and better that are among the condition census can really attract powerful Bidders whenever and where ever they appear. Of course the low-grade material is also very highly sought-after too, as collectors love to just fill the holes in their collections and upgrade later. While exceptional strength is being experienced in this segment of the Large Cent market the same isn't true for the later dates from 1816 thru 1857. However, there are a few exceptions.

The Half Cent market remains solid at current levels. We continue to see strong interest for the 1793 and other Liberty Cap dates such as the 1796 With Pole variety. These are especially popular and in demand in all grades. One problem with the Half Cent market is that there just isn't enough material available for collectors to sink their teeth into. Early Copper does appear to be a trifle stronger than some early Silver Type. Early Silver Type coins may have even softened a bit, according to one specialist. The precipitous increase in Bid for several denominations of early Silver Type over the past few months has not gone unnoticed. The increase in first year of issue coinage and other early dates has especially caught the eyes of buyers. Increases have occurred in 1796 Draped Bust Dimes and Quarters, for example, and it takes some time for collectors to become fully acclimated to the new levels. Yet, we are still finding strong demand at higher levels and a shortage of material despite the increases. Consequently this market is still very solid.

This Week's Market

CENTS THRU HALVES: A sharply increasing Silver Spot is the catalyst for Bid increases found among some of the 90 percent Silver Dimes, Quarters and Half Dollars dated 1964 and earlier. State Quarters are generally steady with the Philadelphia strikes of Missouri, Michigan and Florida posting gains while New York is down.

MERCURY DIMES: Dealers looking to buy Mercury Dimes remain content with offering Bid for most dates. They especially want the key and semi-key issues but are not willing to push the Bid higher for this material at the present time.

WALKING LIBERTY HALVES: A lot of activity and action is taking place among the Walking Liberty Half Dollar series. Increases for select late date issues in AU condition are contrasted by the decreases occurring for similar issues in MS65. Also, strength remains apparent among many early dates.

DOLLARS: The remaining strong demand for Morgan Dollars is centered over the Carson City dates. It doesn't matter if these "CC" issues are Circulated, Uncirculated, DMPL, in GSA plastic, raw or have been seen by a third-party grading service because they are all hot! A few semi-keys also advancing include: 1895-S, 1901-S and the 1903-O. Peace Dollars are relatively quiet with only a couple of issues increasing.

PROOF SETS AND MINT SETS: The market for Proof Sets and Mint Sets weakened a bit as of this report. Several dealers are offering small quantities of sets at Bid, causing some minus signs to appear. If these sets are quickly absorbed it may point to a stronger market but if they are not there may be more minus signs ahead.

COMMEMORATIVES: Silver Commemoratives are generally solid at current levels. The Lafayette Dollar is one of the more popular issues because of its size, denomination and scarcity. Bid increases in MS63 and MS64 may point to continued demand from average collectors needing this key for their set. Gold Commems have come under some pressure with several coins being offered at discounted levels.

TYPE: Type is extremely powerful and presently leading the market. Circulated Type is especially sought-after with demand seeking many denominations from Large Cents thru Liberty Seated Quarters. Most other issues have supporting Bids. Early Half Dimes are higher in nearly all Circ and Mint State grades. Mint State and Proof Type are selectively advancing as well.

GOLD: Gold Spot is nearly \$5 per ounce higher this week and as a result, the Circulated \$20 Saints and Libs are following its lead. However the real story is the increases found among MS62 thru MS64 issues in several denominations. Strong bullion prices may have translated into increased interest for all Gold Type.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For Bid prices of coins certified by ANACS, NCI, PCGS, and NGC, please refer to the Certified Coin Dealer Newsletter.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are in the CDN.

...a Friday morning report on the Coin Market

CIRCULATED KEYS DIFFICULT TO FIND OCTOBER AUCTIONS REALIZE \$4 MILLION

The Market in Depth

Dealers are still absolutely thrilled with the rare coin market as we head towards the middle of October. One dealer commented that, "It has been a tremendous run." He is referring to the length of the latest bull market for rare coins that started over two years ago. He says that the market is doing exceptionally well across-the-board, although he does admit that Morgan Dollars are still among the hottest areas. His main base of customers are those solid collectors who have been around for some time. These are knowledgeable people that have middle class incomes and enjoy buying rare coins every now and then. Overall they generally do not buy the higher priced more expensive Mint State and Proof coins. Instead, they concentrate their collecting efforts on the Circulated examples of the popular late 19th and early 20th century series. These are collectors who are looking for nice Fine, Very Fine or Extremely Fine examples of many of the key and semi-key dates from those series. They do upgrade occasionally but they mostly enjoy filling the empty holes in their sets.

Key and semi-key dates remain in serious demand. It can be especially difficult to locate specific keys in attractive, no-problem Circulated condition. For dealers it can even be quite frustrating. Indian Head Cents and Buffalo Nickels are two areas of the market that are rich with better dates that dealers need for their customers. One dealer said that it is very difficult locating 1913-S Type 2 Buffalo Nickels in Good thru Fine. He only wishes he could buy multiples (10-20) in each grade at today's levels because those coins would immediately find homes. The difficult part of the coin market for him, like others we have spoken to is on the wholesale buying side. He attends shows and participates in auctions but it is still very difficult for him to find and buy the coins at reasonable prices. Often, many dealers just aren't able to find the coins at all, at any level. Patience is a virtue and many collectors are willing to endure the wait as the final reward is great.

Two early October auctions find \$4 million changing hands. The Collectors' Auction 2004 by Scotsman on October 8 in Saint Louis, MO realized nearly \$844,000. The Pevehouse/Davis Collections sale held in New York by American Numismatic Rarities claimed another \$3.28 million on October 11.

This Week's Market

MERCURY DIMES: Bids remain in place at their current levels for the majority of better dates in the Mercury Dime series. Higher Bids are occasionally seen chasing the key dates, like the \$6,700 Bid in MS60 for 1916-D examples.

WALKING LIBERTY HALVES: Walking Liberty Half Dollars are a bit mixed with higher Bids being tendered by one group of dealers while another is offering them at a discount. The declines are mainly targeting the late dates in the 1940s in MS65. Increased Bids are targeting the tough early dates such as 1928-S in MS65 and 1921-D in MS63 and MS64.

DOLLARS: Demand for Carson City issues is being maintained with plus signs appearing in Mint State and Deep Mirror Proof Like. Select San Francisco Mint keys are also advancing. Note the increase for the key, 1884-S in MS63 to \$20,000 Bid. One dealer told us that he is pleased with the recent Bid increases on the hard to locate 1894 but he still believes this date to be undervalued. Generic Peace Dollars in VG are lower as are 1926 specimens in MS66.

PROOF SETS AND MINT SETS: Proof Sets remain mixed as dealers continue to balance their inventories. A few of the early boxed sets are advancing including 1951, 1952 and 1955. The 1999-S Quarters and Silver sets are also up. A few late date Mint Sets are increasing as dealers begin to prepare their stock for holiday sales.

COMMEMORATIVES: Increases are still occurring for Silver Commemoratives, continuing the uptrend that began to get its legs in July and marched into August and September. Bidders are content in posting small increases for these collector coins that are readily salable to their customers. Dealers are looking for quantities of the California Diamond Jubilee in several grades. Gold Commems remain quiet. Silver Dollars in BU and Proof are advancing nicely among Modern Commems this week, especially the tough BU 1996 issues. Select \$5 and \$10 Modern Gold Commems are also higher primarily due to a higher Gold Spot.

TYPE: Strong Bids and interest are two characteristics of today's Type market. Plus signs are evident among Circulated, Mint State and Proof Type as dealers try to position themselves favorably in mid October. Liberty Seated and Barber coinage are dominating the demand among the Uncirculated Type charts with a similar scenario appearing for Proof Type.

GOLD: Gold Spot is up again, this time jumping \$8 per ounce since our last report. Consequently plus signs are crowding the Bid columns below. There is real strength for Type Gold in MS62 thru MS64 with several denominations participating. They ever popular \$2½ and \$5 Indians are up in MS65. Keep-in-mind that Gold Spot is still extremely volatile.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally - they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder - but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services, such as PCGS, NCI, ANACS, NGC, and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. ...a Friday morning report on the Coin Market

COLLECTORS ADAPT TO NEW LEVELS

DRAMATIC INCREASES DEFINE CURRENT BULL MARKET

The Market in Depth

This Week's Market

Many dealers are still considerably upbeat about the rare coin market. They see strong, continued demand from their customers and it is this support that keeps the market moving in the right direction. A few dealers have also voiced some concern about the sharp increases in several areas of the market over the past couple of years. For example, Small Size Capped Bust \$5 Gold (1829-1834) has increased dramatically in all grades since 2001. Bids have more than doubled for a couple of dates in the low circulated grades. Dealers know that it takes some time for their customers to absorb this development. This sticker-shock from the price hike since their prior purchase makes some collectors nervous and not as quick to buy. One specialist in early Gold said, "Collector/investors are (still) having a hard time justifying the increases." There is no question that these knowledgeable collectors definitely need and want these rarities but they are still having trouble committing funds at these **higher** levels. However, dealers believe that the levels are correct and that when their customers see the coins trading at public auction at these levels they'll be more likely to buy. Other areas that have seen their levels strongly increase include: 1796 Draped Bust Quarters, 1796-1797 Draped Bust Half Dollars and 1795-1803 Draped Bust Dollars. The Draped Bust Dollar increase, although dramatic is holding up well with strong demand continuing despite the sharp gains.

This week's Bid support and increases point to a market that is heading for the year-end finish line in excellent standing. Plus signs are again appearing in the Morgan Dollar and Type areas. Dealers still need coins to supply to their customers and so they are left with little choice but to offer higher Bids. Key dates are heavily sought-after with fierce competition among dealers for the few keys that appear at auction. Such competition will be in play when Bowers & Merena conducts their Rarities sale October 29th in Las Vegas, Nevada at the Mandalay Bay Convention Center. This competitive market is especially true for the no-problem **Circulated** keys. One dealer believes that these circulated keys are going to **new** collectors. This expanding collector base will just strengthen the bull market that's already in progress. It is currently a busy time of year that will only increase in intensity as we approach the holidays. Dealers need to prepare their inventories and schedules now so that they can accommodate their customer's demands as the holidays draw closer.

CENTS THRU HALVES: Several plus signs are present for early BU rolls. Buffalo Nickels, Mercury Dimes, and Walking Liberty Half Dollars are leading the way. Clad Proof 1999-S Connecticut Quarter rolls are needed at \$220.

MERCURY DIMES: Continued support is evident for this series and Dealers are content with current Bid levels.

WALKING LIBERTY HALVES: Strength, demand and beauty! Walkers continue to have an avid following in the market, even rivaling Morgan Dollars for the weekly limelight on occasion. A couple of early dates are increasing including the 1918-S now Bid \$4,600 in MS64. Also, notice the increase in the short-set key, 1938-D in MS64 at \$585 Bid.

DOLLARS: Morgan Dollars continue to be highly sought-after by dealers because they have ready customers waiting for select dates. Carson City issues are amazing. They continue to march higher in all grades as dealers strive to obtain these elusive rarities. One dealer is offering to pay \$50,000 for the first 1879-CC Capped Die to be certified MS66. Meanwhile, many other key and semi-key dates continue to advance in this extremely popular series. Peace Dollars are showing limited support at present levels with only a few modest gains.

PROOF SETS AND MINT SETS: Proof Sets have turned positive this week. Dealers are increasing Bids for several late date 10-piece, Quarter and Silver sets. Also the tough early Proof Set, 1938 is boasting a higher Bid at \$1,600. Mint Sets are mostly stable with a couple of sets recording plus signs.

COMMEMORATIVES: Isabella Quarters are up in MS65 & MS66. The always popular Lafayette Dollars are surging upward with plus signs in most Mint State grades. Very Choice and Gem Hawaiians are also elevated this week. The 1936 Texas PDS Set is reflecting keen interest and Bids are up in MS60 through MS64. Gold Commems are suffering some more discounting that we noticed during the first week of October.

TYPE: Continued interest and support from both dealers and collectors are the key ingredients in sustaining the strong market for both early Mint State items as well as for those "good for the grade" Circulated collector coins. Barber Quarters and Type II Standing Libs are up in MS65. The always in demand 1793 Half Cent is seen posting solid gains in the VG-VF columns. Half Dimes are posting big gains with the Bust and Liberty Seated coinage showing a plethora of plus signs in grades VG thru EF. Proof Type is revealing many gains with Gobrecht Dollars, Capped Bust Quarters and Flying Eagle Cents each posting higher Bids. Again Type is very strong!

GOLD: In spite of a \$6 drop in Gold Spot, Type Gold in MS62 and above is generally moving higher. High Reliefs, Saints and Type II \$20 Libs are posting some gains in MS62, MS63 and MS64.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight–seen**. The coins may be certified or “raw” (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen** raw coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder – but will be strongly influenced by **Bids** which are higher or **Sells** which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer–to–Dealer transactions – you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the 5-mint issues) are worth more than listed prices. M5-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

ACTIVE MARKET CONTINUES
HIGHER BULLION BRINGS COINS TO MARKET

The Market in Depth

The market continues to shine as October draws to a close. It has just been another very successful month for rare coins and most dealers that we speak to on a regular basis are pleased. Naturally we are mainly hearing good things about the market but there are some dealers who believe some resistance is being experienced at current levels. However the majority opinion is that the strength and duration of this bull market are among the longest that dealers can remember. One dealer said, "This has been the longest sustained run that we've ever seen." This kind of optimism is especially gratifying as it is being experience at a time where our economy is still less than robust. Some dealers are crediting this favorable numismatic market to the registry set phenomenon that has taken hold in a big way. Dealers suggest that this new form of collecting has brought "new players, new blood and new money" all chasing after examples that are among the finest known.

The rare coin market and its activity also seem to be immune to the swirling political climate that finds a Presidential election less than one week away with poles putting both candidates in a virtual tie. Instead, most dealers see the market gaining momentum as the precious metals continue to prosper. Another sees the current increase as the beginning of a market peak. He sees many sellers of generic Gold and Silver coins into this market. He believes that they are using this bullion rally as an opportunity to unload many of these common coins for quick profits. He has customers looking to sell common date BU rolls, and other Gold and Silver related items at the new higher levels. Of course, those buying them believe that bullion will continue to rise, serving them well.

Better date and generic Morgans are in fine shape as are Silver Commemoratives. Late date Walkers are soft, with a number of issues being offered at lower levels. Gold Commems are also weak, adding some credence for those that believe we may be topping out. Still, increases and strong Bids are being backed-up by customer want list demands that have yet to be filled. Many of their needs include those precious key and semi-key dates. Dealers tell us that these are the bread-and-butter coins that are so desperately wanted. Unfortunately, these are also the coins that remain in short supply as we close out October. This collector demand goes a long way to the continued prosperity of the rare coin market. However, it will be interesting see if this demand can be sustained thru the balance of 2004.

This Week's Market

MERCURY DIMES: Mercury Dimes are still sought-after at present levels with a continued active market for the early "keys" and those tougher late dates.

WALKING LIBERTY HALVES: Early Walkers are still very active and in demand. Notice the rare 1921 is now Bid at \$13K in MS65! The 1929S is also increasing in MS65 along with a few Philly issues in '30s. Weakness is being experienced within the short-set with a decrease of \$440 for the 20 coins in MS65.

DOLLARS: Common is the "King" this week as all of the Morgans considered as "Type" are sporting gains in MS65, now Bid at \$128. DMPL's are attracting further demand resulting in higher Bids. There is still no let-up in the Carson City contingent! Leading the way is the 1893CC, at \$39K in MS65. The 1889CC is also posting a gain in AU. Peace Dollars remain quiet in this edition.

PROOF SETS AND MINT SETS: Early Proof Sets are still exhibiting strong support at present levels. Many late date Proof Sets and Mint Sets have little support and are being discounted.

COMMEMORATIVES: The break-neck speed that has exemplified the rise in the Silver Commems over the last few months has slowed down a bit. However, increases are continuing for the Rhode Island set of 1936 with a \$30 Bid jump in MS66. Both Missouri Halves are wearing plus signs in MS63 & MS64. The Lincoln, Lynchburg, Long Island, Maine and Maryland are all posting modest gains. Early Gold Commems are still struggling to garner support at the present levels. Modern Silver Commems are displaying numerous increased Bids for Silver Dollars in BU & Proof. \$5 Gold Commems are also exhibiting renewed interest.

TYPE: Uncirculated Type has again made its stand with strong support from dealers and the ever increasing collector base clamoring for quality Type coins. The Liberty Seated Dime and Quarter tandem has claimed increased Bids in MS63. The 3¢ Nickel has found a new following and is boasting gains across-the-board in the VG-MS60 Bid columns. Proof Type is for the most part stable with dealers' content at the present levels.

GOLD: This component of the market is being fueled by the surging price in the precious metals. With the Spot price of Gold nearing the \$430 level we see the necessary adjustments in Bid for lower grade Eagles and Double Eagles. Gains are observed for all denominations throughout the Mint State Bid columns.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen raw coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

* Dealers are responsible for ensuring that coins they offer meet our particular grading criteria. Coins graded by PCGS, NGC, ANACS, IGC and any other services may not conform to the grading standards as interpreted by Heritage Auctions. Therefore a specimen could be worth more or less than the listed Bid price. For more information please refer to the Certified Coin Dealer newsletter.

GENERIC MS65 MORGANS HIT \$132

\$5.3 MILLION HAMMERED DOWN IN LAS VEGAS

The Market in Depth

November begins with dealers still expressing much optimism about market conditions. Many of them do acknowledge that the market "did soften a little," but the general consensus is still very positive. One dealer put the decline in terms of the popular Morgan Dollar series. It is a case where Carson City, key dates and select generics have remained hot while the "slightly better dates" are off.

Strong demand that is still unsatisfied continues to supply the support needed to keep this bull market moving forward. Higher bullion values have helped to supply added fuel by strengthening the collector base. Dealers know that the next couple of months will be important ones for them. They are trying to build up their inventory levels and at the same time buy the coins that are necessary to fill their holiday orders. Yet, dealers have repeatedly told us that it has become extremely difficult for them to buy coins. We aren't just talking about any ordinary coins, but we do mean those coins that are realizing **exceptional** demand today. For example, they are looking to buy Mint State and Proof Type grading MS66 and PR66 and better. Attractive coins at the 65 level are also given consideration. Dealers say that there is a sophisticated and well-heeled group that is waiting to buy this material as it becomes available to them. Many of their better customers are waiting in the wings for such an opportunity. Key date Morgans and key dates of most any series in any grade has also become quite a target. Yet the road has become quite bumpy for some dealers. They are finding, more and more, that they must compete with collectors who are participating in public auctions. The result of this added competition is higher prices realized and less lots won. Consequently, for dealers, it is more difficult to buy at current levels and it is extremely difficult to maintain a good inventory. This will be on their minds as the November auctions get underway, first in Palm Beach Florida November 4-6. Stack's will host a sale November 17 in New York and then it's on to the Superior sale in Santa Clara, California November 18-20. The Bowers & Merena Mandalay Bay Rarities Sale realized \$5.3 million October 29 in Las Vegas. A couple of highlights include a Morgan key, an 1884-S in MS63 that brought \$27,600 while a key Barber Quarter, 1896-S in MS65 grabbed \$34,500.

This Week's Market

CENTS THRU HALVES: The roll market remains strong in several areas from Jefferson War Nickels thru Kennedy Half Dollars. Substantial Bid increases are noted for a few Washington Quarter rolls from the early 50s.

MERCURY DIMES: Mercury dimes are affording strong support at present levels with a 10% higher Bid of \$4,400 seen chasing the rare 1942/41D in MS65.

WALKING LIBERTY HALVES: Demand is evident and abundant for the early issues in this always popular series. The elusive 1921 PDS trio are each fighting for bragging rights, all posting gains in Mint State 60. Even though no minus signs are present, the short-set continues to be soft in MS65.

DOLLARS: DMPLs take the spotlight with a myriad of plus signs across-the-board. Several rare and key date Morgans are in continued demand and are racing upward via higher Bids within this immensely popular series. The 1893S is posting robust Bid increases in XF-AU and is now at \$79K in MS63! The 1889CC, 1895S are also making noise with higher Bids. Common MS63 Morgan & Peace Dollars are a bit lower, conversely their MS65 counterparts are still seen posting gains.

PROOF SETS AND MINT SETS: The continued demand for early Proof sets seems to have spilled over to several 1950's sets. Other late date issues are mixed and looking for direction.

COMMEMORATIVES: Silver Commems are still being sought-after and Bids generally confirm this in MS64 and MS65. Although not sparkling with an over abundance of plus signs this week, notice that the stalwart Lafayette Dollar is still making noise with an increase in Choice grades. The Long Island and Maryland entries are following their leads from last week each posting a modest gain in Gem. Losses are observed in some MS66 examples with the Alabama, Arkansas Type and Vermont each surrendering Bids. Gold Commems are again struggling, exhibiting little support at the present levels with a few issues wearing losses.

TYPE: Type remains as the architect and cornerstone governing this splendid market we are in. With no apparent weakness in Type, we again find dealers scrambling to purchase quality examples for inventory and to satisfy the growing legion of collectors that demand the best available coins. Type I 3¢ Silvers and Capped Bust Quarters are each attracting higher Bids. We are also observing increased activity and elevated Bids for Trade Dollars in MS60/PR60. The rare Gobrecht Dollar is flashing plus signs in Choice grades.

GOLD: The frenzied bullion market finds Gold & Silver each pulling back a bit this week. However, the glitter is still present with advances shining on most all Mint State denominations. The spectacular High Relief Saint is leading the pack boasting gains in grades AU thru Gem.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer–to–Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight–seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally – they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight–unseen** market, which already include consideration of certification costs. Bids for a **sight–seen** raw coin may be higher or lower than for a **sight–unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder – but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer–to–Dealer transactions – you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem" full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT; Mercury & Walker singles are in the CDN

GOLD & DOLLARS STAY HOT
ACTIVE MARKET HITS SOUTHERN FLORIDA

The Market in Depth

The market remains extremely active as dealers desperately try to find coins for their customers. This was true November 4-6 in Southern Florida. The new West Palm Beach Coin Show was a **big hit**, according to several dealers that attended. It's obvious that dealers appreciate the excellent location and facilities, not to mention the strong collector base in that part of the country. One dealer said, "It was exceptional for a first show." He added, "It was active and I think it's going to continue to be successful." Everything, especially early Gold and Morgan Dollars was in demand on the bourse. However, there is no rest for dealers as many of them will now head west to attend the Santa Clara Expo in California, November 18-20. Superior will conduct an auction in conjunction with the show. Some dealers are likely to make a quick detour to New York first to participate in the Stack's auction on November 17 before continuing on to Santa Clara. This hectic schedule is sure to keep dealers very busy this November. One northeastern dealer that we spoke with who didn't attend the Palm Beach show said, "I just can't keep up." Strong demand continues to fuel the increased activity for him trying to fill orders. Many of his customers are still ordering rare coins from the fixed price list that he sent out several weeks ago. Like most dealers, he has not been able to buy enough of the coins that his customers are looking for. He says, "The market is active and strong." However, he does admit that the large number of "rapid price increases," that was evident in previous months, has curtailed a bit. He believes that we may have entered a period of consolidation, a condition that is very healthy for the market.

Gold bullion has done wonders to keep the market moving forward in November. Gold has now crossed the \$435 per ounce level and interest for the yellow metal continues to grow. Dealers are trying to fill orders for anything Gold, from bullion coins thru MS65 \$20 Saint-Gaudens. Drove of plus signs continue to appear below, throughout the Gold Type Bid columns as many dealers are just trying to get aboard this train in a hurry. The increase in bullion has increased demand for Gold Type of all denominations with MS63 thru MS65 Gold being hotly pursued.

This Week's Market

MERCURY DIMES: Mercury Dimes seem to be attracting more interested Bidders at the present levels and are gaining momentum as the year comes to an end. We note strong support for the early issues. The 1919D is now commanding a Bid of \$4,600 in MS64FB.

WALKING LIBERTY HALVES: Serious activity and continued support are still seen embracing the early to middle years of the series. Several 1930s Philly issues are poised with gains in Gem. The short-set dates are still seeing a bit of softness in Mint State with many issues now lower in MS65.

DOLLARS: The dependable and popular Morgan Dollar series is still the leader as we head into mid November. Strength and solid demand highlight this report with a host of plus signs throughout. The 1896S, 1898S and 1903S are all posting multiple gains. Peace Dollars are lively with common 65s now Bid at \$136.

PROOF SETS AND MINT SETS: Several dealers have been caught by surprise and did not buy enough 2004 Mint Sets for holiday sales. They are now Bid \$19 in the after-market with few sellers visible. Early Proof Sets remain in strong demand with a number of buyers present.

COMMEMORATIVES: Along with Gold and Morgan Dollars we find that Silver Commems are one of the many series that are continuing to participate in this sterling market. We find strong Bids in place for several issues grading MS64 and MS65. Gold Commems are still looking for direction and are languishing at the present levels. Modern Commems remain active with a few plus signs chasing 1995-96 Olympic issues in Proof.

TYPE: Dealers are finding themselves in a quandary almost weekly, trying to figure out what to buy and what to inventory. Not surprisingly, we observe a multitude of plus signs with Proof Type and **high-end** early Uncirculated Type trumpeting the way. Flowing Hair and Draped Bust Dollars and Half Dollars are seen posting strong increases in Choice grades. Others participating include the Liberty Seated and Barber series. Take note, PR64 Red Matte Proof Lincolns are enjoying a 27% increase over our last report.

GOLD: With Gold spot hovering around \$435, the excitement that this high flying bullion rally has sustained and its effect seen carrying over to the numismatic arena is amazing. We note that virtually all Mint State Type examples are glimmering with plus signs. The scarce Type II \$20 Libs are posting solid gains in Choice grades.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be **certified** or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally: they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** raw coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions: you should expect to pay a premium above Ask when purchasing coins in a retail transaction, you may also commission a Dealer for your purchases.

The Bid prices listed within represent what individual dealers are willing to pay for coins that meet their particular grading criteria. Coins graded by other dealers or grading services such as PCGS, NCI, ANACS, NGC and any other services may not conform to the grading standards as interpreted by the dealer or dealers whose bid is represented within. Therefore, a specific coin could be worth more or less than the listed Bid price. For listed Bid prices of coins certified by ANACS, NCI, PCGS, and NGC please refer to the *Certified Coin Dealer* newsletter.

The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

FINEST KNOWN

In a recent independent survey of PNG members, NGC was the *only* service to achieve a **"Superior"** grade in *all* 12 categories.

Value. Consistency. Accuracy. Expertise...

The details matter to the serious collector. And every numismatist should be as discerning about their grading service as they are about their collectibles. As the *only* grading service to receive **"Superior"** ranking in *all* 12 categories, NGC has shown that our commitment to the details is appreciated by those who know and love this hobby.

To get that commitment working for your collection,
call 800-NGC-COIN or visit www.NGCcoin.com.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben

President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

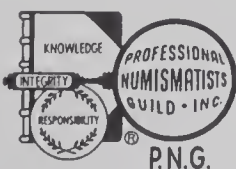

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

Selling Coins or Currency? Consider This Advice About Spectrum From An Experienced Collector...

Is it time to sell? Want to be sure you'll choose the selling options that produce the maximum return for your coins and currency?

Thousands of experienced collectors, investors, dealers, and institutions contact Spectrum every year. Most of them decide to use our services. Read this satisfied client's letter to learn why he chose Spectrum...

"I had an extensive group of slabbed coins and since time was not the most important criteria (total return was) I was directed to speak to Paul Song at Teletrade. He is setting the initial selection up in a Kingswood Auction with a few of the modern selections to be auctioned in a Teletrade Auction.

I feel that you provide excellent service and would not hesitate to recommend your firm to others looking to sell their collection. I think it is ideal to have the options available through your company - Spectrum, Teletrade, Kingswood, Bowers & Merena - to make available a variety of ways to disperse a collection of coins. I will contact you when I have any other coins I want to sell. Thanks again."

. . . a Friday morning report on the Coin Market

HIGHER PRECIOUS METALS BENEFIT MARKET FINEST KNOWN STRAWBERRY LEAF CENT HITS AUCTION BLOCK

The Market in Depth

Rising Gold and Silver Spot prices continue to add fuel to an already charged numismatic marketplace. Gold is now testing the \$440 per ounce level while Silver holds above \$7.50 per ounce. The sustained increase in the precious metals has given the bull market for rare coins a helping hand. Just glimpse at the number Bid increases for Gold Type coins for example. One rare coin analyst believes that things are in place to push us into the next leg of the bull market in 2005. He says that the expectation for future increases in the inflation rate may be the main catalyst. A large number of people, this year, have already sold into the Gold and Silver rally but he expects next year will be different. He believes an increasing number of people will be interested in **buying** Gold and that will translate into more buyers of numismatic coins. In turn, he expects "a broad-based increase" to take hold with strong demand targeting everything from Type thru rarities. He feels this demand will be easily seen at auctions and shows. Dealers that maintain an interesting and diverse inventory will benefit the most. It will also be equally important to maintain a solid cash flow position. This will allow dealers the opportunity to capitalize on any number of important coins or deals that may come their way. One dealer boasted that "major increases of 100 percent or more" are possible in select areas of the market as the number of buyers overwhelm the number of rare coins available.

The November 18-20 Santa Clara Expo along with the Superior auction will present dealers with plenty of opportunity to adjust their inventories. Upon this show's conclusion, many will head east to participate in the auctions that precede and occur during the Baltimore Coin & Currency Convention December 3-5. Bowers and Merena will conduct an auction in conjunction with the show December 1-4. Prior to the Baltimore Convention David Lawrence will conduct Part II of the Richmond Collection November 29. Next, ANR will host the Frog Run Farm collection November 30 thru December 1, a few highlights are listed here.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally. They do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen raw coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

This Week's Market

CENTS THRU HALVES: A number of higher Bids are in place for Lincoln Cent rolls of the 1930s. Interest is also evident among some better date Washington Quarter rolls. State Quarters from the first 30 states have been released with P&D bag sets being offered for \$88,000.

MERCURY DIMES: A few small increases are seen but the bigger picture is in the large number of supporting Bids, especially for the better Full Band issues. Competition for these dates is still very evident at public auctions.

WALKING LIBERTY HALVES: Like last week, minus signs continue to be seen for issues dated after 1934 in MS65. However, the strong demand for the better early dates still dominates the Walking Liberty Half Dollar landscape. For example, 1918-S is receiving a \$200 Bid increase to \$4,800 for examples grading MS64.

DOLLARS: Morgan Dollars are entitled to receive some profit taking and that seems to be the case for select examples this week. Still, strong underlying demand remains in place preventing anyone from thinking that Morgans may be falling out of favor. Additionally we see a few increased Bids for MS66 "CCs," and for some better dates including: 1893-O, 1895-O and 1903-S. Meanwhile, generic MS65 Peace Dollars are now \$140 Bid. Check out the 30 percent increase for 2001-S Proof Sacagawea Dollars. A couple buyers are looking for quantities.

PROOF SETS AND MINT SETS: Many Proof and Mint Sets are being discounted this week as sets are being offered at lower levels with the usual support being absent. However, there are a small number of Proof and Mint Sets bucking the trend with plus signs. Market-makers have now pushed 2004 Mint Sets to a Bid/Ask of \$23/\$26.

COMMEMORATIVES: Silver Commemoratives continue to make believers by adding a few more plus signs following last week's gains. MS64 and MS65 seem to be the desired quality level as dealers try to load-up on some very affordable issues. It just may seem like a long time, but we finally see a couple of increases for Gold Commems. Identical Bids of \$1,775 are in place for MS65 examples of 1915-S \$1 Pan-Pacs and 1916 \$1 McKinley Memorials in MS65.

TYPE: Increases from the past several weeks and months have been absorbed with supporting Bids being maintained. Dealers continue to service their customers who are looking to buy more Type. Increases are noted among Mint State Liberty Seated Half Dollars and Type 2 Standing Liberty Quarters.

GOLD: Gold has certainly hit its stride with a huge number of plus signs blanketing our Bid columns. Notice that the increases are targeting the more common Gold issues in the more numismatic grades of MS62 thru MS65. We know that there are some serious collector/investors trying to add to their positions.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

SANTA CLARA HAS GOLDEN TONE EAST & WEST COAST AUCTIONS TOTAL \$3.7 MILLION

The Market in Depth

Strong Gold bullion prices set the tone that led to a "very very strong" show November 18-21 in Santa Clara, California as one dealer put it. Another dealer simply said it was "excellent." The pre Thanksgiving holiday Expo realized a very good attendance as many dealers traveled a great distance to attend the show and they weren't disappointed. "Generic Gold is red hot!" This is according to one east coast dealer that was in California. Dealers tell us that they have growing want lists for generic Gold in quantity. For example, generic MS64 and MS66 \$20 Saint-Gaudens are needed in quantities of several hundred examples. All denominations of generic Gold seem to be facing strong demand as more and more believers are scrambling to have their share of the golden pie. However, Santa Clara was much more than just Gold. An exhibit featuring the James A. Stack/Richmond Collection NGC PR66 1894-S Barber Dime helped to attract a number visitors as well. Bust Type in all denominations was also heavily sought-after. Those dealers that were inventory rich had no trouble selling their coins for strong money. Those looking to buy found themselves paying above what they expected to pay to be successful. Dealers won't have to much time to rest, even though there is a holiday. Baltimore begins December 2 and the auctions that surround it are also necessary for dealers. The show schedule is hectic at this time of year but most dealers are feeling pretty good about Gold, the market,

Auction	Date	Denomination	Grade	Realized

Stack's	1924-S	\$20 Saint-Gaudens	MS64	\$18,975

and their bottom line. Prior to the Santa Clara Expo, Stack's November 17 sale of United States Gold, Silver and Copper Coins realized \$1.39 million in New York. Superior conducted the Santa Clara Elite Coin Auction November 18-20 in California. This sale brought \$2.32 million. We have listed a few highlights of each sale.

This Week's Market

MERCURY DIMES: With exceptional drive and Bid support prevalent among the key early issues, Mercury Dimes appear poised and ready to take some of the spotlight. The rare and always in demand 1916D is now sporting a \$6,750 Bid in MS60, the scarce 1919S is higher in MS64FB & MS65FB; and the 1923S is now at \$5,750 in MS65FB.

WALKING LIBERTY HALVES: This popular series is like the *Tale of Two Cities*. Bids are solidly in place for the coveted Mint State examples dated from 1916-1933. Yet we are again observing a further weakness in the MS65 Short-Set.

DOLLARS: DMPLs are again in the driver's seat blanketing the Bid columns with plus signs. Note that the 1886S, 1888S and 1901S are each boasting multiple increased Bids. Peace dollars are active with 1924S now Bid at \$400 in MS63.

PROOF SETS AND MINT SETS: With the exception of the 1938 set there is continued support for early sets. Later issues and Mint Sets are still mixed and looking for direction.

COMMEMORATIVES: Some Silver Commems have slowed, with Alabama, Bridgeport, Cincinnati and Vermont issues suffering losses in MS66. Several others are exhibiting weakness in MS64. However, in spite of the above statements there is still strong underlying demand for most issues in Choice and Gem grades. Gold Commems reveal marginal support, with the Sesquicentennial acquiring a modest increase in MS64. Conversely, Modern Gold Commems are riding in with a plethora of activity due to the continued surge in the Bullion market.

TYPE: It is exceedingly apparent that the numismatic market has a lot to be thankful about and Type should be the centerpiece for us to marvel at. We can again report that Mint State Type examples are hot and in continual demand, with collectors and dealers keeping them at the top of their most wanted list. We observe virtually unwavering support at present levels, with the Liberty Seated & Standing Liberty Quarter duo flashing plus signs in MS64 & MS65 respectively. Proof Type is also continuing to harbor broad-based interest.

GOLD: As we go to press Gold is again on the threshold of \$450 per oz. As one might expect activity is spirited and we again observe a tidal wave of plus signs encompassing virtually all Mint State Type examples reported below.

The weekly COIN DEALER newsletter [the *Greysheet*] reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins **sight-seen**. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen** "raw" coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

GREYSHEET GRADING STANDARDS

Numbers are used as shorthand for adjectival grading. The following descriptions are used throughout the CDN to designate the exact quality of Brilliant Uncirculated coins. Grade descriptions do not necessarily apply to modern government issues because they are handled more carefully when minted; therefore, they are all usually high grades.

MS60-Unc.: May not have full mint lustre, may be dull, toned or spotted. May be the worst possible example, shows no wear or damage. Will be bagmarked and/or weakly struck.

MS64-Distinct BU: Far and away nicer than MS63, yet a near miss MS65. Few Contact marks in field, only minor marks on main devices. Full strike, with eye-appeal. Attractive toning permissible.

MS67-Superb: Will be 100% fully struck and virtually perfect in all other respects. Prices of such seldom encountered specimens are based upon the merits of each coin. They range from very scarce to unknown according to date.

MS63-Choice BU: Brilliant Unc. (may exhibit some toning, but it should not be so dark as to hide any problems); will have minor bagmarks and may show weakness of strike. Above average coins.

MS65-Gem BU: Sharp, full strike, full lustre. NO major distractions in field or on main devices. Attractive toning permissible. A very tiny percentage of available BU coins make this no-question grade. Must have eye-appeal.

Deep Mirror Prooflike: Will exhibit the same characteristics as the corresponding Mint State Morgan, but with the additional feature of deep mirror surfaces on both sides.

NORWEB 1885 TRADE DOLLAR REALIZES \$1 MILLION BULLION CONTINUES RALLY

The Market in Depth

Dealers knew that the coin market was warming up judging by the activity and sales that took place in California in late November. Santa Clara and the auction activity taking place there was a strong indication that the market is continuing to demonstrate exceptional strength. Many dealers expect the strong levels to be maintained through December as they have for most of 2004. Much of the optimism is directly due to the continued upsurge in the price of Gold. Dealers are very bullish now that the \$450 per ounce benchmark level has been breached. Silver is also creating some excitement of its own at \$7.77 per ounce. Increasing precious metals prices have brought out many buyers. These buyers are looking to purchase bullion coins and some are becoming interested in numismatic examples. That interest, on top of the strong demand already seen in the marketplace, has many dealers wearing optimistic smiles as they look forward to 2005.

November has certainly concluded on a positive note. An 1885 Proof62 Trade Dollar brought just over \$1 million at the Richmond Collection Part 2 auction in Baltimore. The \$7.3 million, record setting November 29 sale was conducted by David Lawrence Rare

Coins. This particular famous rarity was formerly part of the Norweb collection. We have included a few of the many highlights from Part 2 of the Richmond sale.

Semi-key and key dates of all areas of the market continue to face extraordinary demand. Dealers are doing their best to bolster their inventories by increasing Bid and their advertising. However they are facing stiff competition when some of these coins surface at public auction or on the bourse at major shows. Competition for this material will certainly be running high at the December 2-5 Baltimore Coin and Currency Convention. Dealers will work the bourse early with want lists in hand and a willingness to pay nearly whatever it takes to be successful. Better date Morgan Dollars, among others seem to be on everyone's list these days. It's not easy to find these scarce dates and we know that many dealers are looking to buy the keys in quantity. Dealers will need to be in the right place at the right time with enough funds to be successful.

This Week's Market

CENTS THRU HALVES: With Silver on the rise we note several increased Bids for Bullion sensitive rolls. 2001S Clad Proof State Quarter rolls are poised with gains, now at \$100.

MERCURY DIMES: Again in this edition we observe further support and interest for this attractive series. Please note that the 1924S is sporting raised Bids in both MS64FB and MS65FB.

WALKING LIBERTY HALVES: Walkers remain divided with solid demand and supporting Bids present for 1916-1929 issues with the short-set again suffering further losses, primarily in MS65.

DOLLARS: Morgan Dollars are taking the lion's share of this week's bright spotlight. Collector coins within this series are experiencing elevated Bids and momentum as we close out 2004. Virtually every "CC" issue in Circulated grade has a plus sign. The rare 1893S is again boasting raised Bids in grades VF thru MS63. Look at the popular 1894 issue, running rampant with accelerated Bids across-the-board, now at \$27,500 in MS65. DMPLs are again unrelenting with a multitude of higher Bids. Peace Dollars are stable with several posting modest increases.

PROOF SETS AND MINT SETS: Early Proof sets (1936-1954) are stable with no increases to report. Several mid to late date Proof sets and Mint sets are weak with minus signs blanketing the majority. 2004 11-piece Clad Proof sets are no longer available from the Mint, resulting in an initial after-market spread of \$35/\$39. 2004 Mint sets jumped considerably, now Bid \$31.

COMMEMORATIVES: Silver Commems are higher with Connecticut, Iowa, Roanoke, San Diego, Stone Mountain, and York issues each mustering higher Bids in Gem. Gold Commems are for the most part stable with the Pan-Pac \$1 & 1916 McKinley up in MS65.

TYPE: Both Uncirculated and Proof Type appear not to have taken a Holiday! Instead we observe them boldly barreling into December with a barrage of activity and raised Bids. Classics are always in vogue and Early Type is again overwhelmingly in charge. The tough to find and always in demand 1793 Chain Cents are bursting forth with increases in Good-Fine. Capped Bust Half Dimes are gleaming with plus signs in all grades from Fine-MS63. Bust Dimes Quarters and Halves are all participating in this exemplary display of strength.

GOLD: With Gold now over the \$450 level, this resilient rally is responsible for higher offers on practically all of the issues listed below in MS62 - MS65. The resounding strength for Gold Type is clear with dealers scrambling for generic Gold coins for both inventory and the ever growing legion of eager collectors coveting the yellow metal.

The weekly COIN DEALER newsletter (the Greysheet) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading MUST ADHERE to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally, they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions, you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and generally reflect the date of the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full steps" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.

...a Friday morning report on the Coin Market

GOLD ON FIRE IN BALTIMORE DEALERS FACING SHORTAGE OF MATERIAL

The Market in Depth

The amount of Wholesale activity taking place at the December 2-5 Baltimore Coin and Currency Convention was "crazy." The market is certainly alive! Most dealers remain upbeat and positive about the market and are expecting good things to continue in 2005. The lack of product has been a problem that dealers have been facing throughout much of 2004 was certainly evident in Baltimore. There is not enough material to satisfy the strong demand that's currently chasing these coins. Dealers also expressed their difficulty in buying coins at public auction. They see strong competition taking place during auction battles with several Bidders willing to pay exceptionally high amounts. Dealers are trying to be aggressive but it's difficult for them to commit if they don't already have a buyer waiting in the wings. One dealer simply said that "serious demand" is overwhelming the current supply of nice material. The December 2-3, 2004 Baltimore Auction by Bowers and Merena realized \$3.37 million. We have listed a few of the many highlights.

Gold is still leading the market to higher ground. Demand for Gold Type in Baltimore was obvious from the beginning with dealers trying to fill multiple orders from their customers. Spot Gold is holding above the \$450 per ounce level and that has helped to add many new buyers to an already frenzied Gold market. Dealers have several customers looking to buy \$20 Liberty and Saint-Gaudens in quantity. They are willing to take just about any grade they can find. Other Gold denominations are also high on their list of needs. Generic Gold with carbon spots is now readily being accepted for slight discounts of \$10-\$15 below Bid. Type is another area of strength at the moment. Dealers tell us that "Bust material is still on fire." Prudent collector/investors are working on Bust sets and they are willing to pay strong money for select dates. Keep in mind that Bust

material is not as available as the more popular series like Morgan Dollars for example, and so dealers need to be fast and willing to write a check at a moments notice. Collectors are buying Bust coinage in all grades and dealers expect this trend to continue at the important Florida United Numismatist show and auction in Fort Lauderdale January 13-16, 2005.

This Week's Market

MERCURY DIMES: Mercs are displaying continued demand and interest. The scarce and rare dominate with the 1916D advancing in MS60-MS64 and the popular 1942/41D commanding attention with a quartet of raised Bids.

WALKING LIBERTY HALVES: This series strength is showcased this week with the 1921PDS trio posting impressive multiple gains in AU50-MS64. The 1938D is surging up, flashing multiple raised Bids in MS60-MS64. Other than the 1941S, the short-set in Gem is still wearing losses.

DOLLARS: Morgans seem to cast a spell with their beauty and affordability. Collector coins or rarities, the spotlight is on both! We observe a multitude of raised Bids for most Circ issues in the "CC" contingent as well as Unc examples of the rare 1895S and 1893O. Look at the 1893CC now at \$39,600 in Gem! DMPLs continue to thrive and Peace Dollars are exhibiting rejuvenation and support with the semi-key trio of 1924S, 1926D & 1927S higher in Choice and Gem.

PROOF SETS AND MINT SETS: Support is still present for the 1936-1954 Proof sets, with mixed signals prevalent for later issues. 2004 Mint Sets and Proof Sets remain active now Bid \$33 and \$38 respectively.

COMMEMORATIVES: Silver Commems, one of the more intensely collected series, are still in favor, fashioning a wealth of continued interest. The low mintage and tough to find 1928 Hawaiian Sesquicentennial is displaying a generous increase in MS64 & MS65 with the latter at \$4,300. The Delaware, Gettysburg and the 1937 Arkansas PDS set, are seen rolling along posting minor advances as well. Gold Type may be shining but someone forgot to inform the Gold Commems of this, as we find both 1903 LA Purchases, 1916-17 McKinley and the Grant No Star to be lower in Very Choice thru Gem.

TYPE: Dealers are banging away at the Teletype placing higher Bids, vying for quality material, trying to keep the impassioned drove of new collectors content as they attempt to stay one step ahead of the stiff competition. Unfortunately, they will have to contend with more heated activity as the Barber Series trio is parading in with a potent increase for nearly all coins in MS60 thru MS65. Shield Nickels along with 3-Cent Silvers & Nickels are advancing in Circ grades. The Proof Capped Bust Dime and Quarter duo is making noise with multiple advances.

GOLD: The "Gold Bug's" bite is tenacious as the yellow metal's continued rise helps fuel this remarkable market. We observe no let up in this dazzling display of confidence and excitement which translates again to higher Bids for virtually all Mint State Gold listed below. The scarce No Motto \$5 Lib is now at \$8,000 in MS64. We also note that the more bullion sensitive Circ \$10 Libs and \$20 Libs/Saints are elevated.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the level at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified sight-unseen market, which already include consideration of certification costs. Bids for a sight-seen "raw" coin may be higher or lower than for a sight-unseen certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder but will be strongly influenced by Buy which are higher or Sells which are lower than current Bid/Ask levels. INVESTOR/COLLECTOR NOTE: The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

When it's time to sell...

JMRC will pay you more money for your coins.

John Maben
President & Chief Numismatist
John Maben Rare Coins, Inc.

Grading expertise equals a higher price when selling. The most confident and qualified graders can afford to pay you the highest prices for your coins.

Larger advertising budgets do not translate into higher prices for your coins, and may in fact be a drawback as somebody needs to pay those bills, and that somebody could be you! Some can legitimately claim more experience than their competition, but bear in mind, the length of experience means nothing compared to the depth, quality, and relevance of the experience itself.

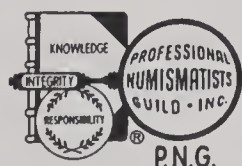

So while there are many coin companies you could go to, many with fine numismatists, there are few who can offer you the consistent high level of grading expertise of a former NGC Grading Finalizer, like John Maben.

Where does this grading expertise come from? From grading and finalizing millions of coins of all types, conditions, and rarities. And not just a "look and go" grade, but at a level of focus and expertise that helped maintain an industry standard for virtually all marketable US coins, for nearly a decade.

When selling, your goal should be to maximize the value of your coins. JMRC stands in a category of its own, uniquely and better qualified to accomplish this goal for our clients through a variety of means.

Find out how JMRC can help you realize higher prices for your coins. Whether you are a dealer, collector, investor, or estate officer, you deserve the very best advice available. Not second, third, or fourth best, but only the very best.

Call, email, fax, or write us today. Visit us on the web or in person by appointment at our Sarasota/Bradenton area Florida offices, or at any major convention.

DEMAND FOR '04 PROOF & MINT SETS CAPS A SOLID YEAR HAPPY HOLIDAYS — FINAL ISSUE OF 2004

The Market in Depth

As a whole, the rare coin market has had an excellent year and remains extremely active and profitable for most dealers. Keep in mind that the coin market is composed of several individual market segments with a number of specialty and niche areas. It is absolutely beneficial for dealers to have an area of expertise but it is equally important to understand the entire market, even if only on a broad level. The activity that's taking place within select areas is certainly robust and busy. Heated demand for 2004 Proof Sets and Mint Sets is a prime example of this select activity as much of the action has cooled for the balance of Proof and Mint Sets.

Dealers are definitely not coasting to the new year, but instead they are actively pursuing those special coins for their inventory and customers. One east coast dealer admits that his inventory is just too low. He said, "You can't sell from an empty cart." Consequently he is aggressively Bidding for select dates and rarities so that he can have a reasonably attractive inventory to begin 2005. For most, 2005 will begin with the Florida United Numismatists show and auction January 13-16 in Fort Lauderdale. In many instances this important show is used as an indicator as to the health of the market for the new year. Much will also depend on bullion's performance. Since last week, Silver lost \$1.13 and Gold is down over \$15 per ounce. This volatility is reason alone to stay on top of things. When it comes to buying rare coins for a depleted inventory, dealers rely on their savvy, numismatic knowledge and experience. Several dealers are buying rare date Gold coins at the moment. They feel that as a group they have lagged behind the major move in this year's bull market. One dealer believes that at current levels many of them are attractively priced. Certainly he and others acknowledge the strong moves that have taken place for Circulated (Good thru XF) Charlotte, Dahlonaga and Carson City Mint issues. Still, some dealers are looking to buy nice AU and better examples. One dealer said that public auctions are the main focus for him but he also knows that he must be very aggressive if he is to be a successful buyer. Early Type and Morgan Dollars in all grades have also been target areas for dealers this year.

This is the final issue of *the Coin Dealer Newsletter* for 2004. We wish that all of you and your families have a happy and healthy holiday season. The next *CDN* will be published on January 7, 2005.

This Week's Market

CENTS THRU HALVES: Washington Quarters have become a challenge and dealers have raised Bid on several rolls from the '40s. Semi-key Roosevelts' and 1951S, 1952S & 1953S Franklins are also higher. Most of the declining rolls are related to the drop in Silver Spot.

MERCURY DIMES: Equipped with one of the twentieth centuries all time classic rarities, this popular series continues to assert itself. The 1916D is seen catapulting to new heights with a combined increase of \$5,250 for all Mint State examples over our last report. The semi-keys 1917D & 1925S are also flexing their muscles with advances in Choice and Gem FB.

WALKING LIBERTY HALVES: Several of the scarce issues from the teens are higher, with the 1916D, 1916S & 1917S Obverse escalating in MS64. Look at the elusive 1919S displaying a trio of higher Bids, now at \$14K in Gem. Mixed signals and discounting still prevail for the short set.

DOLLARS: Again these Silver dynamos have blanketed this edition with an awe inspiring array of plus signs. Look at the 1894O now at \$40K in MS65. The tough to find 1886O is also higher, now Bid at \$7,250 in MS64. Peace Dollars remain desirable with a swarm of activity enveloping Circs as well as the Mint State 1927S and 1928.

PROOF SETS AND MINT SETS: Sturdy demand is seen embracing the 2004 11 piece clad Proof Set and the 22 piece Mint Set. Original issue price was \$22.95 for the Proof Set and \$16.95 for the Mint Set, they are now Bid at a whopping \$48 and \$42 respectively. Unfortunately, continued softness and lethargy prevail for the majority of other sets dated after 1953.

COMMEMORATIVES: In a dramatic turn around, Gold Commems have rebounded with a slew of higher Bids. Silver Commems are not bursting with as much activity but do harbor continued support, with the scarce 1928 Hawaiian up, now Bid at \$4,400 in MS65.

TYPE: Bustling with a surge of demand for all Bust Type material, it appears this holiday season will be anything but a bust. With all denominations advancing, dealers will fight tooth and nail this week trying to secure anything in Circ to Gem to satisfy the unyielding appetites of collectors.

GOLD: With Gold bullion off we find the usual casualties that succumb to such volatility. Common Saints in MS64 and MS65 among others are showing declines. However, dealers are still seen chasing the elusive MS65 material as virtually all have higher Bids. Note that the rare and always popular High Relief is reflecting a trio of elevated interest with Gems now at \$36K.

The weekly COIN DEALER newsletter (the *Greysheet*) reports the national Dealer-to-Dealer wholesale coin market, monitoring all possible transactions and offers to buy and sell coins sight-seen. The coins may be certified or "raw" (uncertified), but the grading **MUST ADHERE** to the current leading standard. Prices reported derive from the highest legitimate Bids and lowest legitimate Asks seen nationally; they do not necessarily reflect the levels at which any particular dealer might offer to buy or sell that coin. Bids reported consider activity in the certified **sight-unseen** market, which already include consideration of certification costs. Bids for a **sight-seen 'raw'** coin may be higher or lower than for a **sight-unseen** certified coin due to current market conditions. The CDN may not change Bid due to the bidding adjustments of the high bidder, but will be strongly influenced by Buys which are higher or Sells which are lower than current Bid/Ask levels. **INVESTOR/COLLECTOR NOTE:** The prices in this newsletter are from Dealer-to-Dealer transactions; you should expect to pay a premium above Ask when purchasing coins in a retail transaction; you may also commission a Dealer for your purchases.

BU ROLLS

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the rolls in the late 50's tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series "gem full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Washington rolls—dull or "put together" bring lower prices. Gem full strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices. MS-65 singles may be found in the MONTHLY SUPPLEMENT. Mercury & Walker singles are in the CDN.
